

# Engagement plan

## Project: Gadebridge Park river restoration

Version 7

This engagement plan sets out the project partners' (Environment Agency, Dacorum Borough Council and Affinity Water) intended engagement with stakeholders in relation to improving the River Gade through Gadebridge Park, Hemel Hempstead. The Environment Agency is leading the planning and delivery of stakeholder engagement, supported by Dacorum Borough Council and Affinity Water.

## Background

---

We (the Environment Agency (EA)) are working with Dacorum Borough Council (DBC) and Affinity Water (AW) to help restore the River Gade at Gadebridge Park, a globally rare and valuable chalk stream. The project will provide multiple benefits, including improved habitats for wildlife, the protection of water resources for both people and the environment, and allowing local residents and visitors to get closer to the river and enjoy nature.

The River Gade is a chalk stream; a globally rare and valuable habitat. 85% of the world's chalk streams are in England and 30% (68) of these are in the south east. Chalk streams are unique because they get most of their water from rain-fed groundwater held in underground chalk 'aquifers'. This mineral-rich water is able to support a wide range of plants and wildlife.

At the moment, only 17% of chalk streams are in their natural state. Like many chalk streams, the River Gade faces pressure from low flows and historic modifications to its channel that limit the river's habitats and the wildlife it can support. The watercourse is currently classified as having a 'poor' ecological status under the European Water Framework Directive (WFD).

### **A perched channel:**

The River Gade was previously used as a mill leat. This means that the channel is at a higher level than the bottom of the valley (half a metre in this instance). In times of high flows, water can overtop the banks and flood the lower levels of the park. Once the water levels drop, this water cannot flow back into the channel. It therefore sits for long periods of time in the park. The channel is also disconnected from the groundwater table. For a chalk stream, where over 70% of flow is from groundwater, this can have a big impact on both its resilience to low flows and to wildlife in the channel.

### **Gauging station:**

The Environment Agency has a gauging station at the bottom of the park to monitor flows on the River Gade. It is a concrete flume and weir structure. The data is needed to monitor periods of low and high flows. The weir is too high for fish to pass, so it presents a barrier to fish passage upstream. The channel consists of a concrete bed and banks for about 40 metres. The weir also impounds the river upstream to the White Bridge. This impoundment results in the loss of gradient over this reach and reduces the diversity of flow types and habitats. The low energy flows result in the deposition of fine sediments over the gravel bed. All of these things impact the ecology that the channel is able to support.

### **Low flows:**

The River Gade often suffers from low flows due to:

- spring flows (groundwater emerging at the surface) being diverted into an underground tunnel (culvert) rather than feeding the river Gade. The culvert was built to stop the town from flooding and discharges into the fishing lake at Kings Langley, about 5km downstream of Gadebridge Park.
- being disconnected from the groundwater table (see Image 3). For a chalk stream, where over 70% of its flow is from groundwater, this can have a significant impact on both its resilience during periods of low flows and on wildlife in the channel.
- water being taken (abstracted) for public water supply.

Most water we drink in the South East comes from rainwater stored deep beneath our feet in natural chalk 'aquifers'. These also feed our chalk streams. In 2018 Affinity Water reduced net abstraction in the Gade catchment by 2,342,400 m<sup>3</sup>/year (that's an average of 6.4 million litres a day). However, demand for water in the South East remains high.

### **Poor habitat quality and diversity:**

As a result of being a historic mill leat and previous management such as dredging, the channel is very straight and is over-wide for the amount of flow. This, combined with the impoundment means that there is excessive vegetation growth that will readily grow across the entire channel if maintenance is not carried out. There are also remnant weir structures which have been notched (the middle removed), but still cause slight impoundments. These characteristics provide the channel with little resilience to drought conditions as the water is spread thinly across a wide expanse of channel.

## Project team

	Name	Role in project	Initials used in plan
<b>Environment Agency</b>	Kelly Standbrook	Project Manager	KS
	Ruth Butcher	Geomorphology	RB
	Maria Bailey	Biodiversity	MB
	Colette Sales	Analysis and reporting	CS
	Rhodri Richards	Operations	RR
	Laura Hepworth	Partnerships and Strategic Overview	LH
	Nina Garner	Operations	NG
	Craig Jeffries	Flood Risk Modelling review	CJ
	Jennie Brennan	Engagement	JB
	Andy Turton	Defra Comms	AT
	Chris Padley	Sustainable Places (Planning Specialist)	CP
	Richard Woodbridge	Hydrometry and Telemetry	RW
	Geoff Angell	Hydrology	GA
	Lewis Thomas	Fisheries	LT
	Phil Belfield	Fisheries	PB
	Louise Vincent	Defra Group Commercial	LV
	Helen Wood	Finance business partner	HW
	Suzanne Allen	Legal	SA
	Linda Mutua	Estates	LM
Kate Cook	CDM Principal Designer	KC	
Kelvin Reay	CDM client	KR	
<b>Dacorum Borough Council</b>	Rob Cassidy	Parks and Open Spaces Officer (engagement lead)	RC
	Simon Coultas	Parks and Open Spaces Manager (DBC lead contact)	SC
	Bill Buckley	Interim Assistant Director (Neighbourhood Delivery) (planning lead)	BB
<b>Affinity Water</b>	?	Financial partner	?
	David Watts	Programme Delivery Manager	DW

## Business objectives

---

By the end of 2022, the Environment Agency, Dacorum Borough Council and Affinity Water will have worked together to improve the ecology, recreational value and environmental resilience of the River Gade through Gadebridge Park. We will:

- Improve the River Gade and the adjacent parkland for wildlife;
- Provide more opportunities, accessible to everyone, for people to get closer to the river and enjoy nature;
- Provide more opportunities to learn about the River Gade, both its historical importance to the landscape and its value as a rare chalk stream;
- Improve the river's resilience – it's ability to cope with and adapt to the pressures of low flows and climate change;
- Improve floodplain connectivity, but reduce the impact of flooding – i.e. flood water can be stored on the floodplain when needed, but doesn't sit on the parkland for long periods of time;
- Improve biodiversity in the River Gade, so that it supports Good Ecological Status under the European Water Framework Directive;
- Reduce the barriers to fish movement and impoundment caused by river structures, including the Environment Agency's gauging station;
- Improve flows in the river, to lessen the build-up of sediment and vegetation and to reduce the need for maintenance;
- Improve the ability to monitor river flows in the River Gade.

## Engagement objectives

Ref.	Objective	What will success look like?	How will we measure it?	Stakeholder audience
EO1	Before detailed designs are finalised, stakeholders understand the project's objectives and latest proposals, have had an opportunity to provide their comments, and know where they can find further information or contact us with queries or concerns.	<ul style="list-style-type: none"> <li>- Wide support for project</li> <li>- Comments on the proposals received from range of stakeholders.</li> <li>- Enquiries sent directly to EA's project inbox or DBC's regeneration inbox.</li> </ul>	<ul style="list-style-type: none"> <li>- Stakeholder comments</li> <li>- Action plan and engagement activity log</li> </ul>	MPs, councillors, members of the public, local interest groups.
EO2	Throughout the project, ensure that any enquiries, data requests and complaints are answered within suitable timescales, with sufficient detail and in accordance with the General Data Protection Regulation (GDPR).	(EA timeframes) <ul style="list-style-type: none"> <li>- General enquiries responded to within 10 working days</li> <li>- Data requests responded to within 20 working days and follow FOI/EIR procedures.</li> <li>- Executive correspondence responded to within 10 working days and follows relevant procedure.</li> <li>- Complaints responded to within 10 working days and follow relevant procedure.</li> <li>- No GDPR breaches.</li> <li>- Limited follow-ups due to sufficient first response.</li> </ul>	<ul style="list-style-type: none"> <li>- Record kept of reactive communications, response detail and timescales.</li> </ul>	MPs, councillors, members of the public, local interest groups.
EO3	Ensure that stakeholders are kept informed of project progress, are proactively updated as key milestones are reached and, where relevant, are consulted as part of our decision-making. When	<ul style="list-style-type: none"> <li>- A list of key stakeholders and a plan of engagement activities/updates that align with project milestones.</li> <li>- Key stakeholders' feedback has helped shape our plans.</li> </ul>	<ul style="list-style-type: none"> <li>- Action plan and engagement activity log.</li> <li>- Stakeholder comments and feedback</li> <li>- Final detailed designs.</li> </ul>	MPs, councillors, members of the public, local interest groups.

	stakeholders are consulted, it is clear what can and cannot be influenced.			
EO4	At project completion, stakeholders are informed of the outcomes of the project, understand how they can get involved in any related river-based events in the future and are aware of the appropriate channels to contact us with any questions or comments.	<ul style="list-style-type: none"> <li>- Engagement does not stop as soon as the project is complete.</li> <li>- Action plan of comms and activities beyond project completion.</li> <li>- Attendance at future river-based learning events.</li> <li>- Gadebridge Park project completion survey</li> </ul>	<ul style="list-style-type: none"> <li>- Action plan and engagement activity log.</li> <li>- Project completion survey and results</li> </ul>	MPs, councillors, members of the public, local interest groups.
EO5	By project completion, stakeholders will have a better understanding of the environmental issues facing the River Gade in Gadebridge Park, how the project has helped address these issues and what action we can all take to help protect chalk streams.	<ul style="list-style-type: none"> <li>- Project's key messages include information about why the River Gade needs improving, how we will/have addressed issues and how we can all protect chalk streams. They are used widely in project communications.</li> <li>- Wide support for the project, evident from consultation responses.</li> <li>- Information boards successfully installed in the park.</li> <li>- Attendance at post-completion river-based learning events.</li> <li>- Share project completion survey and environmental monitoring results with stakeholders.</li> </ul>	<ul style="list-style-type: none"> <li>- Stakeholder comments</li> <li>- Stakeholder feedback</li> <li>- Press and social media coverage.</li> </ul>	All
EO6 (EA internal)	Throughout the project, ensure that the Environment Agency's technical teams and Area Leadership Team are confident on the key project aims and the current agreed timeline, are consulted when required and are kept up-to-date of key milestones.	<ul style="list-style-type: none"> <li>- A plan of internal updates that align with project milestones</li> <li>- EA technical feedback helps shape detailed final designs.</li> </ul>	<ul style="list-style-type: none"> <li>- Action plan and engagement activity log</li> <li>- Internal feedback</li> </ul>	EA technical teams, Area Leadership Team

## Ways of working

---

### Project partners single point of contact details for communications approvals:

- Environment Agency: Kelly Standbrook at [gadebridgepark@environment-agency.gov.uk](mailto:gadebridgepark@environment-agency.gov.uk)
- Dacorum Borough Council: Simon Coultas at [Simon.Coultas@dacorum.gov.uk](mailto:Simon.Coultas@dacorum.gov.uk)
- Affinity Water: David Watts at [david.watts@affinitywater.co.uk](mailto:david.watts@affinitywater.co.uk)

### Steering group members single point of contact details for communications approvals:

- Hemel Hempstead History and Museum Society: Michael Stanyon at [stanyon09@gmail.com](mailto:stanyon09@gmail.com)
- Dacorum Environmental Forum: Gruff Edwards at [gruff.edwards@tiscali.co.uk](mailto:gruff.edwards@tiscali.co.uk)
- Friends of Gadebridge Park: Rob Beauchamp at [rob.beauchamp56@gmail.com](mailto:rob.beauchamp56@gmail.com)
- Bowls Club: Brian Smith at [briandella@talktalk.net](mailto:briandella@talktalk.net)

### Approvals process

All official publicity and external communications or reports about the project should be drafted and approved by partners as per the agreed approvals process below:

1. EA or DBC project team member to produce the draft engagement materials as indicated in the action plan.
2. Pass to their relevant Engagement or Communications Officer to proof read/plain English and then arrange any internal approvals e.g. for MP correspondence, EA should get Area Director approval.
3. EA/DBC to pass to other party's single point of contact. If there's a short deadline, mark email as urgent and follow-up with phone call. Where content specifically mentions AW or their work, also pass to AW point of contact for comments/approval. Consider whether any additional members of the Steering Group also need consulting e.g. the Local History and Museum Society for communications including historical information.
4. Second project team to review and provide comments/approve.
5. Pass back to first team's point of contact and discuss any major issues/changes.
6. Once agreed, points of contact to share with internal contacts in own organisations as well as partners outside of EA and DBC, where appropriate.
7. First project team to publish (unless otherwise agreed).

## Proactive communication methods

- Briefings, newsletters and official emails: to follow the approvals process above. Materials to include all partner logos (EA, DBC and AW) and Revitalising Chalk Rivers logo wherever possible.
- DBC webpage updates: to follow approvals process above.
- Posters, information boards, leaflets and display material: to follow approvals process above. Materials to include all partner logos and Revitalising Chalk Rivers logo wherever possible.
- Social media: EA to tweet via @EnvAgencySE account and DBC to tweet via @DacorumBC following approvals process above. Tweet to include tags of other partners as appropriate; Facebook text to be approved following the approvals process above.
- Press releases: These should be issued by EA or DBC (or jointly) as indicated in action plan and ideally include a quote from the other. For the EA, the press release should be drafted by Defra Communications and should be approved by their project team before entering the approvals process at stage 3. For DBC, the press release should be drafted by their press team and be approved by their project team before entering the approvals process at stage 3.
- Meetings and events: Any meetings or events with a focus on this project should be arranged jointly where possible unless it is inappropriate to do so (for example with stakeholders who only have interest in one aspect of the project) and should be attended by a representative from all parties.

All engagement materials to reference the project email address [gadebridgepark@environment-agency.gov.uk](mailto:gadebridgepark@environment-agency.gov.uk) for enquiries, with the following note: *Please only contact Kelly with questions specifically about Gadebridge Park's river restoration project. Questions about all other aspects of Gadebridge Park should be sent to Robert Cassidy at [Robert.cassidy@dacorum.gov.uk](mailto:Robert.cassidy@dacorum.gov.uk)*

## Reactive communication methods

- Customer enquiries: Where possible, enquiries should be answered using agreed lines by the receiving organisation, including those received via email and social media. For those that require a more detailed response, it is assumed that the EA will lead (unless it is a specific DBC aspect of the project) and where required, customers should be directed to send their enquiry to [gadebridgepark@environment-agency.gov.uk](mailto:gadebridgepark@environment-agency.gov.uk). In accordance with General Data Protection Regulations, customer details should only be shared between organisations where consent has been given by the customer to do so.

For the EA, any enquiries that include information requests under the Freedom of Information Act (FOI) and Environmental Information Regulations (EIR), should be logged, tracked and responded to by the Customers Team at [HNLenquiries@environment-agency.gov.uk](mailto:HNLenquiries@environment-agency.gov.uk).

For DBC, any enquiries that include information requests under the FOI and EIR, should be sent to [customer.services@dacorum.gov.uk](mailto:customer.services@dacorum.gov.uk).

- Press enquiries: Enquiries can be answered using agreed lines by the receiving organisation. Organisations will notify each other of any detailed press enquiries they've received. Communications/press officers from EA and DBC should work together on a response if it is a particularly contentious issue.
- Radio and TV interviews: Requests for radio or TV interviews should be offered to the most suitable organisation first wherever this is obvious and practical.
- Social media enquiries: For quick responses teams should use agreed messages. For more detailed responses, see 'Customer enquiries' above.
- Meeting invitations: Any invitations to meet with key stakeholders, such as MPs or Councillors, to discuss the project should be shared with the other parties so that they can attend if appropriate.

## Milestones

---

<b>Milestone / Engagement Phase</b>	<b>Date</b>
Draft designs public consultation	July 2018 to September 2018
Vegetation management	February 2020
Trenching	March 2020
Dacorum Borough Council Scrutiny Committee	June 2021
Draft detailed designs to Environment Agency for review	August 2021
Share draft detailed designs publically and invite comment	September 2021
Park event to share draft detailed designs with public	September 2021
Comments reviewed and addressed	October 2021
Submit planning application	September to October 2021 (approval by end of December)
Attend Cabinet to approve draft detailed designs	October 2021
Construction phase tender	January 2022
Project commencement communications	February to March 2022
Start works – opening ceremony	April to July 2022
Install interpretation boards	May 2022
Project completion communications	July 2022
Post project review	August 2022
Post project review (1 year on) and associated communications	August 2023

## Key messages (require updating – in progress)

---

- The River Gade is a chalk stream, which is a globally rare habitat, with only 210 examples worldwide. 85% of these streams are in England, particularly the South and East.
- Despite being rare and valuable habitats, only 17% of chalk streams currently meet good ecological status under the Water Framework Directive (2019 classification) – the stretch of the River Gade which flows through Gadebridge Park is currently at 'Poor' status.
- The river suffers from a number of issues caused by human interaction that has resulted in its poor environmental condition. It has been significantly impacted by historic channel alterations and low flows caused by over abstraction.
- We are working with Dacorum Borough Council and Affinity Water to improve the ecology, recreational value and environmental resilience of the river.
- A new channel will be created downstream of the historic white bridge, with natural meanders and connection to groundwater and its spring flow. This will create a more biodiverse habitat characteristic of unmodified chalk streams.
- The EAs gauging station will be relocated onto the new channel, to remove the current barrier to fish.
- The relocation of the channel has been designed to avoid the loss of trees.
- All decision making will take into account the new features created within Gadebridge Park such as the Splash Park, car park, and new play area, to provide an enhanced visitor experience.
- We will be finalising our detailed designs in summer 2021 and aim to get planning permission in summer 2021 with delivery of the works starting in autumn 2021.
- We have considered the optimum environmental window for construction to allow for the fish spawning season and other ecological processes.
- Completing the project in 2 phases will allow for establishment of the new channel whilst protecting the fish and wildlife which live in the existing channel.
- This project will make the floodplain more resilient and encourage natural flood management, such as allowing the floodwater to drain faster
- We have investigated the site for historic and archeologically significant features. We are able to confirm there will be no detriment to any of these features within the park.

## Stakeholders

Stakeholder	What do they want from us?	What do we want from them?	Timeframe	Type of engagement (provide, receive, collaborate)	Technique
Dacorum Borough Council	<ul style="list-style-type: none"> <li>Leadership/accountability for the project</li> <li>A clear understanding of how the project will impact on the use of the park.</li> <li>A detailed timeline of works</li> <li>Regular communications and updates for themselves and their constituents</li> <li>Assurance that the park will be left for the better</li> </ul>	<ul style="list-style-type: none"> <li>Provide support and be an active partner throughout the project.</li> <li>Access to the park to do works</li> <li>Local intelligence</li> <li>Resource provision including help with funding strategy, planning and communications.</li> </ul>	Ongoing	Collaborate	Emails / Meetings / Phone calls
