effectively deliver services through increased partnership working.

- There is likely to be a reduction in efficiency savings due to inability to create more effective partnerships.
- There is also likely to be a negative impact on any proposals for devolved powers.
- A failure to create more examples of effective partnership working will result in a higher likelihood of back office and front line services being reduced as the financial constraints on the Council's budget continue to tighten.
- People strategy has been implemented which will cover issues including graduate scheme, apprenticeship scheme, succession planning, reviewing T&Cs etc.
- Continuation

comparable to the wider business average of 15% and only just above the local government average (12%).

- Opportunities for collaboration and shared services are being actively considered across Hertfordshire in relation to Legal, HR, Information Management, Insurance and Payroll Services.
- Recruitment for leadership posts is generally competitive with a good number of applications being received from suitably qualified candidates for vacant posts.

We have a well-established and effective approach to recruiting staff, although there are some areas in which it is more difficult to attract candidates.

We use a range of media to advertise and operate up-to-date recruitment policies and practices. However, following a review we have begun to implement changes, which will make the Council more attractive to prospective recruits. This includes a new recruitment website, easier forms and using the power of LinkedIn and other social media sites to better target suitable candidates.

We have also started to implement proposals to modernise our terms and conditions, which includes car salary sacrifice, holiday trading and a new staff recognition scheme.

A project to review our approach to training and development is underway which will ensure our corporate training fulfils the workforce needs and that the service training budgets are consistently split across the teams.

We are also continuing to provide a dedicated management-training programme (Leading in Dacorum) that focuses on service planning, innovation, efficiencies and workforce planning, as well as a comprehensive mandatory training programme to ensure staff have the right skills to carry out their roles.

We have a robust approach to managing data security and protection. This includes a range of technical security measures such as anti-virus software, corporate firewalls and various authentication processes.

New staff also have to review and sign a number of Information Security / Management Policies (Including data protection) and all suppliers working with our data are required to complete an 'accreditation form'.

Overall systems availability in Q2 was above target at 99.96% and we received our PSN reaccreditation (January). We also continue to implement the findings from the independent cyber security audit.

The forthcoming refresh of our hardware (February) and software upgrades will strength our resilience and we are continuing to work with BT to progress delivery of resilient lines. We are also working towards the upgrade of the Council's data centre (March).

We are continuing to run quarterly training courses and refreshers on the Data Protection Act, which will be merged with the GDPR course in May 2018. A GDPR 12 point action plan was presented to CMT and is being implemented.

F6 - Changes to legislation could negatively affect the medium to long term viability of the HRA Business Plan.

December 2017

Consequences	Current Controls	Assurance
Since the 'once and for all' settlement with government on the self financing of the HRA there have been major legislative and policy changes which, overall, have impacted detrimentally on the HRA Business Plan: • The re-invigoration of the RTB which has increased sales from around 15-20 per year to well over 100 • The parallel introduction of the RTB 'one for one' replacement scheme where the Council can use receipts to build new homes but only to pay for 30% of costs (leaving the other 70% to be sourced) • A change to national rent policy which moved from RPI + 0.5% to CPI + 1% and ending the process of reaching target rents (leaving 60% of DBC properties below target) The government now propose two further changes which, if enacted, will further constrain the capacity of the HRA Business Plan viability: • A rent reduction of 1% per year for four years and a complete inability to make any progress towards convergence to target rents (a reduction of income of £30M over the first four years and over £500M over the lifetime of the HRA Business Plan) • Enforced sales of 'high value' council homes as they become vacant to fund Housing Association RTB The first of these changes is already in draft legislation and the assumption must be that it will happen. The consequences are very significant, and even with mitigation will continue to be so: The financial viability of the HRA to meet its current	Elements of the changes are yet to apply (the rent changes start from April 2016) and the current controls – proper business planning, the disciplines of the MTFS, project and programme management arrangements, effective contract management, annual efficiency programmes and so on – reflect on the existing position and could provide sufficient mitigation to the long term business plan. The controls proposed for the new changes – if the proposed legislation is enacted – will only mitigate the impact to an extent as the scale of	A remodelling of the HRA Business Plan has been made to take account of the impact of the changes which will be considered by Cabinet (initially in November 2015 and periodically thereafter). This has demonstrated that the current new build programme can be completed. The ability to extend this further will depend on the success of the mitigations above.

29/01/2018 12:19PM Page 6 of 16

December 2017

business plan objectives in full cannot be made due to loss of income and economies of scale as stock numbers apply). diminish.

Services to tenants will have to reduce, including proposed investment in the existing stock, to deal with the scale of resource reduction.

The new build programme at its proposed scale will have to reduce, and possibly cease, in order to provide services to tenants and balance the books.

That resources provided through RTB one for one replacement will be unused and lost to the Borough as it the Borough and to increase supply of new homes. is returned to the Treasury as a result of the Council's inability to provide the 70% match funding and as Housing Associations reduce their supply of new affordable homes (as a result of the same legislative changes impacting on the Council).

The Council's housing stock will progressively reduce through RTB, enforced sales and reduction in new build which will reduce its ability to meet the housing needs in Ensuring that our intelligence on the changing position the Borough and achieving the strategic objective of increasing the supply of affordable homes.

care as part of a tenancy where rent controls do not

Altering the tenure mix of the current new build programme to include shared ownership and market sale in order to cross subsidise new rented provision. This could incorporate an element of affordable rent to increase revenue.

Development of a partnership approach to use of RTB one for one replacement funding with local Housing Associations in order to minimise losses of resource to Fully exploring the potential of a Local Housing Company to improve the cost of delivery of new homes alongside the benefits to the General Fund.

Lobbying of government regarding the disproportionately severe impacts of the changes, though historical reasons, on DBC seeking some local amelioration.

and on developments within the sector are fully up to date through membership of ARCH, liaison with CIH and other key bodies.

The following controls are in place already with regard to the financial and strategic management of the HRA **Business Plan:**

- An annual refresh of the HRA Business Plan reported both to CMT and to Cabinet
- Monthly meeting between budget holders and accountants monitoring progress against original timeframes and costs

29/01/2018 12:19PM Page 7 of 16

December 2017

- Regular meetings of the Corporate New Build Group considering performance and new schemes
- CMT receive a fortnightly update on the new build programme
- Performance Board comprising Chief Officers and cabinet members receive a report on progress before each cabinet meeting
- Reports on HRA performance go the Overview and Scrutiny every quarter
- The HRA is reported as part of the overall corporate financial reporting process

Confirmation from the government that rent increases of CPI plus 1% from 2020 will apply will help stabilise the HRA. The new Business Plan will outline a continuation of new build over the next few years. There remains a concern over the proposed levy for 'higher value council houses' which looks like being brought in for 2019/20 with no indication of how much that will be. In practice this will require the sale of a number of vacant homes.

F7 - Funding and income is not sufficient to deliver the Council's corporate objectives

years, resulting in the Council's need to find savings of £7m since 2010/11. Further funding reductions in excess modelling of the future financial environment, which of £3m are forecast over the next four years, which increases the risk of the Council being unable to deliver its vision for the borough, as detailed in the Corporate Plan.

(http://www.dacorum.gov.uk/docs/defaultsource/council-

democracy/dacorum corporateplan web.pdf?sfvrsn=2)

Sustained funding reductions of this magnitude are not only a risk to the Council's capacity to grow and enhance term, and optimise the balance between its financial the community, but more fundamentally they are a risk to the continued provision of high quality frontline services to residents.

If the Council is unable to deliver its vision or to protect its frontline service provision, it risks the following consequences:

Increased community hardship as the services provided to the most vulnerable residents in the borough are impacted, leading to delays in their accessing financial and residential help.

The impact of reducing standards of environmental services across the borough could lead to a less attractive environment and a loss of community identity and civic pride for residents.

Reputational damage as residents become dissatisfied

likelihood of this risk crystallising through the effective allows for more effective forward planning. These controls are detailed below, and have resulted in my reducing the inherent risk score from '4', Very Likely, to '3', Likely.

The Council's Medium Term Financial Strategy (MTFS) details the financial implications of the Corporate Plan over a five-year period. It ensures that the Council is able to forecast likely income pressures in the mediumresources and the delivery of its priorities. The MTFS is reviewed at least annually and is approved by Full Council, thereby providing the opportunity for Members delivering its corporate objectives. to make informed amendments to the Corporate Plan on the basis of likely funding constraints. The current version is accessible via the following link:

http://www.dacorum.gov.uk/docs/defaultsource/council-democracy/mtfs-july-cabinet-2015.pdf? sfvrsn=0

The Council's Housing Revenue Account (HRA) Business Plan maps planned income and expenditure over a thirty-year period. Government legislation that can affect the Council's delivery of social housing is incorporated within the plan and forms the basis for informed strategic decision-making.

assurance.

The external auditors, Grant Thornton, gave the following 'value for money' opinion within the 2016/17 year end audit of the Council: 'based on the work we performed to address the significant risk, we concluded that [the Council] had proper arrangements in place in all significant respects to ensure it delivered value for money in its use of resources.'

These audit opinions provide assurance that the Council is effectively controlling the processes that will enable it to derive value for money from its available resources, and therefore to maximise the opportunity for

29/01/2018 12:19PM Page 9 of 16

December 2017

with their experience of interacting with the Council. This risk is exacerbated by the growth of social media and the ability of residents to share their experiences with large numbers of people instantaneously.

The Council's reviewing of its Corporate Plan together with its Communications Strategy mitigate the impact of this risk, should it occur, by keeping residents informed of the pressures faced by the Council, and consequently by managing aspiration and expectation (detail below). On this basis, I have reduced the Impact score from '4', Severe, to '3', High.

The Council reviews its

Corporate Plan periodically to ensure that the vision for the borough remains relevant and realistic within the financial constraints outlined within the MTFS and the HRA plan. The aspirations of the Council and the community are managed through the Council's Communications Strategy both through social media, the local press and Digest.

December 2017

A sustainable draft budget for 2018/19 was presented to Joint OSC in December 2017, and is scheduled for recommendation by Council in February 2018.

2018 Government funding levels for Dacorum, announced within the Provisional Local Government Finance Settlement in December 2017 were consistent with those anticipated through the 4-year funding deal to which DBC subscribed.

The recent collapse of Carillion demonstrates the risk to public sector bodies of increased partnership working with the private sector. The Council has no direct exposure to Carillion. Officers are currently in discussion with the Council's major contractors to understand if there are likely to be any significant, indirect implications arising for the Council.

There have been recent reports in the news regarding the financial stability of Interserve, which provide the Council's Facilities Management services for The Forum. There is not believed to be a direct threat to the current service provision, but the Council does have a contingency plan in place to ensure continuation of services should Interserve cease to be in a position to provide them.

Officers within Housing, where the Council contracts the highest value with the private sector, are currently reviewing the contingency position should any of the Council's major contractors be unable to fulfil their obligations in the future. This will be reported back to Audit Committee.

13 - The Borough does not secure sufficient investment in infrastructure to ensure that housing delivery and economic and community growth is sustainable in the longer term.

December 2017

government moves away from direct provision and expects the development process and local partnerships to deliver it. Failure to provide this infrastructure will have a number of damaging consequences:

A reduction in the quality of life and opportunities for people in the Borough

A serious constraint to economic growth with the impact on the contribution to service provision through Business Rates growth

Increased community opposition to new developments, particularly housing, on the grounds that existing infrastructure will not cope

Damage to the image of the area, worsening of community pride and social cohesion and reputational damage to the Council

HCC). The responsibility for some infrastructure elements is through privatised arrangements (utilities) or arms-length government agencies such as Network Rail. The ability of the Council to control these processes is limited.

The Council is able to promote the quantum, nature and timing of growth making it more likely that the infrastructure will be delivered. It is also able to promote partnerships and use its asset base and influence to stimulate desired development. Current controls include:

Ensuring that the Local Plan (and its component elements such as the Core Strategy, site allocations, supporting policies and so on on) is up to date and sets out very clearly the requirements of proposed development. This promotes sustainable development by design, access and movement, materials. Use of masterplanning supports what is required to be delivered to produce sustainability on larger sites. The approved Council's Community Infrastructure Levy Policy and schedule (CIL) provides for the levels of contributions that must be made by developers and the purpose for which they will be spent. This also includes an element of CIL which can be spent by local communities and act to link growth directly with infrastructure provision local people want. Operating a 'open for business' approach to how the Council deals with potential development with a presumption of making acceptable development easier to deliver by proactive advice through the planning

infrastructure.

Regular reports are made as set out above in controls.

29/01/2018 12:19PM Page 12 of 16

December 2017

process. Allied to this is ensuring that the development management service is capable of achieving decision making within required time limits.

Stimulating required growth through the Council's own regeneration activity, including Hemel Evolution, Gade Zone and Heart of Maylands resulting in inward investment being more likely.

Increasing inward investment through initiatives such as Dacorum Look no Further, Ambassadors, direct provision of business advice and a supportive approach to new development.

Good market intelligence through regular liaison with local employers, landowners, developers, institutional investors and land agents regarding demand and expected assistance.

Partnership with the LEP as the main route for additional funding for infrastructure through influencing the Strategic Growth Plan (in which Hemel Hempstead and the M1 corridor is a priority) and bidding for resources for infrastructure (such as the £5M achieved for West Herts College)

Working to create key partnerships to bring forward development capable of funding major infrastructure (such as Gorhambury)

These controls are exercised within the following:

- Monthly reporting to Hemel Evolution Board and Corporate Regeneration Group
- Fortnightly reporting on key projects to CMT
- Reporting to Performance Board before each Cabinet Meeting

29/01/2018 12:19PM Page 13 of 16
