This risk is a new addition to the Strategic Risk Register following a review by Members of Cabinet, the Leader of the Opposition, and Chief Officer Group in June 2015. The Operational Risk Registers will now be reviewed by officers to ensure that they explicitly reflect the policies and procedures identified within this strategic risk. They will be updated accordingly to ensure regular review and enable a clear route of escalation to strategic risk level should it be required.

As at quarter 2, 2015, there are no operational risk areas that warrant escalation to strategic level for Cabinet or Audit Committee consideration.

# C6 - The Council does not attract and retain the skill sets within its workforce that will enable it to maximise opportunities for delivering its services more efficiently through increased partnership working.

#### September 2015

With the Government's 'Open' agenda, increased flexible working patterns of staff, and increased partnership working and use of multiple information storage sources, controls on data management and security have become complex and important.

#### Consequences of Risk -

- 1. Poor decision making due to ineffective use of or insufficient availability of data and information sharing.
- 2. Loss, misrepresentation or unauthorised disclosure of strategies and to support the Council in the future sensitive data, DBC has the potential to be susceptible to development of Information Security, Governance and cyber-attacks or sabotage.
- 3. Under performance. Breach of Data Protection Act leading to legal actions, fines, adverse publicity, and additional remedial and data protection costs.
- 4. Significant interruption of vital services leading to failure to meet duties and to protect people, finances and assets.
- 5. Potential damage to DBC's reputation.

#### compliance.

- To ensure that the Council's policies and procedures regarding ICT Security and Information governance are adhered to across all the Council's services.
- To keep informed of relevant technical innovation and changes to technological, infrastructure, telecom and software systems in relation to Information Security.
- To be the custodian and owner of Information Security and Governance Standards.
- To manage Information Security and Governance **Business Continuity.**
- To train Council Staff, Members on Information Security, Data Protection Act and Freedom of Information Acts.

Compulsory training for staff on Data Security

#### September 2015

The government's austerity programme has led to reduced Local Authority funding over the last five years, resulting in the Council's need to find savings of £5m since 2010/11. Further funding reductions in excess of £3m are forecast over the next four years, which increase the risk of the Council being unable to deliver its vision for the borough, as detailed in the Corporate Plan.

(http://www.dacorum.gov.uk/docs/defaultsource/council-

democracy/dacorum corporateplan web.pdf?sfvrsn=2)

Sustained funding reductions of this magnitude are not only a risk to the Council's capacity to grow and enhance term, and optimise the balance between its financial the community, but more fundamentally they are a risk to the continued provision of high quality frontline services to residents.

If the Council is unable to deliver its vision or to protect its frontline service provision, it risks the following consequences:

Increased community hardship as the services provided to the most vulnerable residents in the borough are impacted, leading to delays in their accessing financial and residential help.

The impact of reducing standards of environmental services across the borough could lead to a less attractive environment and a loss of community identity and civic pride for residents.

The Council's Medium Term Financial Strategy and the HRA Business Plan are controls that mitigate the likelihood of this risk crystallising through the effective modelling of the future financial environment, which allows for more effective forward planning. These controls are detailed below, and have resulted in my reducing the inherent risk score from '4', Very Likely, to '3', 'Likely'.

The Council's Medium Term Financial Strategy (MTFS) details the financial implications of the Corporate Plan over a five-year period. It ensures that the Council is able to forecast likely income pressures in the mediumresources and the delivery of its priorities. The MTFS is reviewed at least annually and is approved by Full Council, thereby providing the opportunity for Members for delivering its corporate objectives. to make informed amendments to the Corporate Plan on the basis of likely funding constraints. The current version is accessible via the following link:

http://www.dacorum.gov.uk/docs/defaultsource/council-democracy/mtfs-july-cabinet-2015.pdf? sfvrsn=0

The Council's Housing Revenue Account (HRA) Business Plan maps planned income and expenditure over a thirty-year period. Government legislation that can affect the Council's delivery of social housing is incorporated within the plan and forms the basis for

There were three internal audit reviews undertaken by Mazars during 2014/15, which provide an external view of the effectiveness of the controls implemented by the Council to manage the financial risks to delivering its priorities.

The audits on 'Efficiency Savings' and 'Main Accounting' received a Full level of assurance (the highest available), and the audit on 'Budgetary Control' received a Substantial level of assurance (the second highest available).

These internal audit opinions provide assurance that the Council is effectively controlling the processes that will enable it to derive value for money from its available resources, and therefore to maximise the opportunity

12/10/2015 06:35PM Page 9 of 16

### September 2015

Reputational damage as residents become dissatisfied with their experience of interacting with the Council. This risk is exacerbated by the growth of social media and the ability of residents to share their experiences with large numbers of people instantaneously.

informed strategic decision-making.

The Council's reviewing of its Corporate Plan together with its Communications Strategy mitigate the impact of this risk, should it occur, by keeping residents informed of the pressures faced by the Council, and consequently by managing aspiration and expectation (detail below). On this basis, I have reduced the Impact score from '4', Severe, to '3', 'High.

#### The Council reviews its

Corporate Plan periodically to ensure that the vision for the borough remains relevant and realistic within the financial constraints outlined within the MTFS and the HRA plan. The aspirations of the Council and the community are managed through the Council's Communications Strategy both through social media, the local press and Digest.

12/10/2015 06:35PM Page 10 of 16

#### September 2015

#### General Fund

The MTFS approved by Cabinet in July 2015 identifies a savings target of £2.6m over 2016/17 – 2017/18. Whilst not significantly higher in cash terms than the Council has faced in previous years, this challenge is tougher because the more obvious savings have already been taken in order to balance the budgets in previous years. This view is supported by the Council's external auditors EY Ltd. Whilst acknowledging that the Council has 'established appropriate budgetary control procedures' in their Audit Results Report issued in July 2015, EY upgraded their assessment of the Council's 'Financial Standing' to a 'significant risk' on the basis of the savings targets identified in the current MTFS.

Furthermore, the Council's forecast overspend as at the end of the first quarter in 2015/16 provides evidence that the Council has already tightened its budgeting process to ensure increased value for money for its residents. The year-end underspends that have provided a cushion for the Council in previous years are unlikely to materialise at the end of 2015/16, which again emphasises the need for a more concerted savings programme.

The budget setting process for 2016/17 is now underway, with the Budget Review Group having met for the first time in August. Senior Officers are currently in the process of reviewing their services for next year with the objective of rethinking the means of delivery to ensure the protection of frontline services at reduced costs.

#### **Housing Revenue Account**

The Chancellor's budget announcement in July 2015 that Council's must reduce social rent by 1% per annum for each of the next four years has resulted in the Council forecasting a reduction in rental income of £30m over the next four years. The implications of this reduction on the Council's plan are currently being worked through with Portfolio Holders, and will be reported to Cabinet during the next quarter.

# 13 - The Borough does not secure sufficient investment in infrastructure to ensure that housing delivery and economic and community growth is sustainable in the longer term.

Category:	<b>Corporate Priority:</b>		Risk Owner:	Portfolio Holder:	Tolerance:
Infrastructure	Affordable Housing		Mark Gaynor	Cllr Graham Sutton	Treating

# September 2015

Consequences	Current Controls	Assurance
The provision of infrastructure such as schools, health, transport and other facilities is crucial to sustainability of the local community and economy. Its funding, however, is increasingly complex and difficult as central government moves away from direct provision and expects the development process and local partnerships to deliver it. Failure to provide this infrastructure will have a number of damaging consequences:  A reduction in the quality of life and opportunities for people in the Borough A serious constraint to economic growth with the impact on the contribution to service provision through Business Rates growth Increased community opposition to new developments, particularly housing, on the grounds that existing infrastructure will not cope Damage to the image of the area, worsening of community pride and social cohesion and reputational damage to the Council	Infrastructure is provided through the development process (s106 and Community Infrastructure Levy) and elements of funding which comes from central government (increasingly through the LEP, bidding and HCC). The responsibility for some infrastructure elements is through privatised arrangements (utilities) or arms-length government agencies such as Network Rail. The ability of the Council to control these processes is limited.  The Council is able to promote the quantum, nature and timing of growth making it more likely that the infrastructure will be delivered. It is also able to promote partnerships and use its asset base and influence to stimulate desired development. Current controls include:  Ensuring that the Local Plan (and its component elements such as the Core Strategy, site allocations, supporting policies and so on on) is up to date and sets out very clearly the requirements of proposed development. This promotes sustainable development by design, access and movement, materials. Use of masterplanning supports what is required to be delivered to produce sustainability on larger sites. The approved Council's Community Infrastructure Levy Policy and schedule (CIL) provides for the levels of contributions that must be made by developers and the purpose for which they will be spent. This also includes an element of CIL which can be spent by local communities and act to link growth directly with	The process for setting out development delivered is through the Annual Monitoring Report. The agreed process for CIL will see an annual report setting out income due, achieved and expenditure made on agreed infrastructure.  Regular reports are made as set out above in controls.

12/10/2015 06:35PM Page 12 of 16

September 2015

infrastructure provision local people want.

Operating a 'open for business' approach to how the Council deals with potential development with a presumption of making acceptable development easier to deliver by proactive advice through the planning process. Allied to this is ensuring that the development management service is capable of achieving decision making within required time limits.

Stimulating required growth through the Council's own regeneration activity, including Hemel Evolution, Gade Zone and Heart of Maylands resulting in inward investment being more likely.

Increasing inward investment through initiatives such as Dacorum Look no Further, Ambassadors, direct provision of business advice and a supportive approach to new development.

Good market intelligence through regular liaison with local employers, landowners, developers, institutional investors and land agents regarding demand and expected assistance.

Partnership with the LEP as the main route for additional funding for infrastructure through influencing the Strategic Growth Plan (in which Hemel Hempstead and the M1 corridor is a priority) and bidding for resources for infrastructure (such as the £5M achieved for West Herts College)

Working to create key partnerships to bring forward development capable of funding major infrastructure (such as Gorhambury)

These controls are exercised within the following:

12/10/2015 06:35PM Page 13 of 16

### September 2015

- Monthly reporting to Hemel Evolution Board and Corporate Regeneration Group
- Fortnightly reporting on key projects to CMT
- Reporting to Performance Board before each Cabinet Meeting
- A clear programme for the Local Development Framework and CIL
- Quarterly reporting to Overview and Scrutiny
- Regular reporting to Cabinet
- Adherence to the agreed performance and project management processes
