PROPOSALS AND SITES

24 Proposals and Sites

Introduction to Proposals and Sites

- 24.1 The work on allocations is still evolving and we have reflected as much detail as we possibly can at this stage in the Plan. In particular, we have not been able to include all forms of proposals that might emerge in the settlements. We set out our current understanding of allocations in more detail in this 'Proposals and Sites' section of the plan
- 24.2 We are working towards incorporating a full list of allocations for the next stage of the Plan (Regulation 19). We will undertake this work in progressing discussions on individual development proposals with landowners and developers, our partners and other key stakeholders and through taking forward linked work on infrastructure requirements in the Infrastructure Delivery Plan.

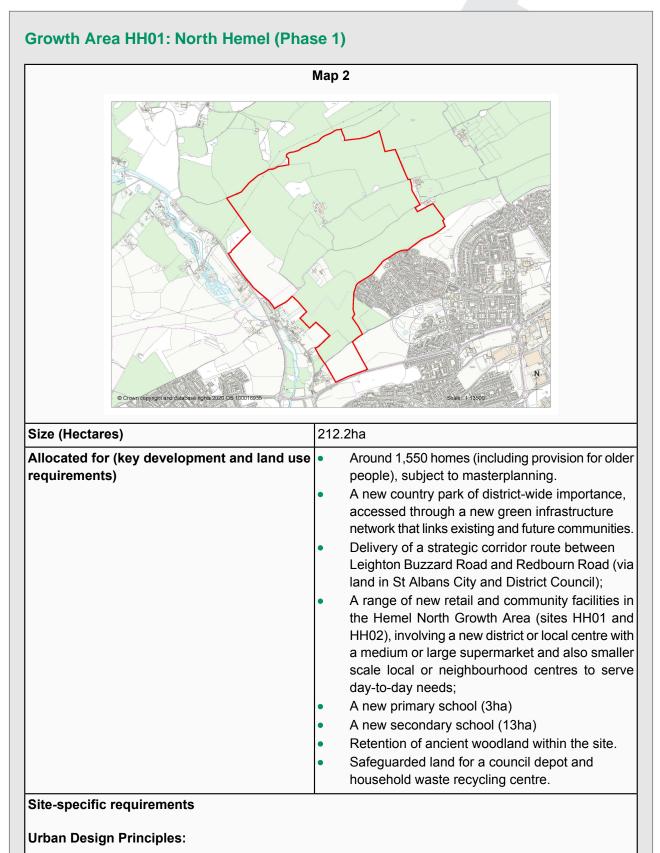

HEMEL HEMPSTEAD GARDEN COMMUNITIES PROPOSALS AND SITES

Hemel Hempstead Garden Communities

North Hemel Hempstead Allocations

• The site's masterplan should be developed in accordance with The Hemel Hempstead Garden Communities Spatial Vision, Strategic Masterplan Guidance and Transformation Plan, when adopted.

- Design codes will be developed alongside the preparation of any outline planning application and agreed by means of condition.
- The site will be brought forward with a masterplan showing a comprehensive phasing programme for development to be prepared in consort with the local planning authority.
- The allocations *North Hemel (Phase 1)* and *North Hemel (Phase 2)* should be planned together, preferably as a joint plan or as a minimum through closely aligned masterplans taking an integrated approach to the joint site area.

Access, Highways, and Sustainable Transport:

- Development of the site should seek to achieve a 60% share of sustainable transport modes by 2050.
- Primary access to be provided via Leighton Buzzard Road/B440 with secondary access to be provided via Link Road (GA-HH22 Marchmont Farm).
- Safeguard sufficient land to provide for a new strategic corridor route (40mph) which will connect the Leighton Buzzard Road to North Hemel (Phase 2) and the allocations to the east (St Albans City and District Council Local Plan). The preferred route will be identified through the Framework Masterplan Guidance.

Social and Community:

- Create a new district/local/neighbourhood centre, masterplanned in a way which connects to existing
 and future neighbourhoods. The centre should include new retail and community facilities to serve
 the day-to-day needs of new and existing residents, and a medium or large supermarket if it is
 decided not to build this facility on site HH02.
- Provide 3 ha of land for and deliver a new primary school, to be located at the district/local/neighbourhood centre.
- Provide 13 ha of land for and deliver a new secondary school on site.

Environmental Health:

• Consideration should be given to Controlled Waters as a receptor to potential ground contamination. Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- The topography of the site with particular attention to those areas which are highly intervisible;
- areas which share characteristics with or create the setting for the Chilterns AONB;
- the setting of the historic settlement and conservation area of Piccotts End;
- the variation in landscape sensitivity within the parcel;
- conserving enhancing or restoring the hedgerows and field patterns and boundaries;
- conserving and enhancing the historic sunken lanes and PRoW;
- the vernacular, use of materials and setting of the existing farmsteads; and
- the characteristic ridgelines and tree-lined skylines of the area.

Biodiversity and Green Infrastructure:

- Undertake a project level Habitats Regulations Assessment to ensure that no significant adverse effects take place on designated/European sites where pathways exist.
- Deliver Suitable Alternative Natural Greenspace (SANG) on-site to offset potential adverse effects on the Chilterns Beechwoods SAC arising from recreational pressure. The scale and form of this SANG will need to be agreed with Natural England in advance of the submission of an outline planning application.
- Use the new landscape structure to develop a series of new green and blue infrastructure corridors through the site and connect with existing green networks in the area
- Retain and where possible enhance Ancient Woodland both within (Varney's wood) and on the edge of the site.

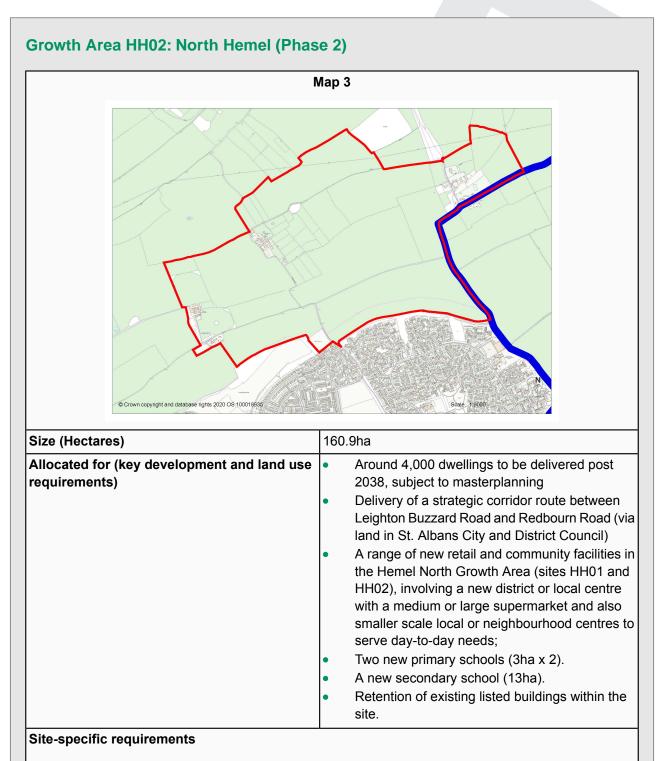

Historic environment and Cultural Heritage:

 Ensure the heritage assets at Picotts End (including the Conservation Area, Listed Buildings and Scheduled Monuments) are conserved through appropriate landscape mitigation measures on land to be retained in the Green Belt.

Flood Risk and Drainage:

 Modelling of small watercourses will need to be completed to determine the extent of flood risk across the site.

Urban Design Principles:

- The site's masterplan should be developed in accordance with The Hemel Hempstead Garden Communities Spatial Vision, Strategic Masterplan Guidance and Transformation Plan, when adopted.
- Design codes will be developed alongside the preparation of any outline planning application and agreed by means of condition.

- The site will be brought forward with a masterplan showing a comprehensive phasing programme for development to be prepared in consort with the local planning authority.
- The allocations *North Hemel (Phase 1)* and *North Hemel (Phase 2)* should be planned together, preferably as a joint plan or as a minimum through closely aligned masterplans taking an integrated approach to the joint site area.

Access, Highways, and Sustainable Transport:

- Development of the site should seek to achieve a 60% share of sustainable transport modes by 2050.
- Safeguard sufficient land to provide for a new transport corridor which will connect the Leighton Buzzard road to the allocations to the east (St Albans City and District Council Local Plan). The route will be identified through the Framework Masterplan Guidance.

Social and Community:

- Create a network of new district/local/neighbourhood centres across the site, including retail and community facilities to serve the day-to-day needs of new and existing residents, and a medium or large supermarket if it is decided not to build this facility on site HH01.
- Provide 6 ha of land for and deliver two new primary schools (3ha each), to be located at district/local/neighbourhood centres.
- Provide 13 ha of land for and deliver a new secondary school on site.
- Create a network of interconnected open spaces throughout the site to serve existing and new communities.

Environmental Health:

Consideration should be given to Controlled Waters as a receptor to potential ground contamination.
 Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the topography of the site with particular attention to those areas which are highly intervisible;
- areas which share characteristics with or create the setting for the Chilterns AONB;
- the variation in landscape sensitivity within the parcel;
- conserving enhancing or restoring the hedgerows and field patterns and boundaries;
- conserving and enhancing the historic sunken lanes and PRoW;
- the vernacular, use of materials and setting of the existing farmsteads; and
- the characteristic ridgelines and tree-lined skylines of the area.

Biodiversity and Green Infrastructure:

- Undertake a project level Habitats Regulations Assessment to ensure that no significant adverse effects take place on designated/European sites where pathways exist.
- Deliver Suitable Alternative Natural Greenspace (SANG) on-site to offset potential adverse effects on the Chilterns Beechwoods SAC arising from recreational pressure. The scale and form of this SANG will need to be agreed with Natural England in advance of the submission of an outline planning application.
- Use the new landscape structure to develop a series of new green and blue infrastructure corridors through the site and connect with existing green networks in the area.

Historic environment and Cultural Heritage:

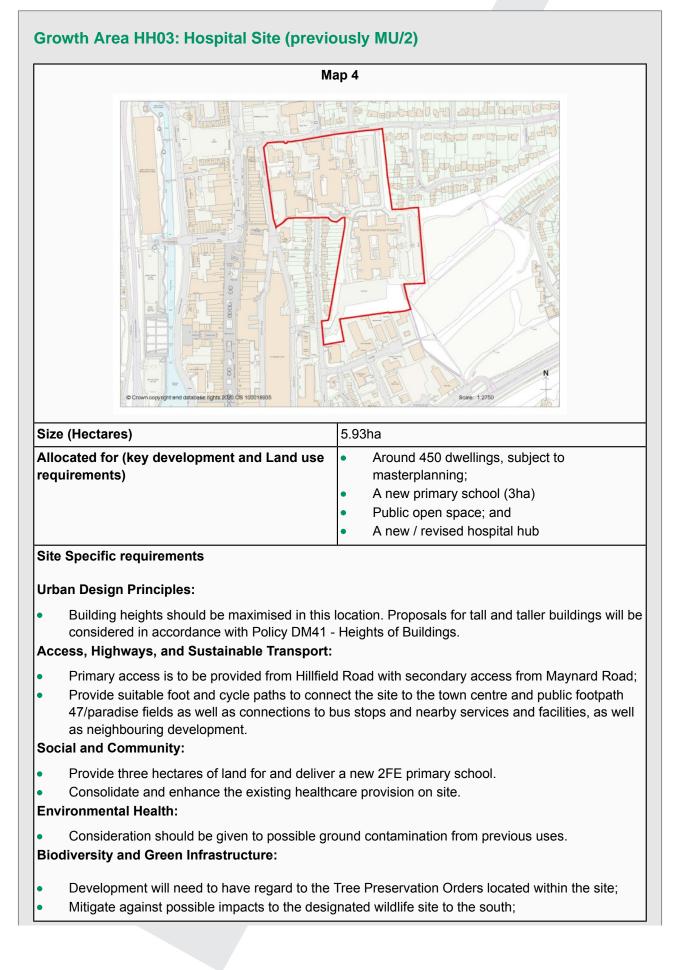

- Investigate the effect of development on five listed buildings within the site and ensure that their setting is conserved and/or enhanced. Further guidance on how this can be achieved will be provided through the Hemel Garden Communities Strategic Masterplan Guidance (SPD).
- Ensure the setting of the scheduled monument The Aubreys Camp to the east of the site (in St. Albans City and District Council) is conserved.

Flood Risk and Drainage:

 Modelling of small watercourses will need to be completed to determine the extent of flood risk across the site.

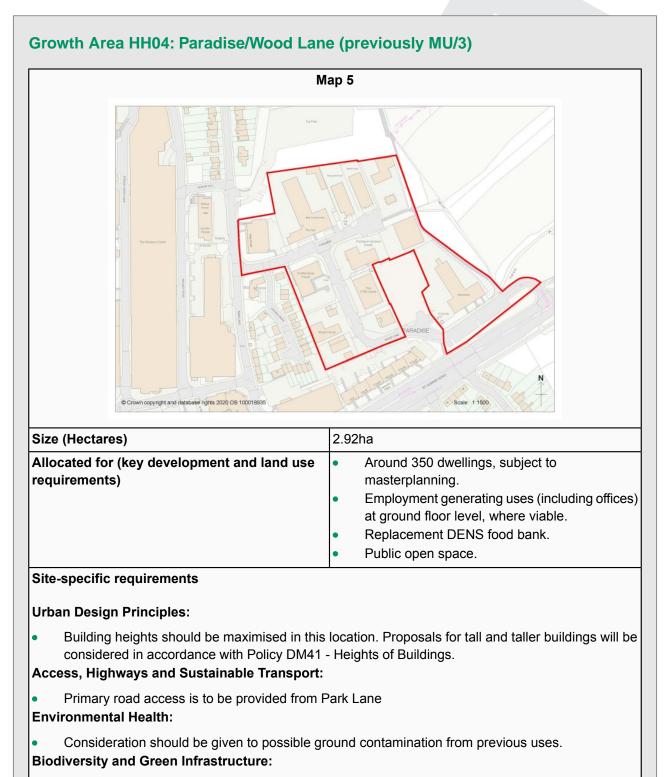

Hemel Hempstead Town Centre Allocations

As part of delivering a net gain in biodiversity, utilise new landscape mitigation measures and structure to connect with green corridors in the area, including enhancements to the public open space and wildlife site.

 As part of delivering a net gain in biodiversity, utilise new landscape mitigation measures and structure to connect with green corridors in the area, including the adjacent public open space and wildlife site

Flood Risk and Drainage:

Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

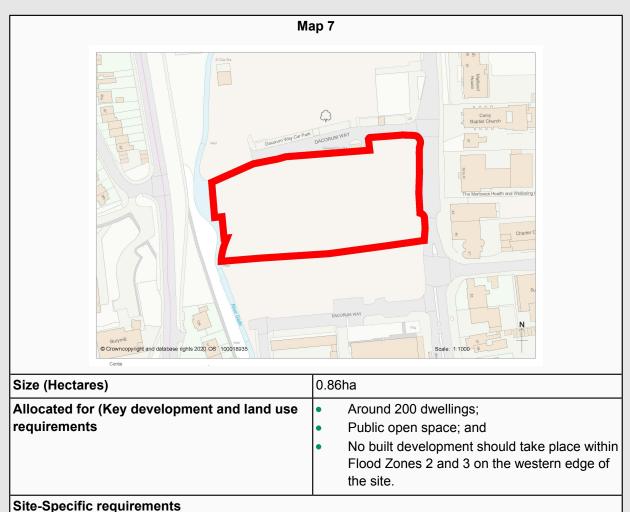

- Development should reflect the cultural importance of the site as the original market square for the New Town, and enhance the setting of the Water Gardens immediately to the north, a locally registered park and garden.
- Development should consider potential impacts on nearby listed buildings and structures on Marlowes.

Flood Risk and Drainage:

• Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Growth Area HH06: Civic Centre Site

• •

Urban Design Principles:

 Building heights should be maximised in this location. Proposals for tall and taller buildings will be considered in accordance with Policy DM41 - Heights of Buildings.

Access, Highways and Sustainable Transport:

Access is to be provided on Dacorum Way.

Environmental Health:

• Consideration should be given to Controlled Waters as a receptor to potential ground contamination. **Biodiversity and Green Infrastructure:**

Retain and enhance existing buffer between the site and the River Gade;

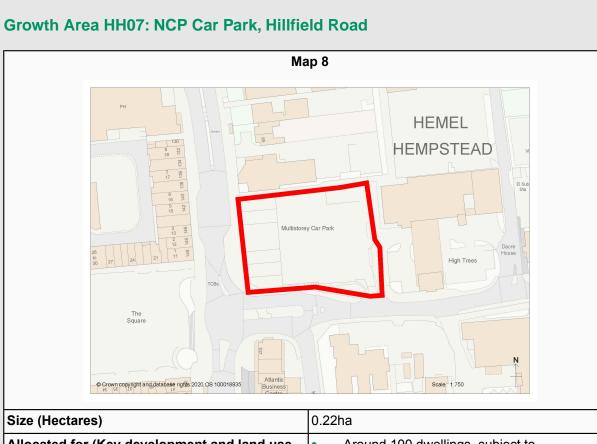

• Development will need to have regard to the Tree Preservation Orders on the edge of the site. **Historic, Environment and Cultural Heritage:**

• Conserve and where possible enhance the setting of listed buildings on Marlowes

Flood Risk and Drainage:

- No built development should take place within Flood Zones 2 and 3;
- Surface water run-off rates as a result of development of the site should not exceed existing rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Allocated for (Key development and land use requirements
 Around 100 dwellings, subject to masterplanning.
 Retail and other town centre uses at ground floor level.

Site-Specific requirements

Urban Design Principles:

- Building heights should be maximised in this location. Proposals for tall and taller buildings will be considered in accordance with Policy DM41 - Heights of Buildings.
- Encourage active frontages at ground floor level.

Access, Highways and Sustainable Transport:

Primary access to be provided from Hillfield Road.

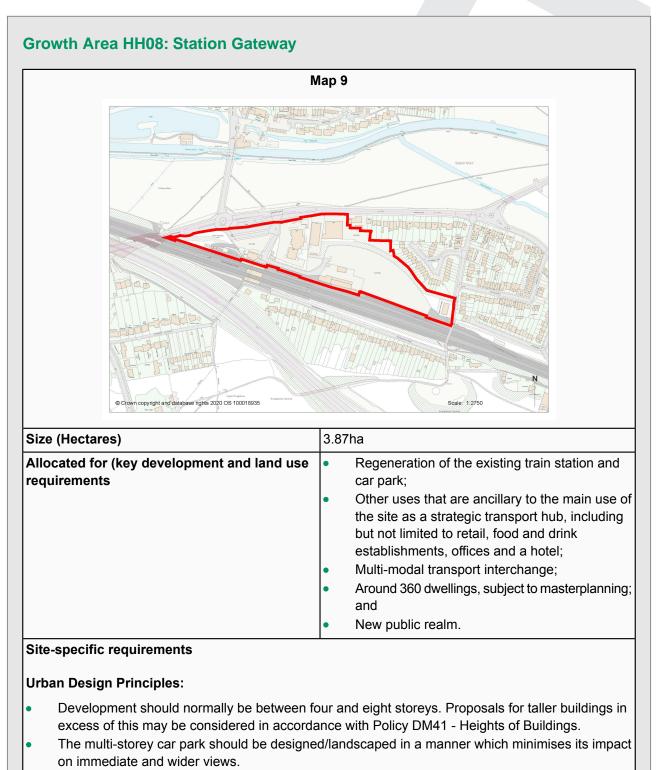

Historic, Environment and Cultural Heritage:

- Conserve the Rowland Emmet mural on the southern elevation of the current structure (Grade II listed) and seek to incorporate into any future development proposals on this site.
- Conserve and where possible enhance the setting of listed buildings on Marlowes.

Two Waters Allocations

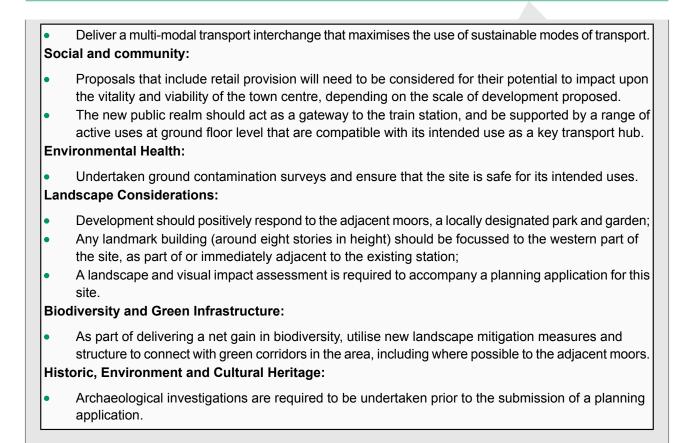

•

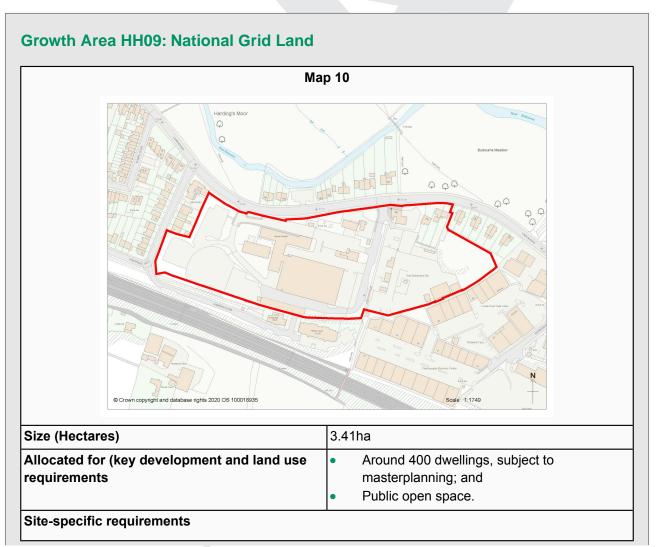

Access, Highways and Sustainable Transport:

- Primary access to be provided from London Road to serve all users of the site;
- Pedestrian and cycle facilities should deliver new and/or enhanced connections with the Town Centre and Maylands Business Park;

Urban Design Principles:

• Development should normally be between four and six storeys. Proposals for taller buildings in excess of this may be considered in accordance with Policy DM41 - Heights of Buildings.

Access, Highways and Sustainable Transport:

- Access to be provided from London Road;
- Enhance pedestrian and cycle links with Station Gateway, the town centre, and key employment sites where possible.

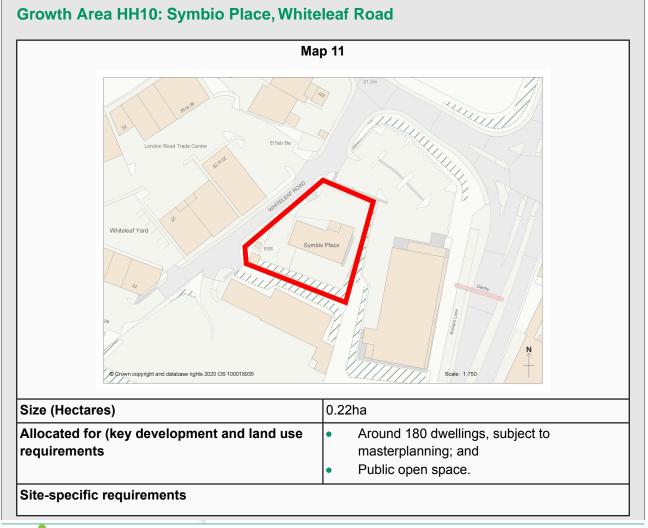

Environmental Health:

- No residential development should take place within the exclusion area associated with high pressure gas pipelines.
- Undertake ground contamination surveys and ensure that the site is safe for its intended uses;
- Investigate possible noise and air quality issues from the neighbouring employment sites and from the railway, and where necessary, identify appropriate mitigation measures to address any adverse impacts from these.

Landscape Considerations:

• Development should positively respond to the adjacent moors, a locally designated park and garden. Biodiversity and Green Infrastructure:

 As part of delivering a net gain in biodiversity, utilise new landscape mitigation measures and structure to connect with green corridors in the area, including where possible to the adjacent moors.

Urban Design Principles:

 Building heights are acceptable up to 16 storeys (residential). Proposals for taller buildings in excess of this will be considered in accordance with Policy DM41 - Heights of Buildings.

Access, Highways and Sustainable Transport:

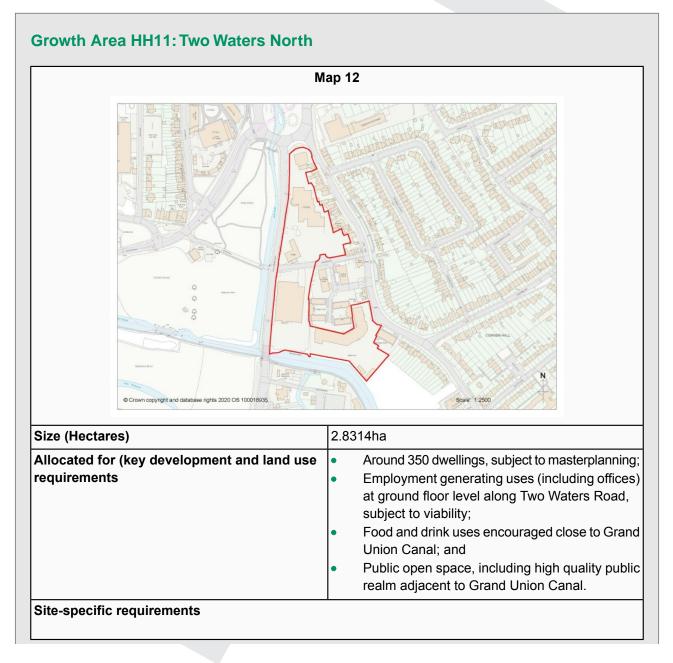

- Access to be provided from Whiteleaf Road;
- Enhance pedestrian and cycle links with Station Gateway, the town centre, and key employment sites where possible.

Environmental Health:

- Undertake ground contamination surveys and ensure that the site is safe for its intended uses;
- Investigate possible noise and air quality issues from the neighbouring employment sites and from the railway, and where necessary, identify appropriate mitigation measures to address any adverse impacts from these.

Landscape Considerations:

Development should positively respond to the adjacent moors, a locally designated park and garden.

Urban Design Principles:

 Building heights should be maximised across the site, taking into account neighbouring uses, including any sensitive uses and public open space. A landmark building of around 16 storeys may be permitted at the northern end of the site (Corner Hall). Lower building heights may be necessary close to existing residential areas.

Access, Highways and Sustainable Transport:

- Access to be provided between Two Waters Road, Corner Hall and Lawn Lane.
- No through traffic will be allowed from Lawn Lane onto Two Waters Road, unless a more suitable approach to managing transport flows and impacts can be agreed with Hertfordshire County Council prior to submitting a planning application.
- Enhance pedestrian and cycle links with the town centre, *Station Gateway*, and key employment sites where possible.

Environmental Health:

- Undertaken ground contamination surveys and ensure that the site is safe for its intended uses. Landscape Considerations:
- Development should positively respond to the adjacent moors, a locally designated park and garden.
- A landscape and visual impact assessment is required to accompany any proposals that include a landmark building on this site.

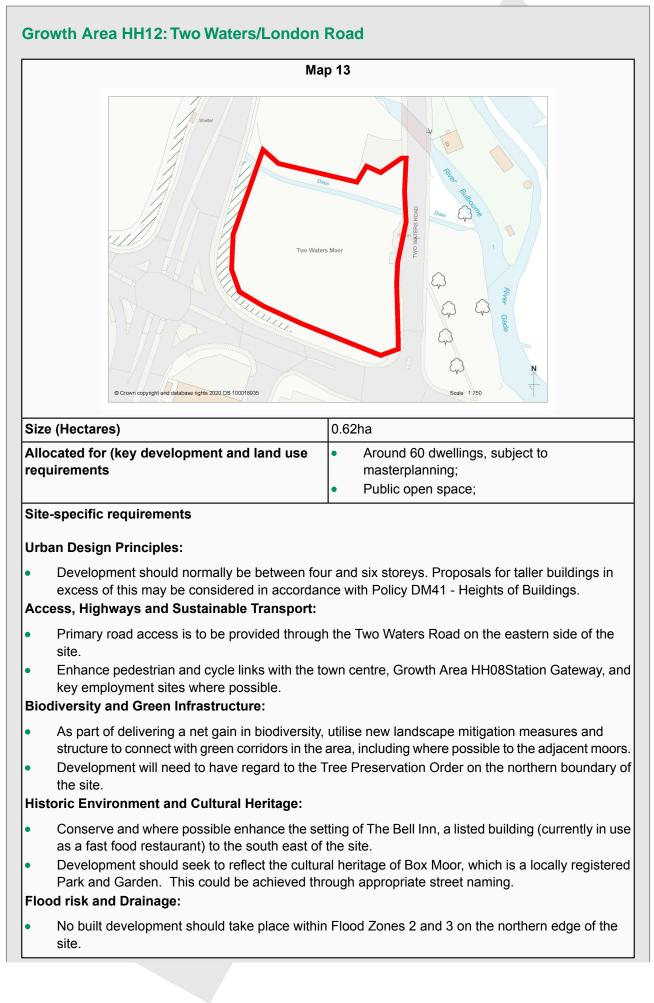

Biodiversity and Green Infrastructure:

 As part of delivering a net gain in biodiversity, utilise new landscape mitigation measures and structure to connect with green corridors in the area, including to the adjacent moors and the Grand Union Canal corridor.

Flood risk and Drainage:

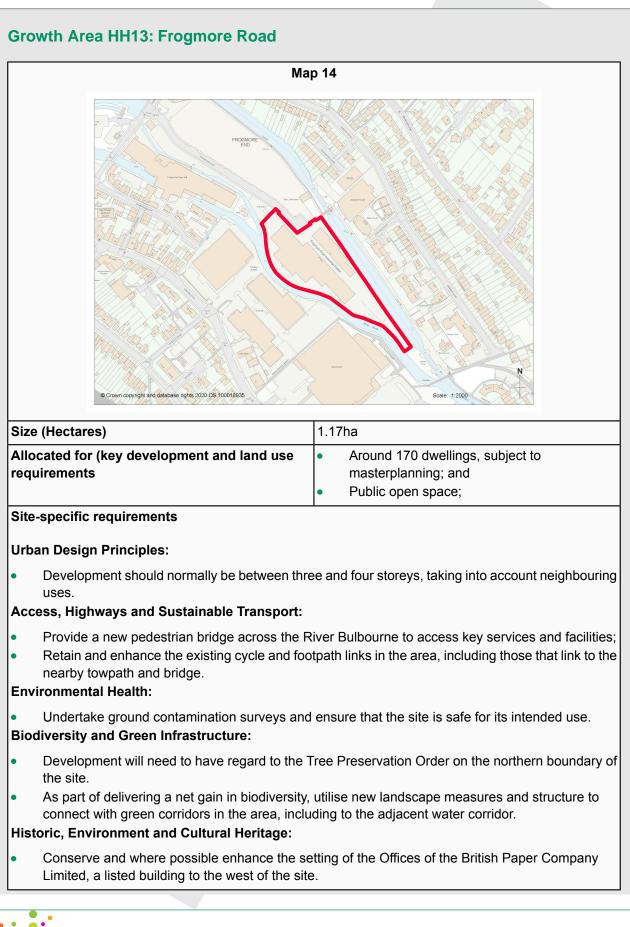

- Development should avoid areas of higher flood risk where possible.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

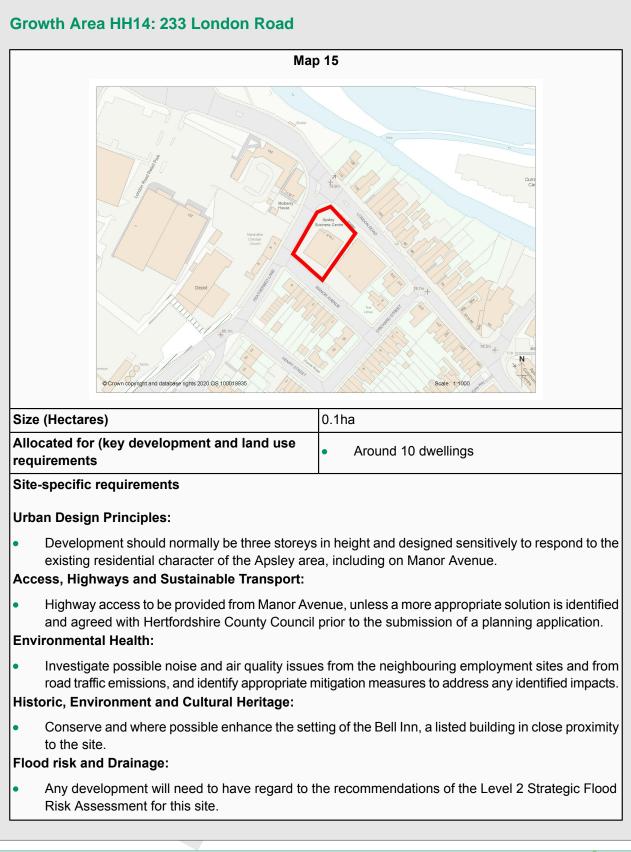

Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

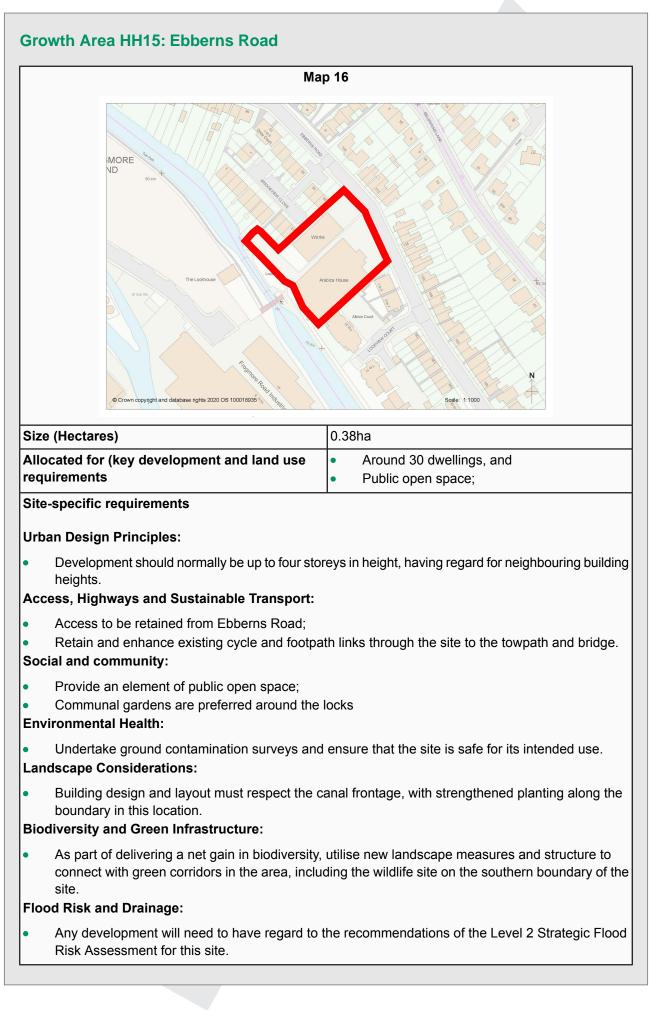

Flood risk and Drainage:

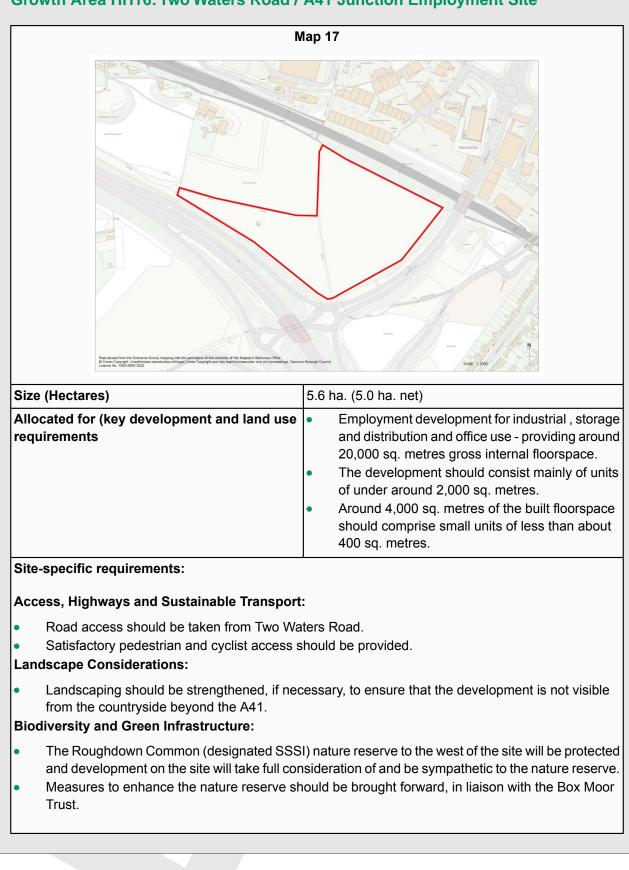

- No built development should take place within Flood Zones 2 and 3 on the edges of the site
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

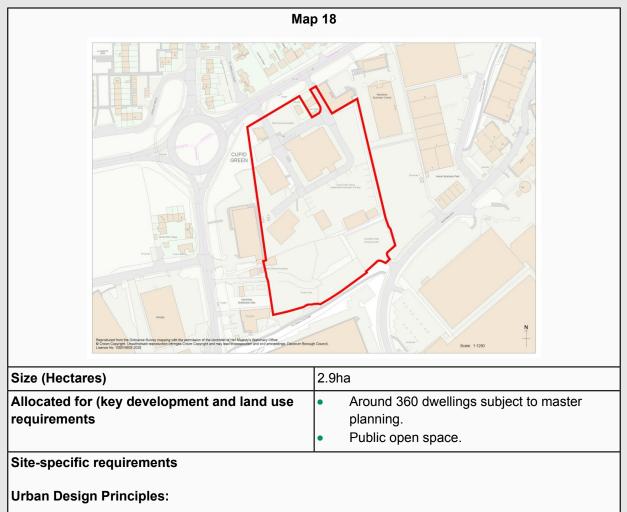

Growth Area HH16: Two Waters Road / A41 Junction Employment Site

Maylands Allocations

Growth Area HH17: Cupid Green Depot

• Development should normally be between three and five storeys, taking into account neighbouring uses, including any sensitive uses. Lower building heights may be necessary close to existing residential areas to the north.

Access, Highways and Sustainable Transport:

- Primary access is to be retained from Redbourn Road, with secondary access from Eastman Way.
- Provide direct and convenient foot and cycle paths to connect to existing development and The Nickey Line located on the southern boundary of the site.

Environmental Health:

- Undertake ground contamination surveys and ensure that the site is safe for its intended use.
- Investigate possible noise issues from the neighbouring employment sites and electric substation and where necessary, identify appropriate mitigation measures to address any adverse impacts.

Biodiversity and Green Infrastructure:

 As part of delivering a net gain in biodiversity, utilise new landscape measures and structure to connect with green corridors in the area, including the wildlife site (Nickey Line) adjacent to the southern boundary of the site.

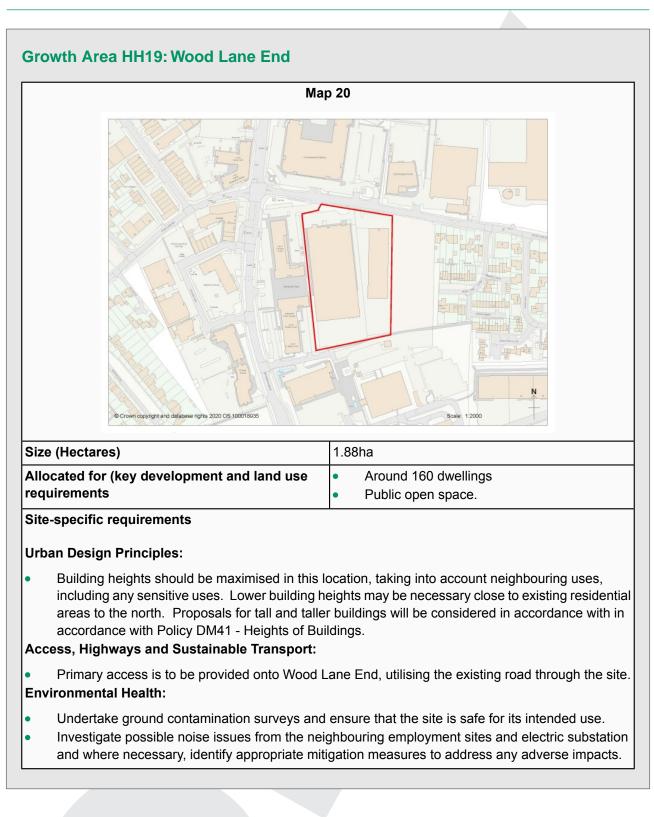

Historic, Environment and Cultural Heritage:

• Conserve and where possible enhance the setting of the Corner Farmhouse, a listed building to the west of the site.

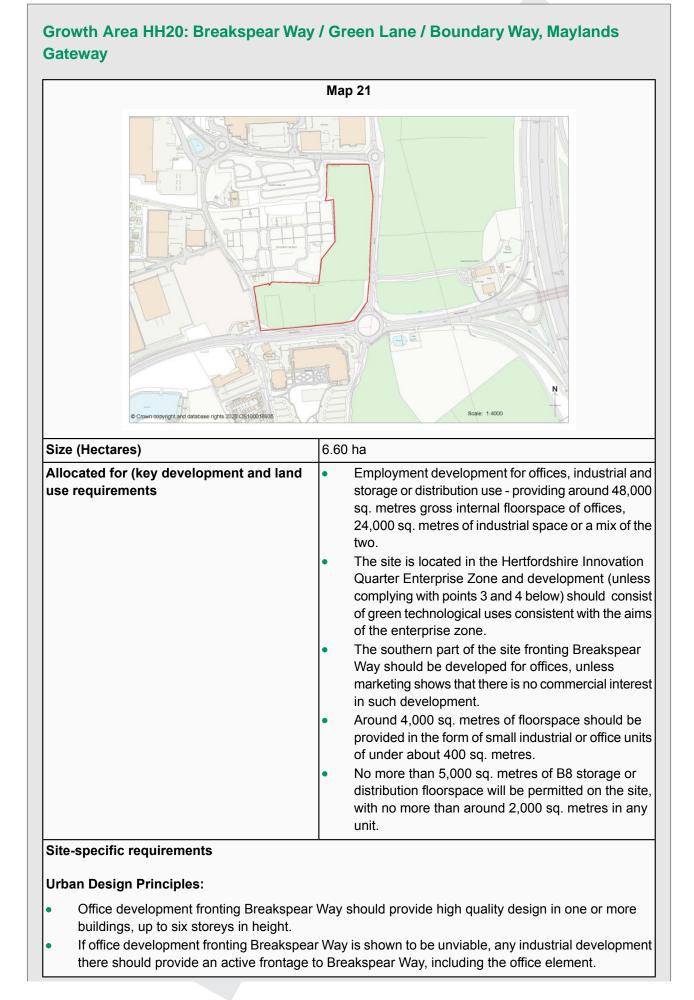

Crown copyright and database rights 2020 CS 100018935	Martineomoustice Martineomoustice Notestice State: 11000

Undertake ground contamination surveys a lood Risk and Drainage:	and ensure that the site is safe for its intended use.
ioou misk and brainaye.	to the recommendations of the Level 2 Strategic Floor

Access, Highways and Sustainable Transport:

- Access is to be provided from Green Lane
- Pedestrian/cycle access is also to be provided from Buncefield Lane and Boundary Way.

Environmental Health:

- Undertake ground contamination surveys and ensure the site is safe for its intended use
- Investigate possible noise issues from neighbouring employment sites and main roads adjacent and, where necessary, identify appropriate mitigation measures to address any adverse impacts.
- Development of the northern half of the site will need to have regard to the requirements of the consultation zone for Buncefield.

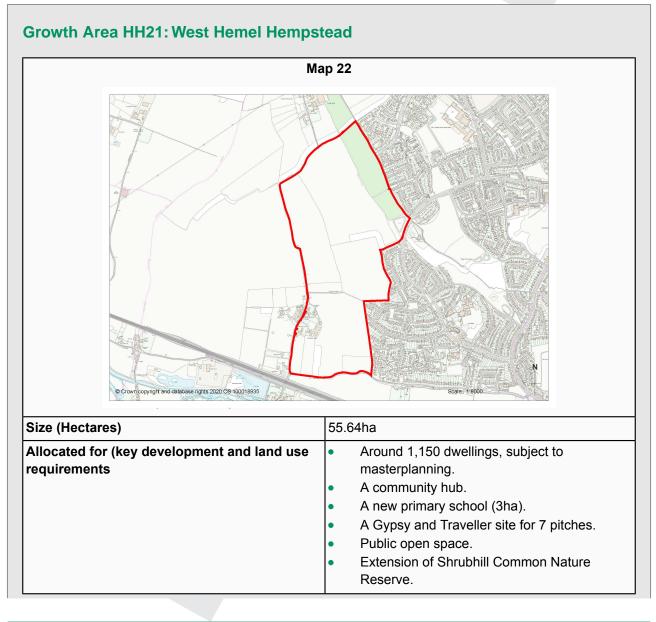

Landscape considerations:

 Using indigenous species, incorporate screening between the site and the adjacent cemetery, so as to not cause any visual harm.

Historic, Environment and Cultural Heritage:

• Archaeological investigations are required prior to a planning application

Rest of Hemel Hempstead Allocations

Site-specific requirements

Development of up to 1,100 homes to be delivered in accordance with hybrid permission (REF: 4/03266/18/MFA), unless material considerations indicate otherwise.

Urban Design Principles:

- Optimise the potential for views across the Bulbourne valley.
- Limit buildings to two storeys normally.
- Design the development to the highest sustainability standards possible.
- Take the character of buildings in the Chilterns area as a guide to high quality attractive design.
- Use traditional materials, such as red brick, clay tiles and timber boarding, where feasible.
- Arrange buildings and routes to achieve natural surveillance, good pedestrian access to facilities and an attractive relationship to open spaces.
- Design, layout and landscaping to mitigate the impacts on the archaeological, heritage and ecological assets within and adjoining the site and safeguard those adjoining the development.

Access, Highways and sustainable Transport:

- Primary access from Long Chaulden and The Avenue.
- Accommodate a bus route within the new neighbourhood.
- Provide pleasant footpath and cycle access through the site to link with Chiltern Way, Hertfordshire Way, the Grand Union Canal and the Chilterns AONB.
- Plan good pedestrian and cycle access between neighbourhoods and to key services, such as bus stops and community facilities.

Social and Community:

- Provide public spaces in different parts of the development.
- Provide a central focus with a "community square", hall, shop and other commercial spaces, linked to a bus service.
- Locate the new 2 form entry primary school at the centre.
- Design and manage the open space for clear, identifiable purposes.
- Use open space to define different parts of the neighbourhood and help distinguish it from Chaulden.
- Arrange the open space to ensure a pleasant, coherent and wildlife-friendly networks throughout the neighbourhood.
- Ensure that the layout and design of new sports provision is fit for purpose.
- Support the enlargement of the Parkwood doctors' surgery (either financially or within the new neighbourhood).

Environmental Health:

• Protect groundwater from pollution.

Landscape Considerations:

- Soften views of housing from the countryside by use of tree planting, by retaining appropriate tree belts and by siting open space carefully (particularly for views from Little Heath and Westbrook Hay).
- Provide a soft edge to the countryside and ensure visual and physical separation from Potten End and Winkwell.
- New strategic landscaping should mitigate the impact on the Bulbourne Valley.

Biodiversity and Green Infrastructure:

- Retain hedgerows and trees.
- Use native species in planting schemes.
- Development will need to have regard to the Tree Perseveration Orders located both within and on the edge of the development area.

Historic Environment and Cultural Heritage:

- Protect the amenities and character of Pouchen End hamlet.
- Protect the character of the listed Pouchen End Hall, which is in close proximity to the site.

Size (Hectares)	19.15ha
Allocated for (key development and land use requirements	 Around 385 new homes subject to Masterplanning. A Gypsy and Traveller site for 5 pitches. Public open space.

Site-specific requirements

Urban Design Principles:

 Development should normally be two storeys in height, except where a higher element would create interest and focal points in the street scene and is appropriate in terms of topography and visual impact.

Access, Highways and Sustainable Transport:

- Primary access is to be provided from the Link Road (A4147)
- Plan good pedestrian and cycle access to Henry Wells Square and to key services, such as bus stops and community facilities.
- Gypsy and Traveller pitches should have good access to the primary road network.

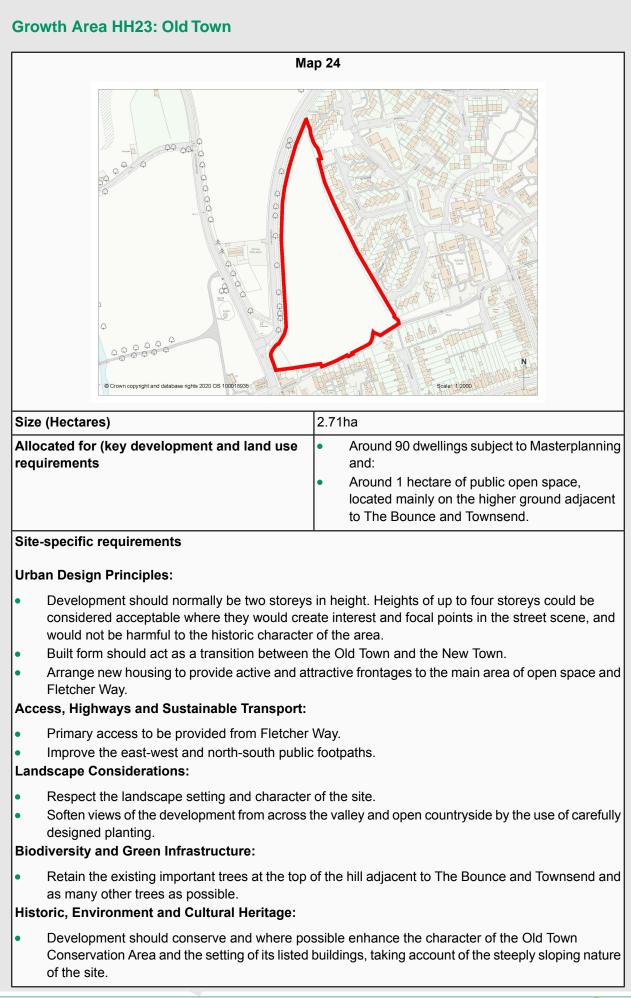

Social and community:

• Enlarge Margaret Lloyd Park; arrange the open space to ensure a pleasant, coherent and wildlife-friendly network linking to Hunting Gate Wood and Howe Grove.

Landscape Considerations:

- Soften views of housing from the countryside by use of planting, by retaining appropriate hedges and by siting open space carefully.
- Provide a soft edge to the countryside to ensure visual and physical separation form Piccotts End. **Flood Risk and Drainage:**
- Incorporate a sustainable drainage system throughout the site including the use of green space as a basin.

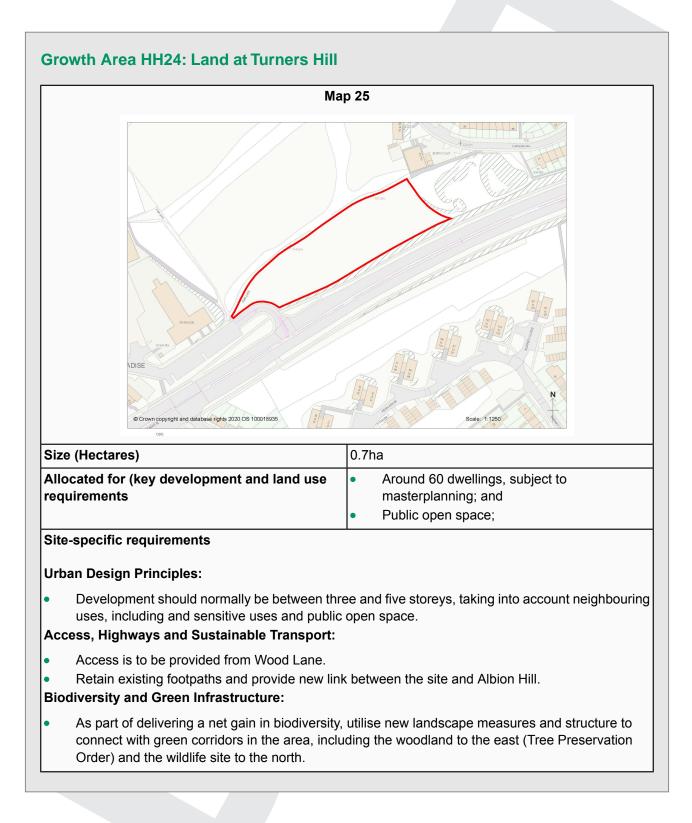

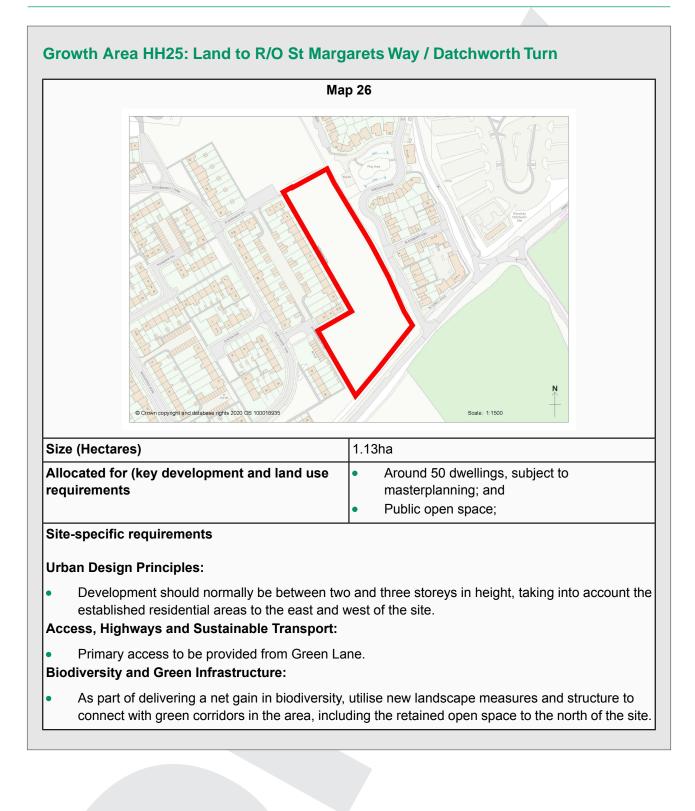

Flood Risk and Drainage:

 Incorporate a sustainable drainage system throughout the site including the use of green space as a basin.

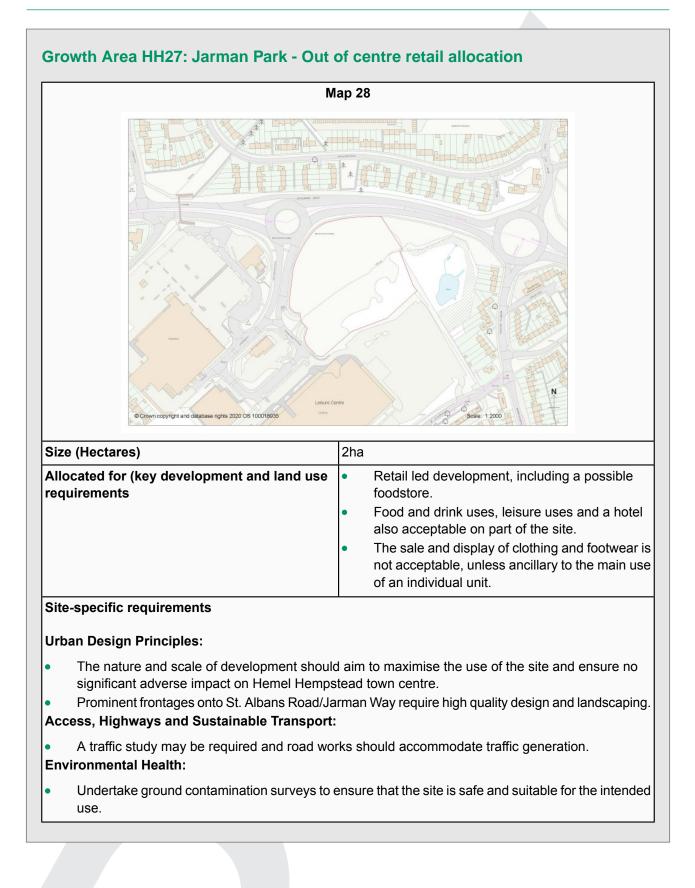

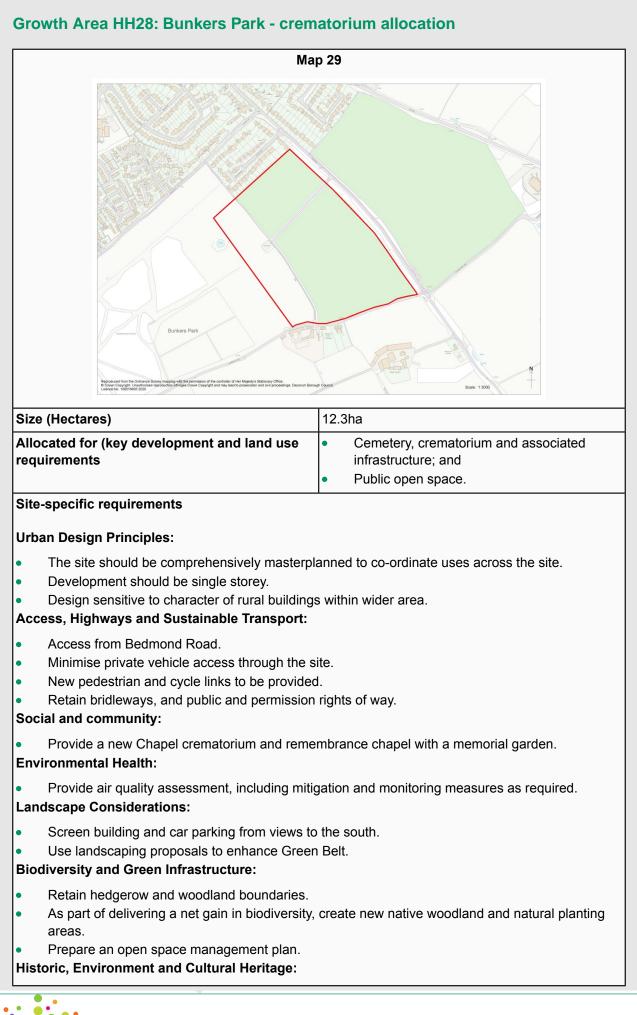

• Protect listed buildings on Bunkers Lane from impact of development. **Flood risk and Drainage:**

•

Incorporate a sustainable drainage system throughout the site including the use of detention pond.

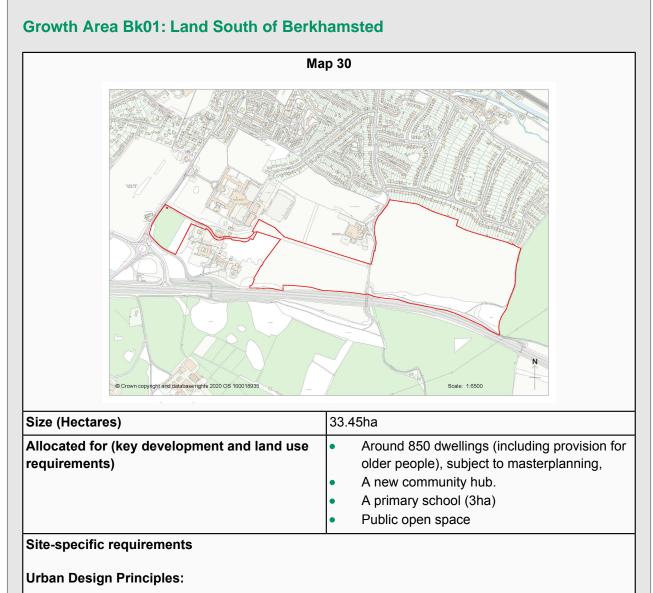

BERKHAMSTED PROPOSALS AND SITES

Berkhamsted

Berkhamsted Allocations

- The site will be brought forward with a masterplan showing a comprehensive phasing programme for development.
- Design codes will be developed alongside the preparation of any outline planning application and agreed by means of condition.

Access, Highways, and Sustainable Transport:

- Primary highway access to be provided via Chesham Road with secondary access from Swing Gate Lane.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along Chesham Road, A416/Shootersway and A4251/Berkhamsted High Street.

Social and Community:

- The new community hub should include new community facilities, including a retail unit to serve the day-to-day needs of new and existing residents.
- Provide three hectares of land for and deliver a new primary school.

Environmental Health:

- Investigate potential noise, air and light pollution impacts arising from the A41 and identify mitigation measures as necessary.
- Adopt basic radon protective measures.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

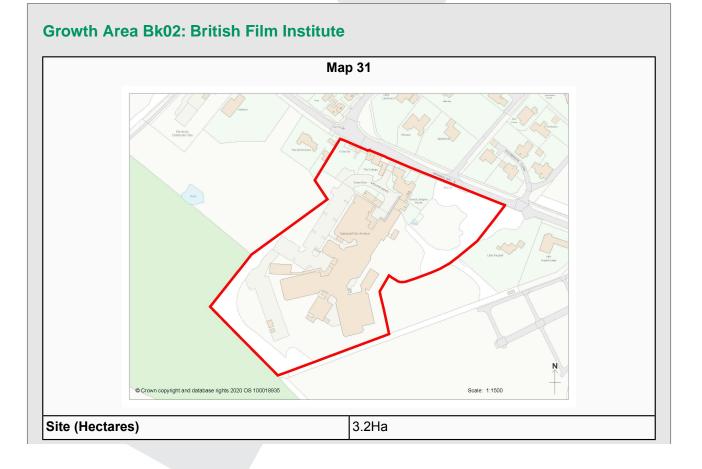

- the prominent landform and intervisibility with the opposing rural valley sides with particular attention to any views from or toward the Chilterns AONB;
- the setting of and views from Ashlyns Hall Grade II* listed building;
- the existing level of vegetative screening;
- road noise from the A41 and views of pylons which have a detrimental influence on perception; and
- the degraded pattern and structure opportunities to restore historic boundaries or connections.

Biodiversity and Green Infrastructure:

- As part of delivering a net gain in biodiversity, retain and enhance the designated wildlife site in the south-eastern corner of the site.
- Deliver Suitable Alternative Natural Greenspace (SANG) on-site to offset potential adverse effects on the Chilterns Beechwoods SAC arising from recreational pressure. The scale and form of this SANG will need to be agreed with Natural England in advance of the submission of an outline planning application.

Historic Environment and Cultural Heritage:

- Development must conserve and where possible enhance the setting of a number of listed buildings in the area, including Ashlyns School, the Stables at Ashlyns Hall, and Ashlyns Hall.
- Archaeological investigations required to be undertaken.

Allocated for (key development and land use	•
requirements)	

Around 90 dwellings, subject to masterplanning. Public open space.

Site-specific requirements

Urban Design Principles:

- Provide a network of new pedestrian links with adjacent allocations.
- Public open space should be designed in a manner that is easily accessible to existing communities in the area.

Access, Highways, and Sustainable Transport:

- Access to be provided via Kingshill Way. If the existing access is insufficient for vehicular use due to heritage constraints, alternative vehicular access should be provided to the east.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along A416/Kingshill Way, Kings Road, Shootersway and A4251/Berkhamsted High Street.

Environmental Health:

 Investigate potential noise, air and light pollution impacts arising from the A41 and identify appropriate mitigation measures as necessary.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the quality of design, use of materials, scale, pattern and the response to the existing development fronting onto Kingsway Hill;
- making appropriate and sympathetic design responses to the listed building and its setting; and
- The strong boundaries and edges of the parcel which help to create a visual separation between the development of Berkhamsted from the wider landscape notably a defensible edge toward the A41.

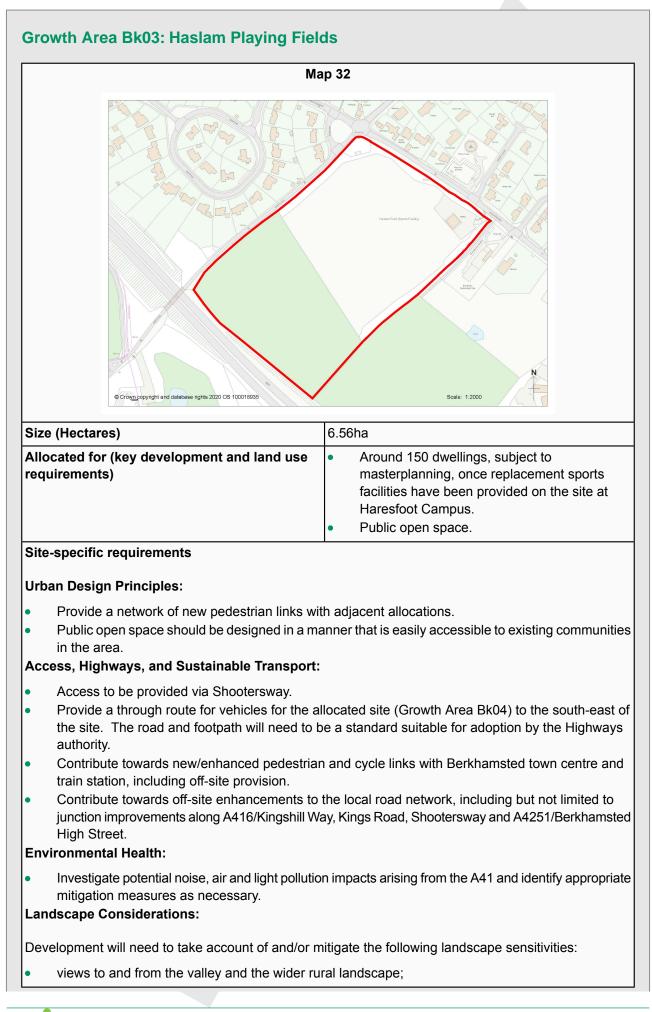

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, deliver new green corridors on site which connect with proposed new wildlife corridors to the south of the site, along the A41.

Historic Environment and Cultural Heritage:

- Conserve and enhance the setting of the Grade II listed Granary at Ernest Lindgreen House, located on the northern edge of the site.
- Archaeological investigations required to be undertaken.

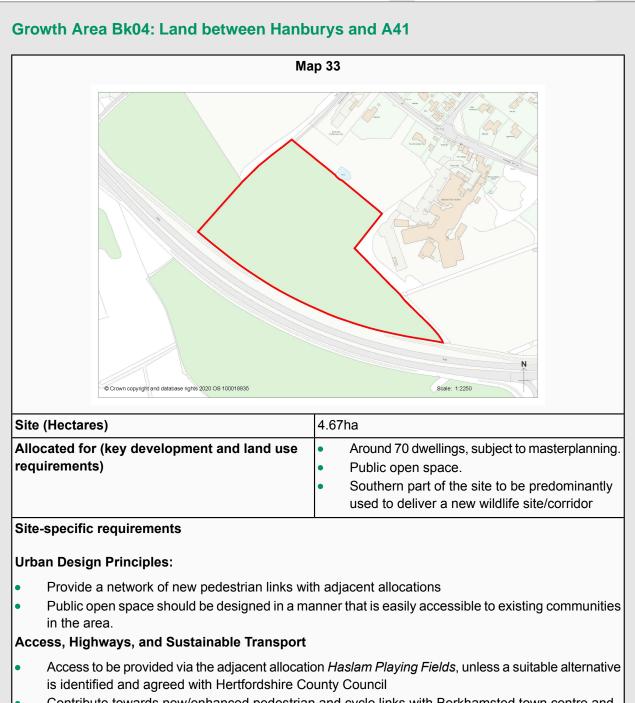

- the existing development pattern of Berkhamsted;
- the screening of the A41; and
- the connection with Shootersway Playing Field.

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, deliver a new wildlife site on the southern parcel of the site which links into the adjacent network.

- Contribute towards new/enhanced pedestrian and cycle links with Berkhamsted town centre and train station, including off-site provision.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along A416/Kingshill Way, Kings Road, Shootersway and A4251/Berkhamsted High Street.

Environmental Health:

 Investigate potential noise, air and light pollution impacts arising from the A41 and identify appropriate mitigation measures as necessary.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- views to and from the valley and the wider rural landscape;
- the existing development pattern of Berkhamsted; and
- screening of the A41.

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, deliver a new wildlife site on the southern parcel of the site which links into the adjacent network.

Growth Area Bk05: Blegberry Gardens (land adjacent to)

3.5ha
se • Around 80 dwellings, subject to
masterplanning,
Public open space
1:

Site-specific requirements

Urban Design Principles:

 Public open space should be designed in a manner that is easily accessible to existing communities in the area.

Access, Highways, and Sustainable Transport

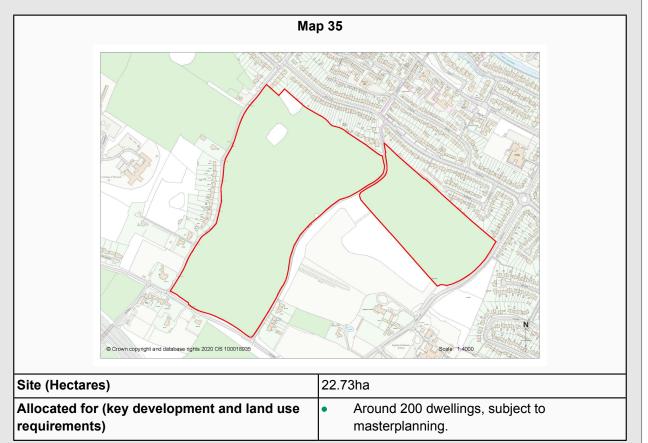

- Access to be provided from Shootersway.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along A416/Kingshill Way, Kings Road, Shootersway and A4251/Berkhamsted High Street.

Environmental Health: Investigate potential noise, air and light pollution impacts arising from the A41 and identify appropriate mitigation measures as necessary. Undertake contaminated land investigations to ensure that the land is safe and suitable for the intended use. Landscape Considerations: Development will need to take account of and/or mitigate the following landscape sensitivities: Views from the wider rural landscape; primarily south of the A41 with improvements to the southern boundary; screening of the A41; and maintaining or improving characterful boundaries to integrate and contain the development. **Biodiversity and Green Infrastructure:** Ensure new opportunities link with existing corridors in the vicinity of the site, including the Local Wildlife Site to the north-west. **Historic Environment and Cultural Heritage:** Archaeological investigations required to be undertaken. Flood Risk and Drainage: Surface water run-off rates as a result of development of the site should not exceed existing

Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.

•	Provide land to deliver a new secondary school.
•	A new public park.

Site-specific requirements

Urban Design Principles:

• The site will be brought forward with a masterplan showing a comprehensive phasing programme for development.

Access, Highways, and Sustainable Transport

- Primary highway access to be provided from Shootersway
- Contributions to be made towards improving the local road network, including along Shootersway and Kings Road/A416.

Social and Community:

• Provide land for, and contribute towards a new secondary school to be located towards the north of the site with access provided from Darrs Lane or alternatively from within the site.

Environmental Health:

• Undertake contaminated land investigations to ensure that the land is safe and suitable for the intended use.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the intervisibility across the valley and toward the AONB;
- views into urban areas of Berkhamsted;
- surrounding vegetated and embankment boundaries;
- connections to the surrounding rural landscape including the Scheduled Monument and its setting and the ancient woodland to the south; and
- the culturally and visually interesting copse of trees.

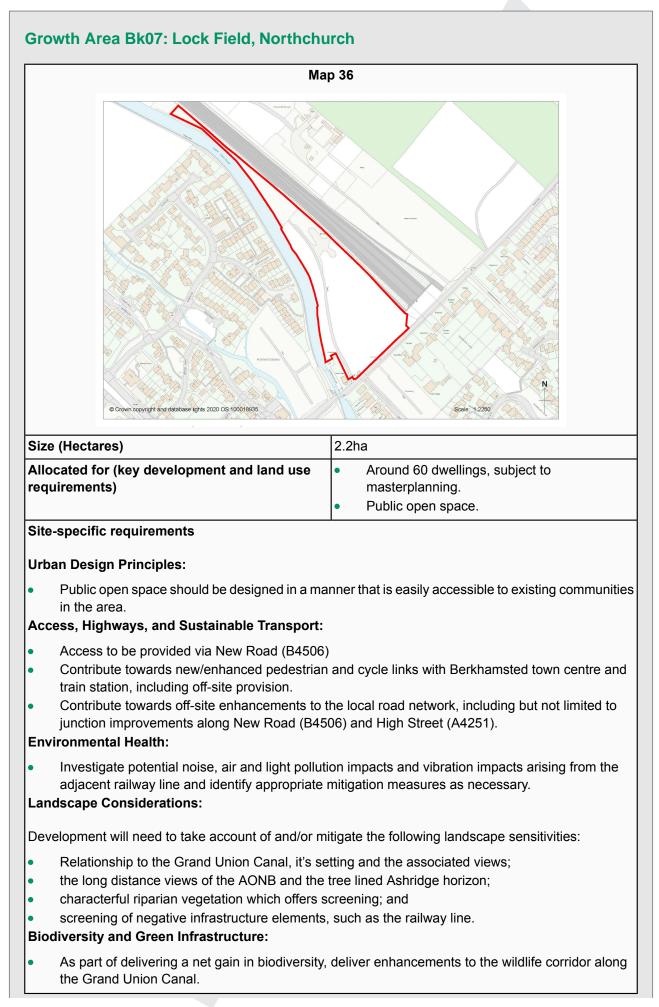

Biodiversity and Green Infrastructure:

Deliver a new public park to serve the needs of existing and future communities in the area. This
public park should be located on land between Bell Lane and Durrants Lane, and deliver Suitable
Alternative Natural Greenspace (SANG) to offset recreational impacts on the Chiltern Beechwoods
SAC. The scale and form of this SANG will need to be agreed with Natural England and the National
Trust (Ashridge Estate) in advance of the submission of an outline planning application

Historic Environment and Cultural Heritage:

- Archaeological investigations required to be undertaken.
- Conserve and enhance the route of Grims Ditch through the site. This land should remain undeveloped and an appropriate buffer maintained.
- Conserve and enhance the setting of the Grade II listed Old Cottage opposite Darrs Lane.

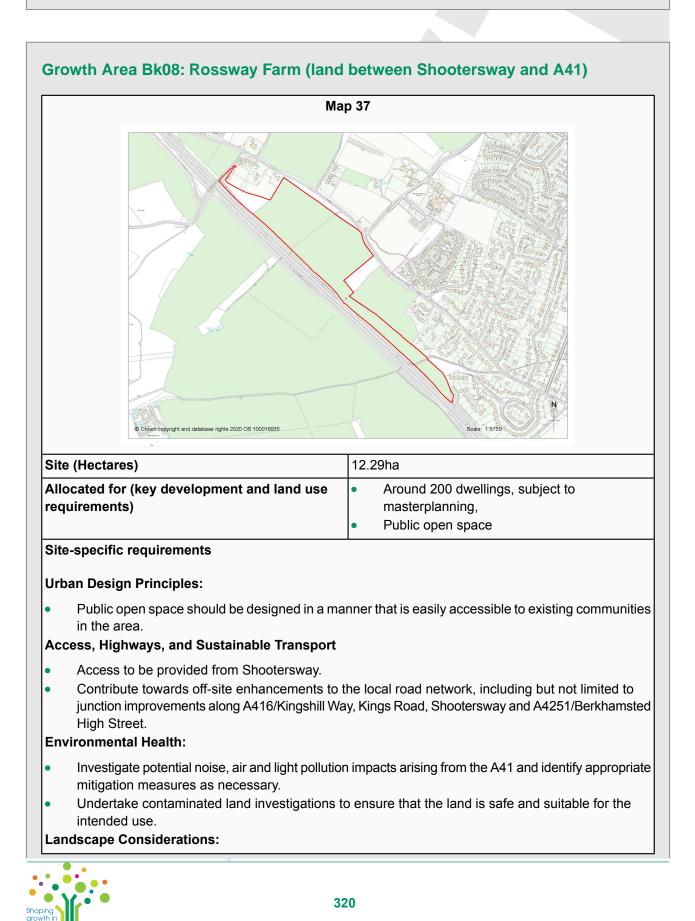

Flood Risk and Drainage:

- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the influence of adjoing development on Growth Area Bk05 which will define the relationship of the site with the existing development pattern;
- the existing hedgerows and boundary vegetation;
- the existing development pattern, mainly in the south-east of the parcel;
- the woodland blocks within and adjacent to the parcel;
- screening and views of the A41; and
- the intervisibility with the wider valley to the west of the parcel.

Biodiversity and Green Infrastructure:

- Ensure new opportunities link with existing corridors in the vicinity of the site, including the Local Wildlife Site to the north-west.
- As part of delivering a net gain in biodiversity, deliver a new wildlife corridor on site which connect with proposed new wildlife corridors to the south-east of the site, along the A41.

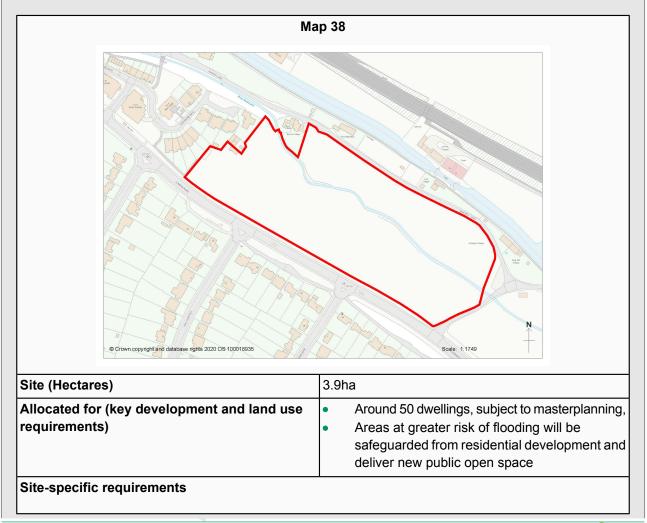

Historic Environment and Cultural Heritage:

• Archaeological investigations required to be undertaken.

Flood Risk and Drainage:

 Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.

Growth Area Bk09: Bank Mill Lane

Urban Design Principles:

• Public open space should be designed in a manner that is easily accessible to existing communities in the area.

Access, Highways, and Sustainable Transport

- Access to be provided from London Road.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along the A4251/London Road/High Street.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the strong vegetated boundaries which create a sense of isolation and clear delineation of the parcel from development along the northern and southern edges;
- the relationship with the wider agricultural and valley floor landscape;
- the intimate scale of the parcel and intact historic structure;
- the key characteristics of Berkhamsted Conservation Area, primarily the setting of the Grand Union Canal; and
- views into the parcel from the surrounding valley.

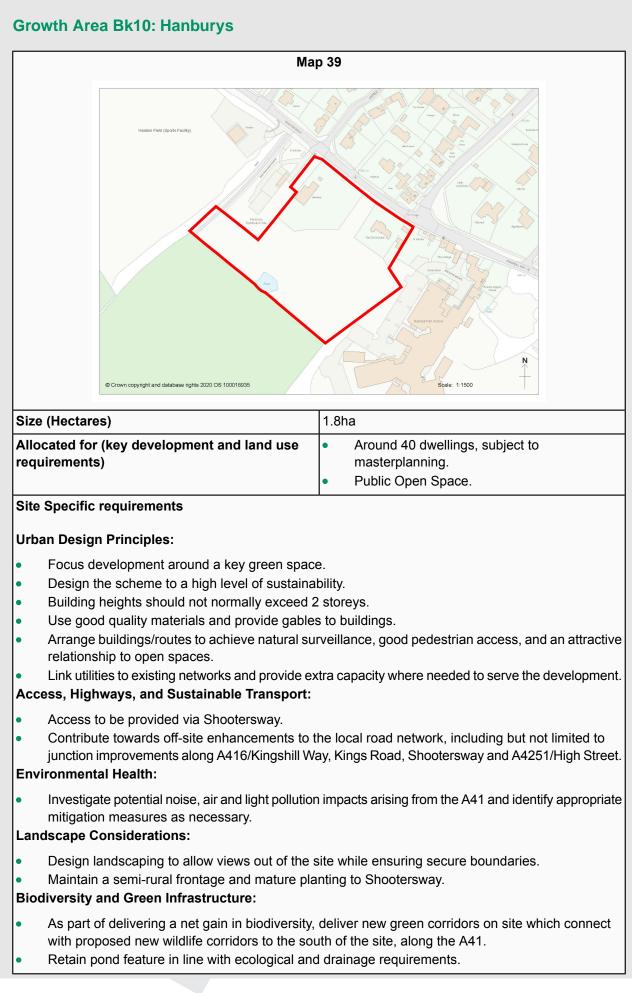

Biodiversity and Green Infrastructure:

- As part of delivering a net gain in biodiversity, enhance the wildlife corridor along the River Bulbourne. **Historic Environment and Cultural Heritage:**
- Archaeological investigations required to be undertaken.

Flood Risk and Drainage:

- No built development should take place within Flood Zones 2 and 3.
- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

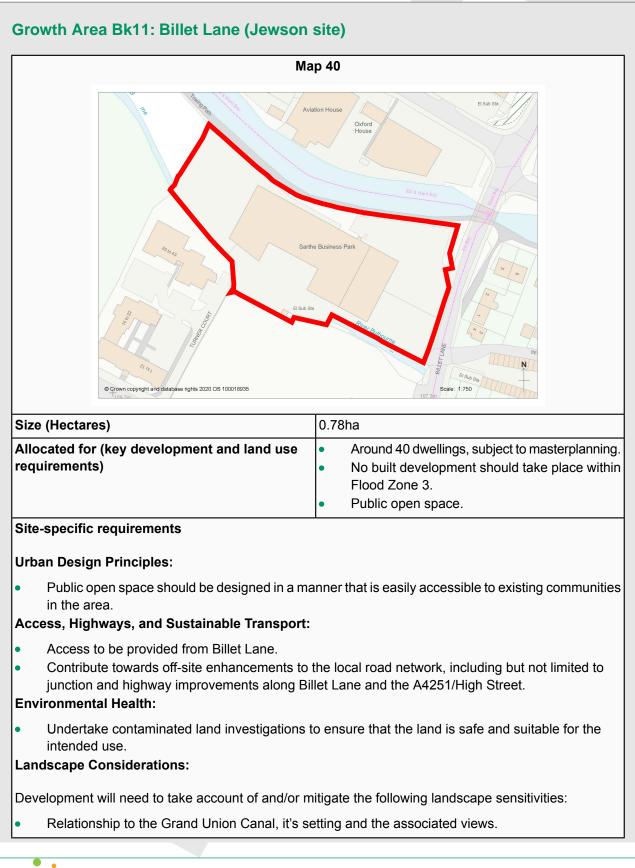

Flood Risk and Drainage:

• Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.

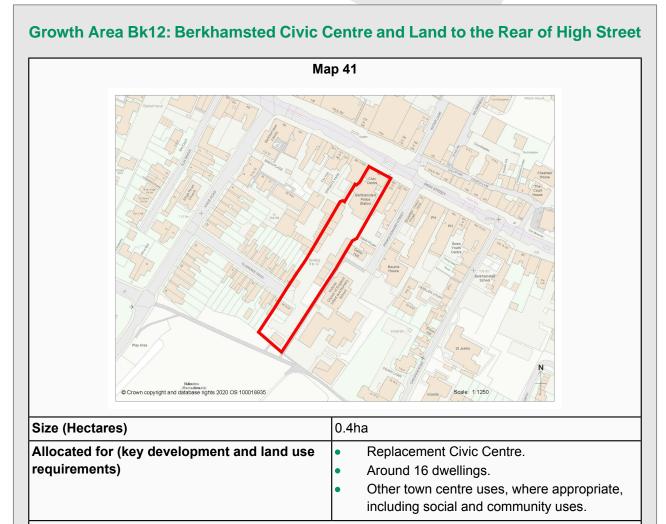

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, deliver enhancements to the wildlife corridor along the Grand Union Canal.

Flood Risk and Drainage:

- No built development should take place within Flood Zone 3. More vulnerable development may be acceptable in areas of Flood Zones 2, subject to the outcomes of the site specific Flood Risk Assessment.
- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Site-specific requirements

Urban Design Principles:

• Building heights should normally be two storey. Taller buildings are acceptable where they front onto the High Street.

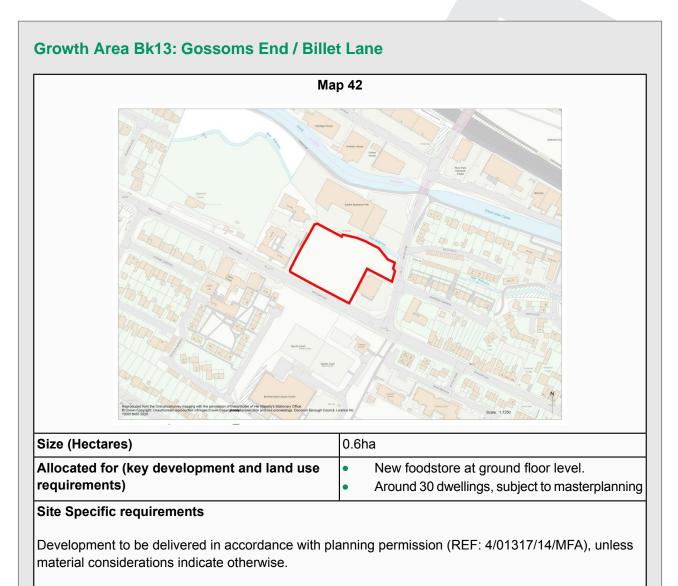

Access, Highways, and Sustainable Transport:

- Access to be provided from Clarence Road
- Historic Environment and Cultural Heritage:

•

- Retain existing building façade on to High Street.
- Conserve and where possible enhance the special characteristics of Berkhamsted Conservation Area.

Urban Design Principles:

- High density houses or flats acceptable.
- Access, Highways, and Sustainable Transport:
- Primary access to be provided from Gozzoms End and secondary access from Billet Lane.
- Landscape Considerations:
- Sensitive relationship of buildings to the River Bulbourne required.

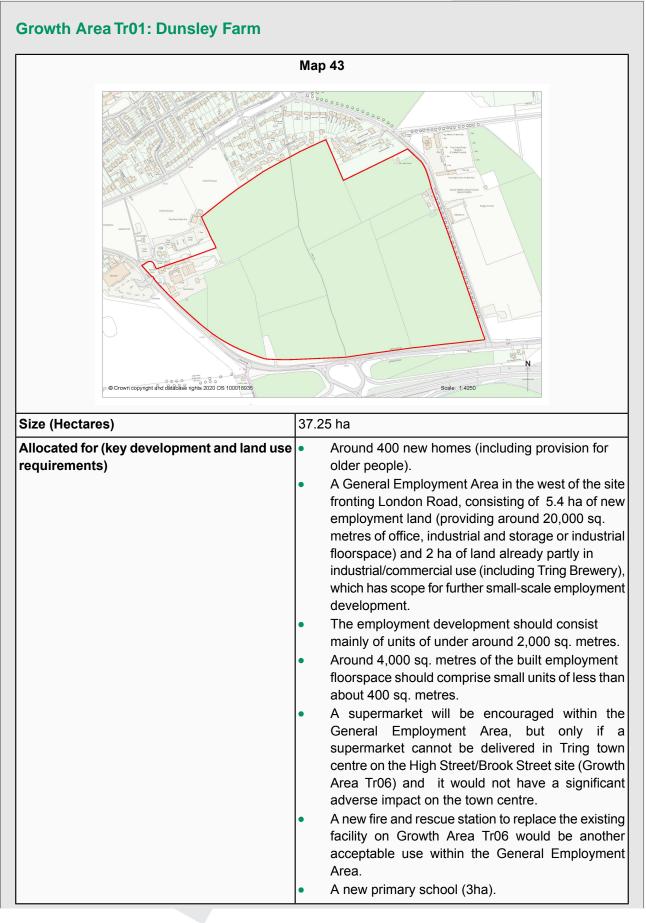

TRING PROPOSALS AND SITES

Tring

Tring Allocations

Site-specific requirements

Urban Design Principles:

• Design codes/masterplans will be developed alongside the preparation of any outline planning application and agreed by means of condition.

Access, Highways and Sustainable Transport:

- Vehicular access to be provided via London Road and Cow Lane. Primary access to employment site to be provided separately via London Road.
- Provision and/or contributions towards new/enhanced pedestrian and cycle links with Tring town centre and Tring station.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along Chesham Road, A416/Shootersway and A4251/Berkhamsted High Street.

Social and community:

• Provide three hectares of land for and deliver a new 2FE primary school.

Environmental Health:

• Investigate potential noise, air and light pollution impacts arising from the A41 and A4251 and identify appropriate mitigation measures as necessary.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- relationship and views from and toward the Chilterns AONB surrounding the parcel and important views such as from the lvinghoe Beacon;
- the relationship to the development pattern of Tring to the north and the sports facilities and light industrial yard to the west;
- the localised intervisibility with the open landscape and fields;
- urbanising influences of the A41 and London Road;
- the setting of the historic designed landscape of Tring Park, a grade II Registered Historic Park and Garden adjacent to the south-western boundary of the parcel;
- the existing and historic field boundary pattern; and
- the recreational value of the PRoW.

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, investigate the existing Local Wildlife Site – Cow Lane Farm Meadows for its existing and future potential as a strategic wildlife corridor.

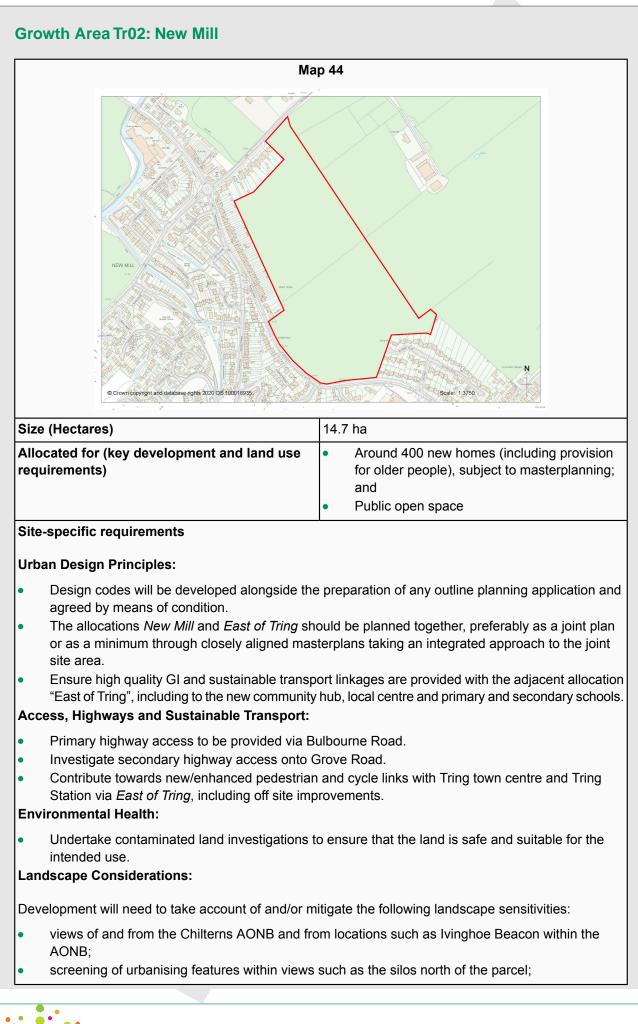

Historic, Environment and Cultural Heritage:

• Ensure development of the site protects and where possible enhances the setting of nearby heritage assets, including Tring Park (Registered Park and Garden), Pendley Manor, Dunsley Bungalow and its associated cartshed and piggery, and Cow Lane Lodge to Pendley Manor (all Grade II listed).

Flood risk and Drainage:

- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

- the established vegetated buffers surrounding the parcel; and
- the existing development pattern along Grove Road and Netherby Close.

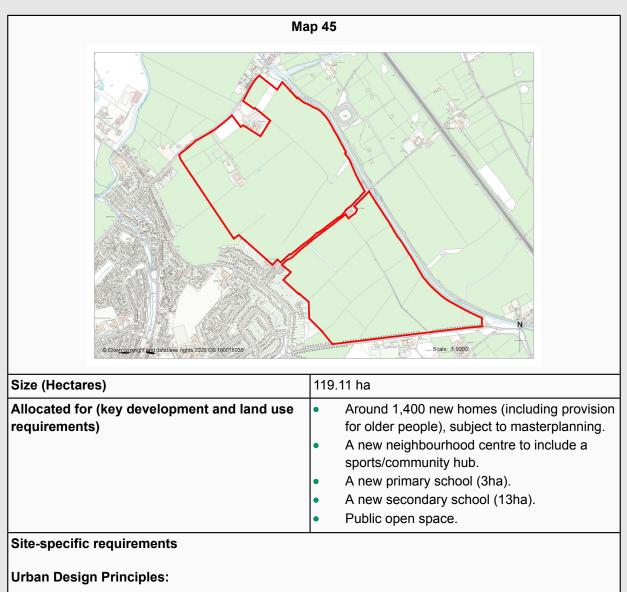

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, utilise new landscape mitigation measures and structure to develop new green infrastructure corridors and connect with other corridors in the area, including those proposed at *East of Tring*, such as the community hub spine.

Flood risk and Drainage:

 Flood Risk Assessment will need to address and where necessary mitigate a higher risk of ground water flooding on this site.

Growth Area Tr03: East of Tring

- Design codes will be developed alongside the preparation of any outline planning application and agreed by means of condition.
- The site will be brought forward with a masterplan showing a comprehensive phasing programme for development to be prepared in consort with the local planning authority.

- The allocations Tr03 East of Tring and Tr02 New Mill should be planned together, preferably as a
 joint plan or as a minimum through closely aligned masterplans taking an integrated approach to
 the joint site area.
- Ensure high quality green and blue infrastructure and sustainable transport linkages are provided with the adjacent allocation Tr02, including to the new community hub, local centre and primary and secondary schools.

Access, Highways and Sustainable Transport:

- Main vehicular access from Station Road and Bulbourne Road.
- A new link road (30mph) to be provided connecting Bulbourne road and Station Road.
- Provision and/or contributions to new/enhanced pedestrian and cycle links with Tring town centre and Tring Station, including off-site provision.
- Contribute towards off-site enhancements to the local road network, including but not limited to junction improvements along Bulbourne Road, Station Road, Cow Lane and London Road.

Social and community:

- The new neigbourhood centre should include new community facilities and a small parade of shops to serve the day-to-day needs of new and existing residents.
- Provide three hectares of land for and contribute towards the delivery of a new 3FE primary school and associated playing fields.
- Provide 13 hectares of land for and contribute towards the delivery of a new 6FE secondary school and associated playing fields.
- Deliver a new sports hub to serve existing and future residents of Tring and the surrounding area. **Environmental Health:**
- Consideration should be given to Controlled Waters as a receptor to potential ground contamination.
- Undertake contaminated land investigations to ensure that the land is safe and suitable for the intended use.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the intervisibility with the wider landscape due to the elevated areas of the Chilterns AONB; namely
 prominent locations such as the Ridgeway National Trail, Ivinghoe Beacon and associated downland
 and chalk grassland, areas south of the parcel and along the AONB boundary;
- the historic field pattern; areas of complex topography with associated higher levels of intervisibility;
- well established internal and external hedgerows;
- a strong scenic quality from the agricultural landscape and enclosure of the parcel;
- the intact nature of areas of the parcel with few external influences; and
- tree lined skylines;

Biodiversity and Green Infrastructure:

- As part of delivering a net gain in biodiversity, create a new linear park along the entire north-eastern boundary of the site, to create a new green infrastructure and biodiversity corridor that runs parallel to the Grand Union Canal.
- Create a new green corridor linking the new woodland area to the north east with the existing built-up area of Tring along Marchcroft Lane to the adjacent allocation "New Mill".

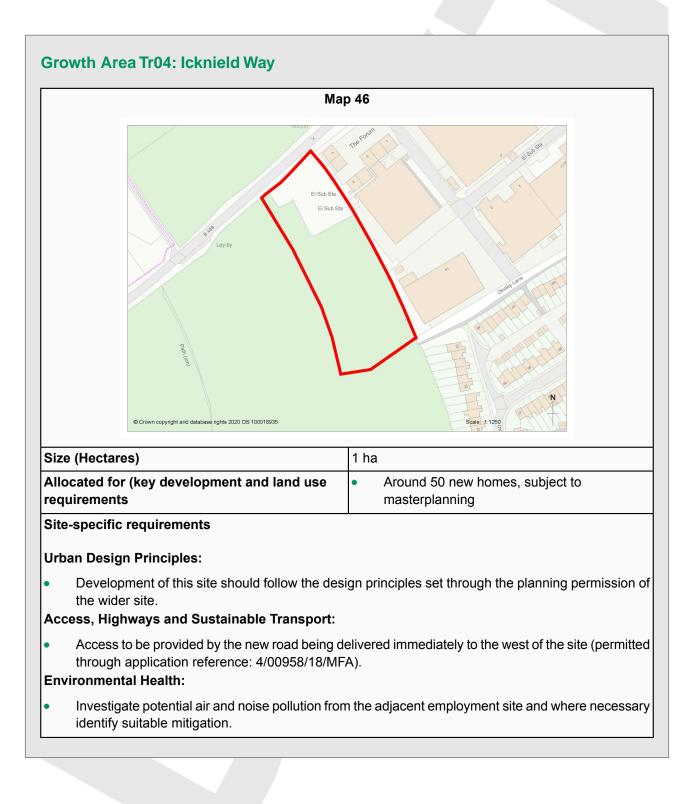

Historic, Environment and Cultural Heritage:

- Development must conserve and where possible enhance the setting of a number of heritage assets in the area, including Pendley Manor, its stable and lodge, the canal bridge at Marshcroft Lane (all Grade II), and Marchcroft Lane (roman road).
- Development of the site should respect the setting and separate identify of Bulbourne to the north, which contains a number of designated and non-designated heritage assets.
- Archaeological investigations required to be undertaken.

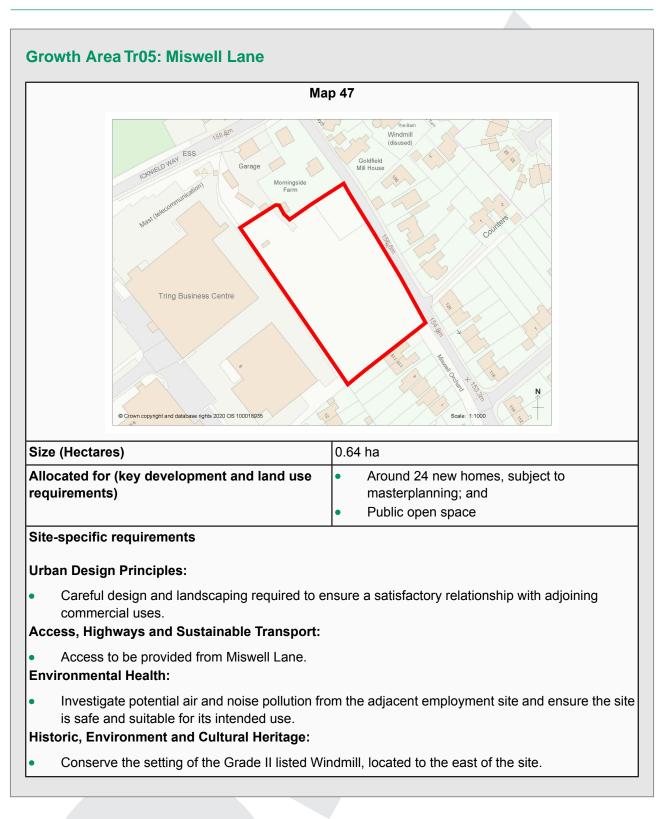

Flood risk and Drainage:

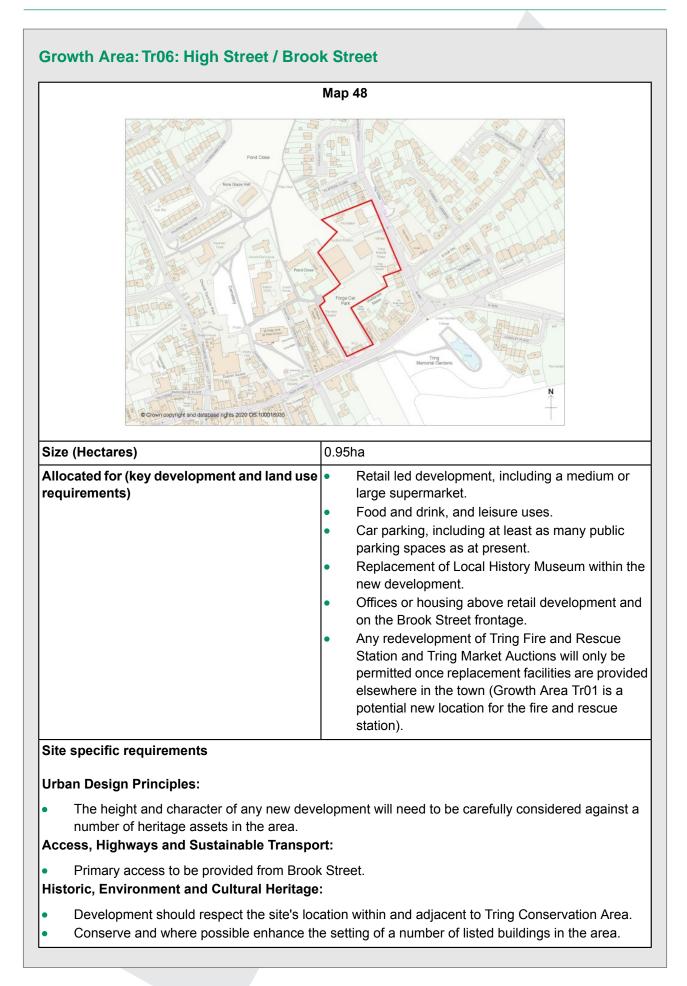

- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

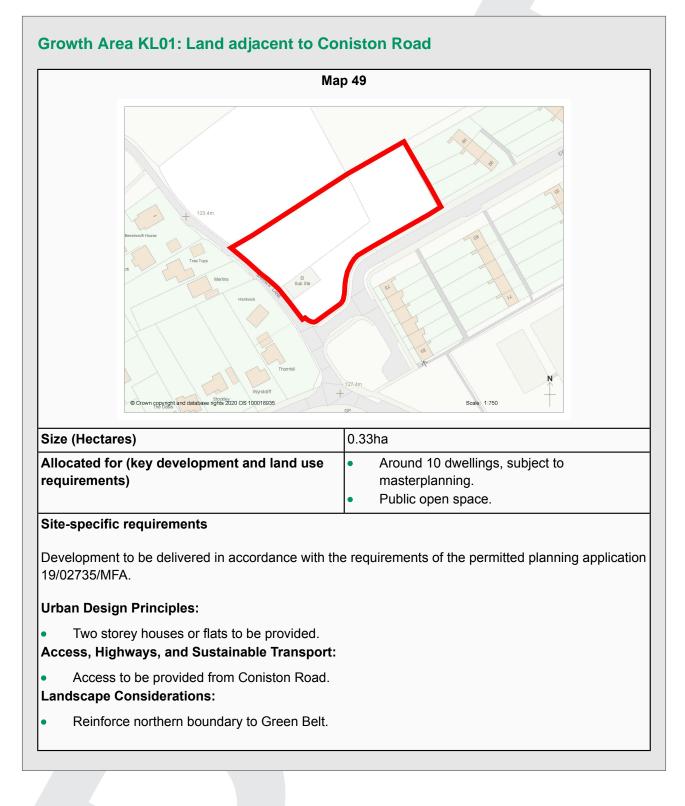

KINGS LANGLEY PROPOSALS AND SITES

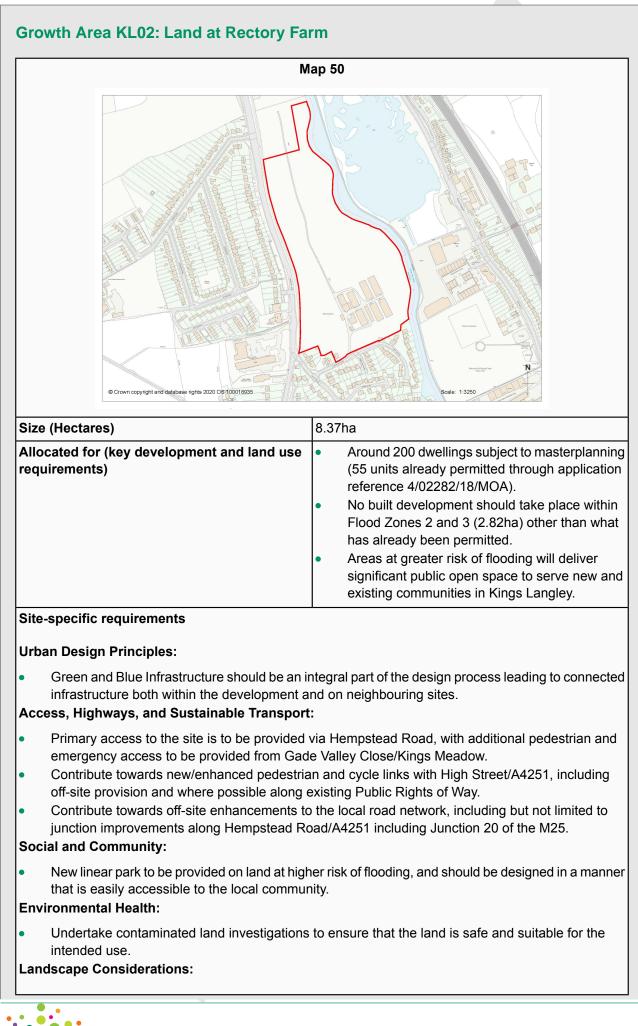

Kings Langley

Kings Langley Allocations

Development will need to take account of and/or mitigate the following landscape sensitivities:

- the connection with, and setting of, the Grand Union Canal and long distance trail;
- the existing or degraded vegetated boundaries and areas of untidy scrub;
- screening of the Hempstead Road and associated lighting;
- the fragmented landscape structure land uses within the parcel; and
- the characteristic rows of Lombardy poplar trees;

Biodiversity and Green Infrastructure:

- As part of delivering a net gain in biodiversity, deliver biodiversity enhancements along the River Bulbourne/ Grand Union Canal.
- Utilise the new landscape structure to connect with existing green corridors and spaces in the area.

Flood Risk and Drainage:

- No residential development should take place within Flood Zones 2 and 3.
- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

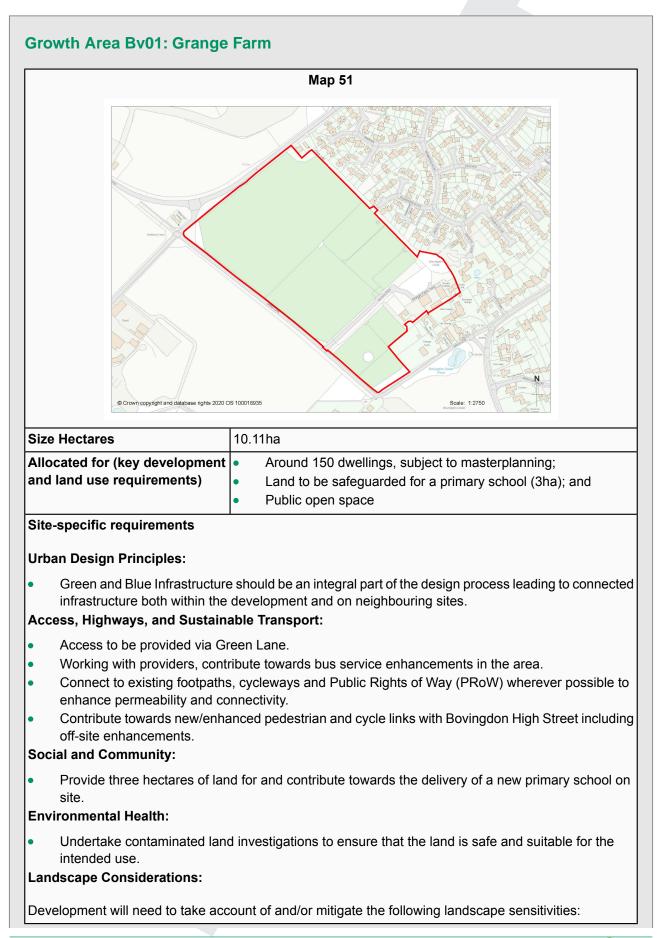

BOVINGDON PROPOSALS AND SITES

Bovingdon

Bovingdon Allocations

- the layout and historic orientation and development pattern of Bovingdon;
- existing hedgerows and screening; and
- vegetated skylines.

Biodiversity and Green Infrastructure:

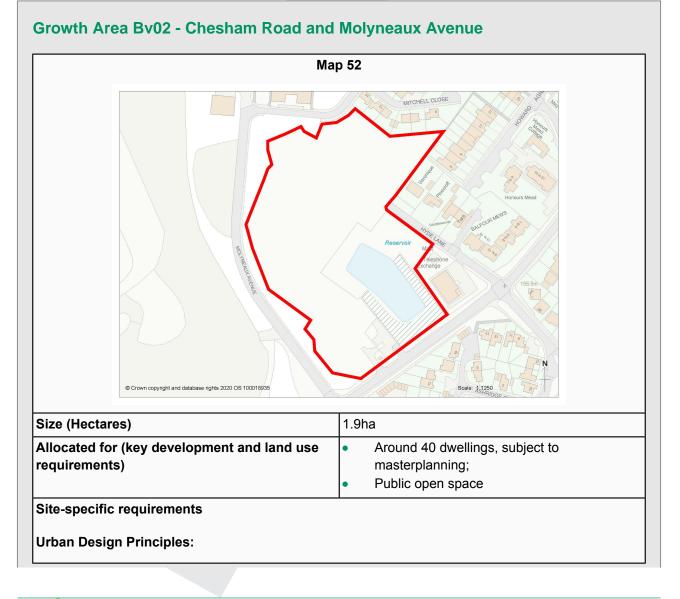

- As part of delivering a net gain in biodiversity, deliver biodiversity enhancements on site including through new SuDS measures.
- Ensure new opportunities link with existing corridors in the vicinity of the site, including the Local Wildlife Site to the south west.

Historic Environment and Cultural Heritage:

• Retain existing hedgerow on western corner of site to conserve the setting of the listed building White Hart Cottage (Grade II).

Flood Risk and Drainage:

- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

- Incorporate perimeter development with outward facing buildings, dual fronted properties will address corners providing surveillance over areas of open space.
- Limit buildings to two-storey given the height restriction associated with the air traffic control navigation beacon at Bovingdon Airfield.
- Potential for limited new vehicular crossovers to allow some direct access to properties facing Chesham Road.
- Layout, design, density and landscaping to relate well to existing housing, create a soft edge with the countryside and secure a strong long term Green Belt boundary.

Access, Highways, and Sustainable Transport:

- Access to be provided from Molyneaux Avenue, with pedestrian access from Chesham Road.
- Provide for cycle and pedestrian access to Hyde Lane and Lancaster Drive.
- Landscape Considerations:
- Ensure that development is well screened and that existing trees and hedges are retained where possible. Local species of trees and hedges to be introduced where needed.

Biodiversity and Green Infrastructure:

• As part of delivering a net gain in biodiversity, ensure new opportunities link with existing corridors in the vicinity of the site.

Flood Risk and Drainage:

- Ensure that drainage infrastructure associated with HMP The Mount and the adjacent holding reservoir for Bovingdon are maintained and where necessary, enhanced.
- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

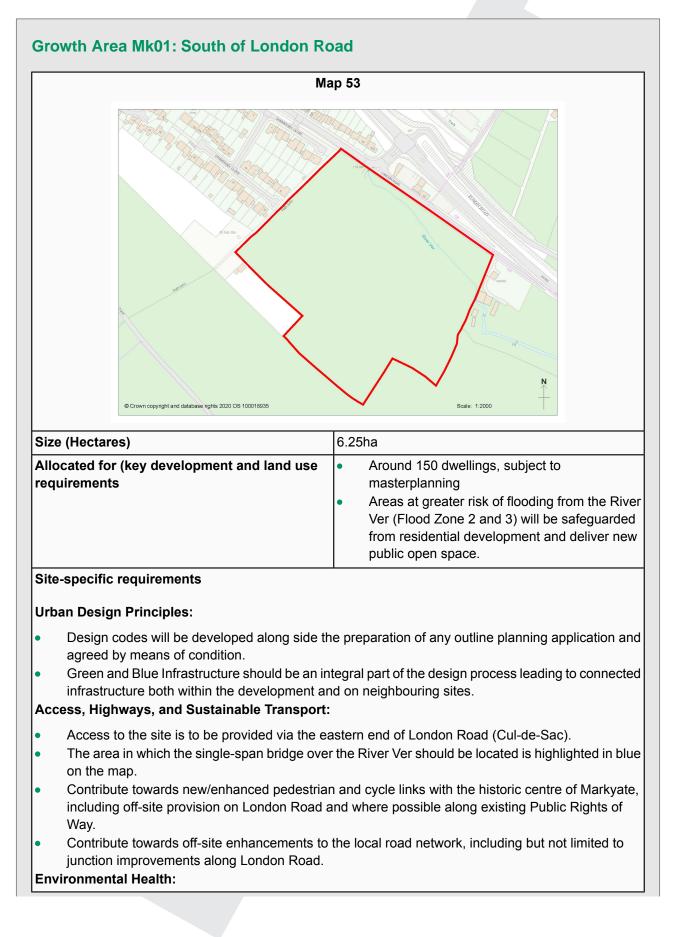

MARKYATE PROPOSALS AND SITES

Markyate

Markyate Allocations

Investigate potential noise, air and light pollution impacts arising from the A5183 and identify appropriate mitigation measures as necessary.

Landscape Considerations:

Development will need to take account of and/or mitigate the following landscape sensitivities:

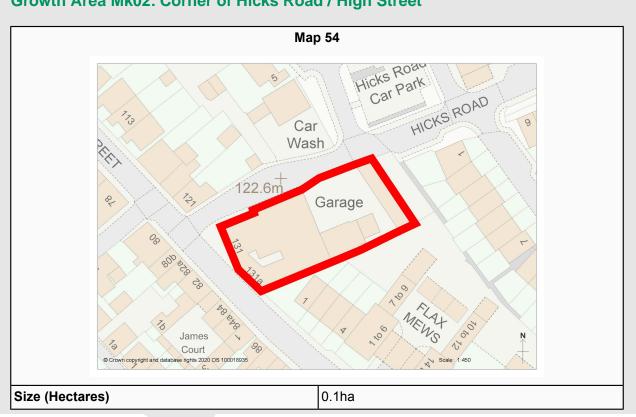

- the existing development pattern of Markyate; •
- screening of London Road and the transport corridors at the valley bottom; •
- visual connection to the wider rural landscape and the Chilterns AONB to the south; •
- landform which creates elevated points with higher levels of intervisibility across the valley; the • River Ver and the habitats around it; and
- screening of urbanising influences around the parcel along London Road.

Biodiversity and Green Infrastructure:

- As part of delivering a net gain in biodiversity, enhancements should focus along the River Ver. •
- Utilise the new landscape structure to connect with existing green corridors and spaces in the area.

Flood Risk and Drainage:

- No built development should take place within Flood Zones 2 and 3, with the exception of the access road and single span bridge.
- Where the provision of new highway infrastructure adversely affects areas of higher flood risk, compensatory flood alleviation measures will be required.
- Surface water run-off rates as a result of development of the site should not exceed existing Greenfield run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Growth Area Mk02: Corner of Hicks Road / High Street

Allocated for (key development and land use	
requirements	

Around 13 dwellings, subject to masterplanning

Site-specific requirements

Urban Design Principles:

Predominantly two storey houses or flats to be provided

Access, Highways, and Sustainable Transport:

• Highway access to the site is to be provided from Hicks Road

Environmental Health:

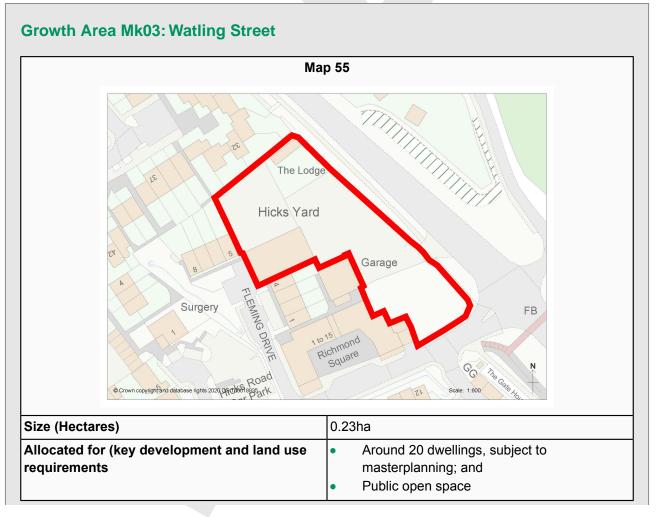

• Investigate potential noise and air pollution from the adjacent high street and identify appropriate mitigation measures as necessary.

Historic Environment and Cultural Heritage:

- Conserve and where possible enhance the setting of Markyate Conservation Area, and listed buildings in the vicinity of the site.
- 31 High Street is of heritage merit, and the possibility of retaining the building as an option should be explored.

Flood Risk and Drainage:

- Surface water run-off rates as a result of development of the site should not exceed existing run-off rates.Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

Site-specific requirements

Urban Design Principles:

• Explore opportunities for better integrating the site with the existing settlement.

Access, Highways, and Sustainable Transport:

- Highway access to the site is to be provided from Watling Street or from Hicks Road.
- New pedestrian links to be provided directly onto Hicks Road and/or via Fleming Drive.

Environmental Health:

• Investigate potential noise and air pollution from the adjacent A5183 and identify appropriate mitigation measures as necessary.

Flood Risk and Drainage:

- Surface water run-off rates as a result of development of the site should not exceed existing run-off rates. Measures which achieve this should be discussed and agreed with Hertfordshire County Council's ecologist, flood engineer and the Environment Agency.
- Any development will need to have regard to the recommendations of the Level 2 Strategic Flood Risk Assessment for this site.

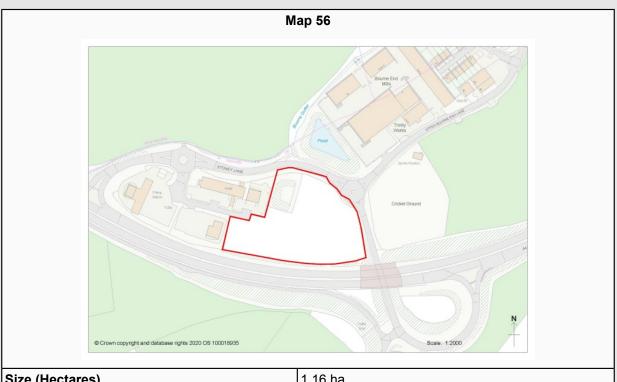

COUNTRYSIDE PROPOSALS AND SITES

Countryside

Allocations in the Countryside

Size (nectares)	1. 10 Ha
Allocated for (key development and Land use requirments)	 Employment development for office, industrial and storage or distribution use - providing around 4,400 sq. metres gross internal floorspace The development should consist of units under around 1,000 sq. metres gross internal floorspace, including some small units of less than about 400 sq. metres.

Site Specific requirements

Urban Design Principles:

• In accordance with Dacorum Strategic Design Guide SPD Part 3 Employment uses. Access, Highways, and Sustainable Transport:

• Access to be provided from the Upper Bourne End Lane/Stoney Lane roundabout. **Environmental Health:**

- Undertake ground contamination surveys and ensure that the site is safe for its intended use.
- Investigate possible noise issues from main road adjacent and where necessary, identify appropriate mitigation measures to address any adverse impacts.

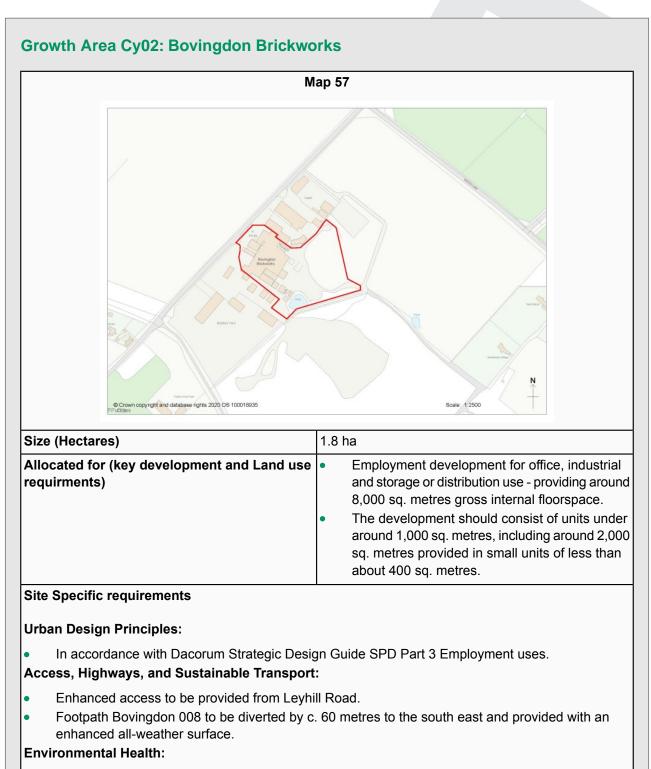

Landscape Considerations:

• Landscaping should be strengthened to screen views of the development from the east and from south of the A41.

Flood Risk and Drainage:

Any new development will need to delivery sustainable drainage solutions, and have regard for the existing Bourne Gutter and balancing pond adjacent to the northern part of the site

• Undertake ground contamination surveys and ensure that the site is safe for its intended use. **Landscape Considerations:**

 Landscape buffers required within the site to screen the development from the open countryside to the east.

- Landscaping gateway into the site to be provided around the improved road access on Leyhill Road.
- The eastern part of the existing brick storage area to the rear of the site should be removed and the land returned to the countryside and landscaped.

Biodiversity and Green Infrastructure:

 As part of delivering a net gain in biodiversity, utilise landscape measures and structures to connect with green corridors in the area.

Proposal Site Cy03 - Watling Street Truck Stop, London Road, Flamstead Map 58 Crown copyright and database rights 2020 OS 100018 Scale: 1:4000 16.21ha Size (Hectares) Allocated for (key development and Land use New/enhanced lorry park with associated • requirments) facilities Site Specific requirements **Urban Design Principles:** Proposals will need to be in accordance with the Strategic Design Guide SPD Part 3 Employment uses. High quality of design to prominent A5183 frontage. No built development should to take place on land to the east of the existing filling station or access road to Hill & Coles Farm. Access, Highways, and Sustainable Transport: Primary access to be retained from the A5183. Landscape Considerations: Utilise screening and planting to reinforce soft site boundaries and to minimise impact on the surrounding countryside. **Biodiversity and Green Infrastructure:**

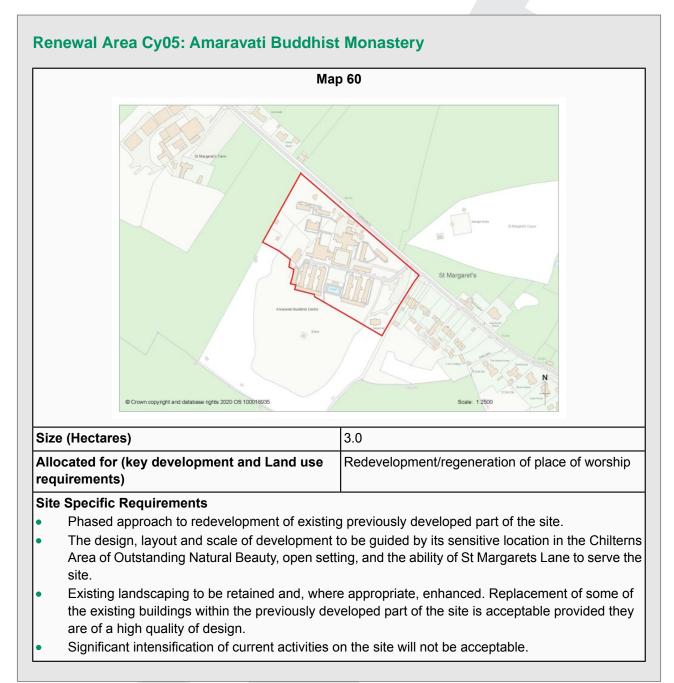

- Deliver a net gain in biodiversity, utilise landscape measures and structures to connect with green corridors in the area.
- Delivery new tree-planning and woodland copse on land to the east of the existing filling station. Flood Risk and Drainage:
- Deliver floodplain compensatory measures along the River Ver.

Growth Area Cy04: Haresfoot Campus Map 59 Scale: 1:3000 n copyright and database rights 2020 OS 100018935 Size (Hectares) 7.95ha Allocated for (key development and Land use Sports and leisure facilities for Berkhamsted requirments) School to replace those provided at Growth Area Bk03 - Haslam Playing Fields Site Specific requirements The design, layout and scale of development to be guided by its sensitive rural location and open setting. Urban Design Principles: Replacement sports facilities should take into account of its open countryside setting. Access, Highways, and Sustainable Transport: Access to be provided via the A416/Chesham Road. Deliver new/enhanced sustainable transport links.

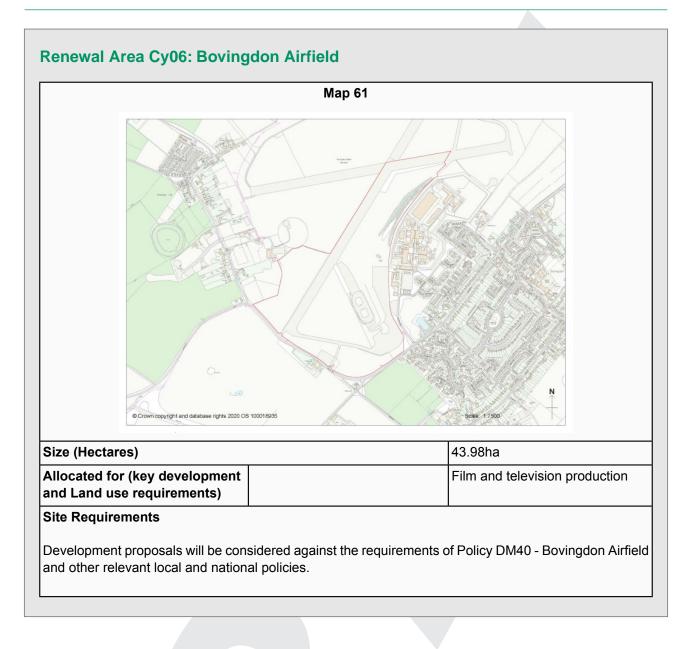

- Social and Community:
- The provision of sports facilities must be of equivalent or better quantity and quality to those which are being replaced at Growth Area Bk03 Haslam Playing Fields.

Glossary

 (including housing that provides a subsidised route to home ownership and/or is for essential local workers); and which complies with one or more of the following definitions: Affordable housing for rent: meets all of the following conditions: (a) the rent is set in accordance with the Government's rent policy for Social Re or Affordable Rent, or is at least 20% below local market rents (including service charges where applicable); (b)the landlord is a registered provider) except where it is included as part of a Built to Rent scheme (in which case the landlord need not be a registered provider); and (c) it includes or for the subsidy to be recycled for alternative affordable housing provision For Build to Rent schemes affordable housing provision For Build to Rent schemes affordable housing provision For Build to Rent schemes affordable housing provision made under these sections. The definition of a starter home should reflect the meaning set out in statute and any such secondary legislation made under these sections. The definition of a starter home should reflect the meaning set out in statute and any such secondary legislation has the effect of limiting a household's eligibility to purchase a starter home to those with a particular maximum level of household income, those restrictions should be used. Discounted market value. Eligibility is determined with regard to local incomes and local house prices. Provisions should be in place to ensur housing remains at a discount for future eligible households. Other affordable homes or mership is housing provided or sale that provides a route to ownership is nousing provided or sale that provides a route to ownership is nousing provided for sale that provides a route to ownership is nousing provided for sale that provides a route to ownership for those who could not achieve hom ownership through the market. It includes shared ownership, relevant equilolan, botery or solar decide in			
village greens (Guidance for Outdoor Sport and Play: Beyond the Six Acre Standard, Fields in Trust October 2015)Air quality management areas (AQMAs):Areas designated by local authorities because they are not likely to achieve national air quality objectives by the relevant deadlines. (National Planning Polic Framework, February 2019)Ancient or veteran tree:A tree which, because of its age, size and condition, is of exceptional biodiversit cultural or heritage value. All ancient trees are veteran trees. Not all veteran trees are old enough to be ancient, but are old relative to other trees of the sam species. Very few trees of any species reach the ancient life-stage. (National	Affordable housing:	 following definitions: Affordable housing for rent: meets all of the following conditions: (a) the rent is set in accordance with the Government's rent policy for Social Remi or Affordable Rent, or is at least 20% below local market rents (including service charges where applicable); (b)the landlord is a registered provider, except where it is included as part of a Build to Rent scheme (in which case the landlord need not be a registered provider); and (c) it includes provisions to remain at an affordable price for future eligible households, or for the subsidy to be recycled for alternative affordable housing provision For Build to Rent schemes affordable housing for rent is expected to be the normal form of affordable housing provision (and, in this context, is known as Affordable Private Rent). Starter homes: is as specified in Sections 2 and 3 of the Housing and Planning Act 2016 and any secondary legislation made under these sections. The definition of a starter home should reflect the meaning set out in statute and any such secondary legislation at the time of plan-preparation or decision-making. Where secondary legislation has the effect of limiting a household's eligibility to purchase a starter home to those with a particular maximum level of household income, those restrictions should be used. C. Discounted market sales housing: is that sold at a discount of at least 20% below local market value. Eligibility is determined with regard to local incomes and local house prices. Provisions should be in place to ensure housing remains at a discount for future eligible households. d. Other affordable routes to home ownership: is housing provided for sale that provides a route to ownership for those who could not achieve home ownership through the market. It includes shared ownership, relevant equity loans, other low cost homes for sale (at a price equivalent to at least 20% below local market value) and rent to buy (which includes a period of intermedi

Ancient woodland:	An area that has been wooded continuously since at least 1600 AD. It includes ancient semi-natural woodland and plantations on ancient woodland sites (PAWS). (National Planning Policy Framework, February 2019)
Annual Monitoring Report (AMR)	Monitors the local planning framework and its key policies and proposals. Information in this document will show trends and highlight possible problem areas which future changes to planning policy will seek to address.
Annual position statement (residential land position statement and employment land position statement):	A document setting out the 5 year housing land supply position on 1st April each year, prepared by the local planning authority in consultation with developers and others who have an impact on delivery. (National Planning Policy Framework, February 2019)
Appropriate Assessment (also referred to as a Habitats Regulation Assessment):	This assessment is required under The Conservation of Habitats and Species Regulations 2010. Its purpose is to analyse a plan or proposals and ascertain whether there would be any significant effects on internationally important nature conservation sites (also referred to as Natura or European sites).
Archaeological interest (significance):	There will be archaeological interest in a heritage asset if it holds, or potentially holds, evidence of past human activity worthy of expert investigation at some point. (National Planning Policy Framework, February 2019)
Area of Outstanding Natural Beauty (AONB):	Parts of the countryside in Dacorum includes the Chilterns AONB. This is a precious landscape whose distinctive character and natural beauty are so outstanding that it is in the nation's interest to safeguard it. The AONB is managed by the Chilterns Conservation Board. The Board was set up by a Parliamentary Order under the Countryside and Rights of Way Act 2000. Its primary purpose is to conserve and enhance the natural beauty of the AONB. However it does have other purposes – i.e. to increase the public's understanding and enjoyment of the AONB and to foster the economic and social well-being of communities within the AONB. The Council must also have regard to the primary purpose of conserving and enhancing the natural beauty in exercising its functions.
Brownfield land:	See previously developed land (National Planning Policy Framework, February 2019)
Brownfield land registers:	Registers of previously developed land that local planning authorities consider to be appropriate for residential development, having regard to criteria in the Town and Country Planning (Brownfield Land Registers) Regulations 2017. Local planning authorities will be able to trigger a grant of permission in principle for residential development on suitable sites in their registers where they follow the required procedures. (National Planning Policy Framework, February 2019)
Build to Rent:	Purpose built housing that is typically 100% rented out. It can form part of a wider multi-tenure development comprising either flats or houses, but should be on the same site and/or contiguous with the main development. Schemes will usually offer longer tenancy agreements of three years or more, and will typically be professionally managed stock in single ownership and management control. (<i>National Planning Policy Framework, February 2019</i>)
Climate change adaptation:	Adjustments made to natural or human systems in response to the actual or anticipated impacts of climate change, to mitigate harm or exploit beneficial opportunities. (<i>National Planning Policy Framework, February 2019</i>)
Climate change mitigation:	Action to reduce the impact of human activity on the climate system, primarily through reducing greenhouse gas emissions. (<i>National Planning Policy Framework, February 2019</i>)
Community Infrastructure Levy (CIL):	Dacorum operates a CIL charge on most types of new development in their area. This charge is based on a simple formulae which relate the size of the charge to the size and character and location of the development paying it.

Conservation (for heritage policy):	The process of maintaining and managing change to a heritage asset in a way that sustains and, where appropriate, enhances its significance. <i>(National Planning Policy Framework, February 2019)</i>
Conservation Area:	Areas of special architectural or historic interest, the character, appearance or setting of which it is desirable to preserve or enhance.
Conservation Area Appraisals:	Set out why an area has been defined as a Conservation Area; its different character areas and appearance; buildings of significant interest; features for retention and improvement and proposals for its future management.
Deliverable:	 To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular: a. sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). b. where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years. (National Planning Policy Framework, February 2019)
Designated heritage asset:	A World Heritage Site, Scheduled Monument, Listed Building, Protected Wreck Site, Registered Park and Garden, Registered Battlefield or Conservation Area designated under the relevant legislation. (National Planning Policy Framework, February 2019)
Designated rural areas:	National Parks, Areas of Outstanding Natural Beauty and areas designated as 'rural' under Section 157 of the Housing Act 1985. (<i>National Planning Policy</i> <i>Framework, February 2019</i>)
Developable:	To be considered developable, sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged. (National Planning Policy Framework, February 2019)
Development plan:	Is defined in section 38 of the Planning and Compulsory Purchase Act 2004, and includes adopted local plans, neighbourhood plans that have been made and published spatial development strategies, together with any regional strategy policies that remain in force. Neighbourhood plans that have been approved at referendum are also part of the development plan, unless the local planning authority decides that the neighbourhood plan should not be made. <i>(National Planning Policy Framework, February 2019)</i>
Edge of centre:	For retail purposes, a location that is well connected to, and up to 300 metres from, the primary shopping area. For all other main town centre uses, a location within 300 metres of a town centre boundary. For office development, this includes locations outside the town centre but within 500 metres of a public transport interchange. In determining whether a site falls within the definition of edge of centre, account should be taken of local circumstances. <i>(National</i> <i>Planning Policy Framework, February 2019)</i>
Entry-level exception site:	A site that provides entry-level homes suitable for first time buyers (or equivalent, for those looking to rent), in line with paragraph 71 of this Framework (<i>National Planning Policy Framework, February 2019</i>)

Environmental impact assessment:	A procedure to be followed for certain types of project to ensure that decisions are made in full knowledge of any likely significant effects on the environment. (National Planning Policy Framework, February 2019)
Evidence base:	The process of producing a development plan document firstly requires the assembly of an evidence base. The evidence base consists of studies, plans and strategies produced by the Council and other organisations.
General Employment Areas (GEAs):	Areas defined on the Proposals Map where a specified range of employment generating uses (Classes B1, B2 and/or B8 of the Use Classes Order) are directed, and where the loss of employment land to other uses is not normally permitted.
Geodiversity:	The range of rocks, minerals, fossils, soils and landforms. <i>(National Planning Policy Framework, February 2019)</i>
Green Belt:	An area of open land where strict planning controls apply in order, in particular, to check the further growth of a large built-up area. It is designated in a development plan.
Green infrastructure (GI):	A network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities. (National Planning Policy Framework, February 2019)
Gypsies and Travellers:	Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family's or dependants' educational or health needs or old age have ceased to travel temporarily, but excluding members of an organised group of travelling showpeople or circus people travelling together as such. (<i>Planning policy for traveller sites, August 2015</i>)
	A "pitch" means a pitch on a gypsy and traveller site
Habitats site:	Any site which would be included within the definition at regulation 8 of the Conservation of Habitats and Species Regulations 2017 for the purpose of those regulations, including candidate Special Areas of Conservation, Sites of Community Importance, Special Areas of Conservation, Special Protection Areas and any relevant Marine Sites. <i>(National Planning Policy Framework, February 2019)</i>
Health Impact Assessment:	A combination of procedures, methods and tools that systematically judges the potential, and sometimes unintended effects of a policy, plan, programme or project on the health of a population and the distribution of those effects within the population and identifies appropriate actions to manage those effects.
Heritage asset:	A building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest. It includes designated heritage assets and assets identified by the local planning authority (including local listing). (<i>National Planning Policy Framework, February 2019</i>)
Hertfordshire Biodiversity Action Plan	A 50 year vision for the wildlife and natural habitats of Hertfordshire and provides guidance on the protection, restoration and re-creating a sustainable level of biodiversity in the country.
Historic environment:	All aspects of the environment resulting from the interaction between people and places through time, including all surviving physical remains of past human activity, whether visible, buried or submerged, and landscaped and planted or managed flora. (<i>National Planning Policy Framework, February 2019</i>)

Housing Delivery Test:	Measures net additional dwellings provided in a local authority area against the homes required, using national statistics and local authority data. The Secretary of State will publish the Housing Delivery Test results for each local authority in England every November. (<i>National Planning Policy Framework, February 2019</i>)
Inter-urban:	Connecting cities or towns.
International, national and locally designated sites of importance for biodiversity:	All international sites (Special Areas of Conservation, Special Protection Areas, and Ramsar sites), national sites (Sites of Special Scientific Interest) and locally designated sites including Local Wildlife Sites. <i>(National Planning Policy Framework, February 2019)</i>
Key Shopping Area	Also referred to as the 'Primary Shopping Area'; see NPPF (paragraph 2.3 and Annex 2)
LAP	Local Area for Play that relate to a minimum standards of Provision.
LEAP	Local Equipped Area for Play that relate to a minimum standards of Provision.
Listed Building:	A building included in a list compiled or approved by the Secretary of State. It includes any object or structure fixed to the building and any object structure within the cartilage of the building which, although not fixed to the building, formed part of the land and has done so since July 1948.
Local Development Order (LDO):	An Order made by a local planning authority (under the Town and Country Planning Act 1990) that grants planning permission for a specific development proposal or classes of development. <i>(National Planning Policy Framework,</i> <i>February 2019)</i>
Local Enterprise Partnership (LEP):	A body, designated by the Secretary of State for Housing, Communities and Local Government, established for the purpose of creating or improving the conditions for economic growth in an area. (<i>National Planning Policy Framework, February 2019</i>)
Local housing need:	The number of homes identified as being needed through the application of the standard method set out in national planning guidance (or, in the context of preparing strategic policies only, this may be calculated using a justified alternative approach as provided for in paragraph 60 of this Framework). (National Planning Policy Framework, February 2019)
Local Nature Partnership:	A body, designated by the Secretary of State for Environment, Food and Rural Affairs, established for the purpose of protecting and improving the natural environment in an area and the benefits derived from it. (<i>National Planning Policy Framework, February 2019</i>)
Local Nature Reserves (LNRs):	Places identified as having wildlife or geological features that are of special interest locally. They offer people special opportunities to study or learn about nature, or simply to enjoy it.
Local Planning Authority (LPA):	The public authority whose duty it is to carry out specific planning functions for a particular area. All references to local planning authority include the district council, London borough council, county council, Broads Authority, National Park Authority, the Mayor of London and a development corporation, to the extent appropriate to their responsibilities. <i>(National Planning Policy Framework,</i> <i>February 2019)</i>
Local Plan:	A plan for the future development of a local area, drawn up by the local planning authority in consultation with the community. In law this is described as the development plan documents adopted under the Planning and Compulsory Purchase Act 2004. A local plan can consist of either strategic or non-strategic policies, or a combination of the two. <i>(National Planning Policy Framework, February 2019)</i>

Local Transport Plan (LTP):	The Transport Act 2000 introduced a statutory requirement for local transport authorities to produce a Local Transport Plan (LTP) every 5 years and to keep it under review. The plan sets out the statuory framework and policies on how transport can help deliver a positive future vision by considering safe and efficent travel while supporting economic growth, meeting housing needs, improving public health and reducing environmental damage. The plan also considers how future planning decisions and emerging technology might affect the way transport needs to be provided in the longer term.
Main town centre uses:	Retail development (including warehouse clubs and factory outlet centres); leisure, entertainment and more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, nightclubs, casinos, health and fitness centres, indoor bowling centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities). (National Planning Policy Framework, February 2019)
Major development:	For housing, development where 10 or more homes will be provided, or the site has an area of 0.5 hectares or more. For non-residential development it means additional floorspace of 1,000m2 or more, or a site of 1 hectare or more, or as otherwise provided in the Town and Country Planning (Development Management Procedure) (England) Order 2015. <i>(National Planning Policy Framework,</i> <i>February 2019)</i>
Mass Rapid Transit (MRT):	A high quality, high capacity passenger transport system
Modal shift:	Replacing a saturated means of transport with another to make the first less congested.
MUGA	Multi-Use Games Area that relate to a minimum standards of Provision.
Multi-modal transport interchanges (MMTIs):	Interchange between one mode of any type of transport and another for example between bus and train. It also considers interchange between public transport and the feeder modes used to get to and from the interchange for example walk, cycle or motor vehicle.
National Planning Policy Framework (NPPF):	The National Planning Policy Framework sets out the Government's planning policies for England and how these are expected to be applied. The guidance is to be used by local planning authorities in drawing up plans and determining planning applications.
Natural and semi-natural greenspaces	Woodland, scrub, grassland, wetlands, open and running water, and open access land.(<i>Guidance for Outdoor Sport and Play: Beyond the Six Acre Standard, Fields in Trust October 2015</i>)
NEAP	Neighbourhood Equipped Area for Play that relate to a minimum standards of Provision.
Neighbourhood Development Order (NDO):	An Order made by a local planning authority (under the Town and Country Planning Act 1990) through which parish councils and neighbourhood forums can grant planning permission for a specific development proposal or classes of development. <i>(National Planning Policy Framework, February 2019)</i>
Neighbourhood Plan:	A plan prepared by a parish council or neighbourhood forum for a designated neighbourhood area. In law this is described as a neighbourhood development plan in the Planning and Compulsory Purchase Act 2004. (National Planning Policy Framework, February 2019)
Non-strategic policies:	Policies contained in a neighbourhood plan, or those policies in a local plan that are not strategic policies. (National Planning Policy Framework, February 2019)

through to the very frail elderly; and whose housing needs can encompass accessible, adaptable general needs housing through to the full range of retirement and specialised housing for those with support or care needs. (<i>Nator</i> <i>Planning Policy Framework, February 2019</i>)Open land:Areas of open space greater than 1 hectare in size that are formally identifies on the Policies Map and where its openness is protected from development through planning policy.Open space:All open space of public value, including not just land, but also areas of wate (such as rivers, canals, lakes and reservoirs) which offer important opportuniti for sport and recreation and can act as a visual amenity. (<i>National Planning</i> <i>Policy Framework, February 2019</i>)Out of centre:A location which is not in or on the edge of a centre but not necessarily outsit the urban area. (<i>National Planning Policy Framework, February 2019</i>)Over trading:Engage in more business than can be supported by the market.Parks and GardensFormal green spaces including urban parks, country parks, forest parks and formal gardens (<i>Gudance for Outdoor Sport and Play: Beyond the Six Acre Standard, Fields in Trus October 2015</i>)People with disabilities:People have a disability if they have a physical or mental impairment, and th impairment has a substantial and long-term adverse effect on their ability to carry out normal day-to-day activities. These persons include, but are otilized amount of housing-led development inprinciple. Following a grant of permissi in principle. local planning authority used to mitigate the impact of new developments on the local community and infrastructureSelf-build and custom-build housing:Housing built by an individual, a group of individuals, or persons working with or for them, to be occupied by that individual. Such housing can be either marked or affordable housing. A legal definition, for the purpose of applying the Self-build and Custom Housebuilding Act 2015 (as amended), is contained in section 1(A1) and (A2) of that Act. (<i>National Planning Policy Framework, February 2019</i>)Sequential approach:A planning principle that seeks to identify, allocate or develop certain types or locations of land before others. For example, town centre retail sites before out-of-town retail sites.Setting of a heritage asset:The surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral. (<i>National Planning Policy Framework, February 2019</i>)Special Areas of Conservation (SAC):Areas defined by regulation 3 of the Conservation of Habitats and Species Regulations 2017 which have been given special protection as important conservation sites. (<i>National Planning Policy Framework, February 2019</i>)Site of Special Scientific Interest (SSSi):Site designated by Natural England under the Wildlife and Countryside Act 1981. (<i>National Planning Policy Framework, February 2019</i>)Statement of Community involvement (SCI):A document that sets out how the Council will involve the community and other stakeholders in the production of the Local Development Framework, planning applications	Rural exception sites:	normally be used for housing. Rural exception sites seek to address the needs of the local community by accommodating households who are either current residents or have an existing family or employment connection. A proportion of market homes may be allowed on the site at the local planning authority's discretion, for example where essential to enable the delivery of affordable units
housing:or for them, to be occupied by that individual. Such housing can be either market or affordable housing. A legal definition, for the purpose of applying the SelF-build and Custom Housebuilding Act 2015 (as amended), is contained in section 1(A1) and (A2) of that Act. (<i>National Planning Policy Framework, February 2019</i>)Sequential approach:A planning principle that seeks to identify, allocate or develop certain types or locations of land before others. For example, town centre retail sites before out-of-town retail sites.Setting of a heritage asset:The surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral. (<i>National Planning Policy Framework, February 2019</i>)Special Areas of Conservation (SAC):Areas defined by regulation 3 of the Conservation of Habitats and Species Regulations 2017 which have been given special protection as important conservation sites. (<i>National Planning Policy Framework, February 2019</i>)Spatial development 	Section 106:	local planning authority used to mitigate the impact of new developments on the
locations of land before others. For example, town centre retail sites before out-of-town retail sites.Setting of a heritage asset:The surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, 	Self-build and custom-build housing:	or for them, to be occupied by that individual. Such housing can be either market or affordable housing. A legal definition, for the purpose of applying the Self-build and Custom Housebuilding Act 2015 (as amended), is contained in section 1(A1)
and may change as the asset and its surroundings evolve. Assessment (SEA): Regulations 2004) which requires the formal environmental assessment of certain plans and programmes which are likely to have significant effects on the environment. (National Planning Policy Framework, February 2019) Strategic policies: Policies and site allocations which address strategic priorities in line with the requirements of Section 19 (1B-E) of the Planning and Compulsory Purchase	Strategic Housing Land Availability Assessment (SHLAA):	assesses the deliverability and developability of sites. Such assessments are
requirements of Section 19 (1B-E) of the Planning and Compulsory Purchase	Strategic Environmental Assessment (SEA):	
	Strategic policies:	requirements of Section 19 (1B-E) of the Planning and Compulsory Purchase

Strategic site:	Sites within the urban area whose short-term development is fundamental to the delivery of the vision for that particular town or village.
Supplementary Planning Documents (SPDs):	Documents which add further detail to the policies in the development plan. They can be used to provide further guidance for development on specific sites, or on particular issues, such as design. Supplementary planning documents are capable of being a material consideration in planning decisions but are not part of the development plan. (National Planning Policy Framework, February 2019)
Sustainable transport modes:	Any efficient, safe and accessible means of transport with overall low impact on the environment, including walking and cycling, low and ultra low emission vehicles, car sharing and public transport. <i>(National Planning Policy Framework, February 2019)</i>
Sustainable Drainage Systems (SuDs):	 A key part of a managing and reducing flood risk on a site or area. SuDS are a range of approaches to surface water drainage management including: Source control measures including rainwater recycling and drainage; Infiltration devices to allow water to soak into the ground, that can include individual soakaways and communal facilities; Filter strips and swales, which are vegetated features that hold and drain water downhill mimicking natural drainage patterns; Filter drains and porous pavements to allow rainwater and run-off to infiltrate into permeable material below ground and provide storage if needed; and Basins and ponds to hold excess water after rain and allow controlled discharge that avoids flooding.
Sustainability Assessment (SA):	An appraisal of local development documents against their environmental, social and economic impacts. This often incorporates Strategic Environmental Assessment (SEA), required for some plans and proposals under European law.
Town centre:	Area defined on the local authority's policies map, including the primary shopping area and areas predominantly occupied by main town centre uses within or adjacent to the primary shopping area. References to town centres or centres apply to city centres, town centres, district centres and local centres but exclude small parades of shops of purely neighbourhood significance. Unless they are identified as centres in the development plan, existing out-of-centre developments, comprising or including main town centre uses, do not constitute town centres. <i>(National Planning Policy Framework, February 2019)</i>
Transport assessment:	A comprehensive and systematic process that sets out transport issues relating to a proposed development. It identifies measures required to improve accessibility and safety for all modes of travel, particularly for alternatives to the car such as walking, cycling and public transport, and measures that will be needed deal with the anticipated transport impacts of the development. (National Planning Policy Framework, February 2019)
Transport statement:	A simplified version of a transport assessment where it is agreed the transport issues arising from development proposals are limited and a full transport assessment is not required. (National Planning Policy Framework, February 2019)
Transport User Hierarchy:	Policy which presents a shift in emphasis to increase rates of travel by more sustainable modes by increasing the attractiveness of alternative forms of travel so that those trips that can only feasibly be made by the car can be undertaken without suffering the effects of a significant worsening of congestion.
Travel plan:	A long-term management strategy for an organisation or site that seeks to deliver sustainable transport objectives and is regularly reviewed. (<i>National Planning Policy Framework, February 2019</i>)

Travelling showpeople:	Members of a group organised for the purposes of holding fairs, circuses or shows (whether or not travelling together as such). This includes such persons who on the grounds of their own or their family's or dependants' more localised pattern of trading, educational or health needs or old age have ceases to travel temporaily, but excludes Gypsies and Travellers. (Planning policy for traveller sites, August 2015) A "plot" means a pitch for travelling showpeople.
Wildlife corridor:	Areas of habitat connecting wildlife populations. (National Planning Policy Framework, February 2019)
Wildlife site:	Wildlife Sites are the most important places for wildlife outside legally protected land such as Nature Reserves or Sites of Special Scientific Interest. In 2010 there were almost 2,000 Wildlife Sites in Hertfordshire, totalling 17,215ha, and covering over 10% of the county. 246 of these sites are in the Dacorum District, covering 3,131.5ha. They include meadows, ponds, woodland and urban green space. This county-based system is now acknowledged and promoted nationally by DEFRA and applied across England. The Wildlife Sites Partnership in Hertfordshire includes HMWT, HBRC, Natural England, the Countryside Management Service, Chilterns AONB and the Environment Agency, and is led and coordinated by HMWT.
Windfall sites:	Sites not specifically identified in the development plan. (National Planning Policy Framework, February 2019)
