# 1 Introduction

## 1.1 Background

During the development of the Dacorum Site Allocations DPD a Sustainability Appraisal (SA), incorporating Strategic Environmental Assessment (SEA), has been undertaken, with a series of SA reports having been produced at key stages in the process.

During that process a range of Sustainability Reports and Working Notes have been published to communicate the findings of the combined SA/SEA process and enable consultation. These documents have been informed by reports and working notes produced during the associated process to develop the Dacorum Core Strategy DPD.

For the Site Allocations DPD, three SA Working Notes were produced in the period between November 2006 and April 2014 and then a full SA Report was prepared to accompany the Pre-Submission Site Allocations document during the consultation from September to November 2014.

To take into account the Focused Changes that were made to the Site Allocations DPD following the consultation on the Pre-Submission DPD, an SA Report Addendum was produced in July 2015. This Addendum provided new or revised assessments for those Focused Changes that were considered to potentially affect the findings of the original SA Report – all in a positive direction. The other Focused Changes and minor changes were judged as having little or no influence on the SA Report findings.

Further minor changes were proposed to the Site Allocations DPD prior to Submission and for the purposes of completeness it was necessary to determine whether any of these changes would have implications in relation to the findings in the SA Report and its Addendum. An SA Submission Statement (January 2016) was therefore prepared for this purpose.

Following the Submission of the DPD but prior to the Examination, an additional SA Report Addendum (May 2016) was prepared in order to provide information in relation to how alternatives were considered during the development of the Site Allocations DPD, and in particular to pull together within a single document certain information previously reported in various SA Working Notes. The Addendum also provided clarification in relation to some other issues that were raised in correspondence from the Inspector (Examination documents PC3a and PC3b).

Following discussions with the Inspector and other stakeholders during the Examination Hearings, a further schedule of Proposed Main Modifications has now been produced. Consultation on these proposed Main Modifications will take place for eight weeks, commencing in late December 2016. During this consultation, representations on the soundness of the Main Modifications will be sought. For completeness the Council has also included a schedule of the changes that are required to the Policies Map to illustrate the implications of the Main Modifications spatially. These changes will also form part of the consultation.

This third SA Report Addendum has been produced to document the sustainability appraisal of the changes in schedule of Proposed Main Modifications and changes to the Policies Map and forms part of the consultation process.

This Addendum should be read alongside the SA Report (September 2014) (Examination document SUB20), the SA Report Addendum (July 2015) (Examination document SUB13); the SA Submission Statement (January 2016) (Examination document SUB5) and the SA Report Addendum (May 2016) (Examination document SA22).

## **2 Methodology**

### **2.1 Introduction**

The aim of this stage of the SA/SEA process is to determine whether there are likely to be any significant sustainability effects arising from the Main Modifications to the Site Allocations DPD and to consider whether there is a need to update the findings documented in previous SA Reports.

### **2.2 Screening**

It would not be proportionate to undertake a full assessment on all of the proposed modifications and it was therefore necessary to identify those Main Modifications and Policies Map changes which could potentially result in significant effects or alterations to the previous assessments, so that the assessment could focus on those specific modifications. This was undertaken through an initial screening process which considered the significance of the proposed modification and whether it would have implications of the previous findings of the SA. The screening was undertaken on all the proposed Main Modifications and Policies Map changes.

The screening used three levels of categorisation for the potential implications of each of the proposed modifications on the original sustainability appraisal as follows:

- No implications for the SA;
- Implications (either positive or negative) for SA objectives but no update to previous assessments required; or
- Modification requires an additional/updated assessment.

#### *2.2.1 Habitats Regulations Assessment*

Alongside the sustainability appraisal screening of the proposed Main Modifications, consideration was also given to the potential implications of the modifications on the findings of the Habitats Regulations Assessment.

### **2.3 Assessment**

Those changes that the screening process identified as requiring an additional/updated assessment were then assessed against the SA Objectives using the methodology utilised for all previous rounds of Sustainability Appraisal. Details of this methodology are provided in Section 6.1 of the SA Report (September 2011).

## 3 Assessment Findings

### 3.1 Screening

#### 3.1.1 Main Modifications

The results of the screening process for the Main Modifications are detailed in Schedule A in Appendix A to this report and can be summarised as follows:

The 56 proposed Main Modifications were categorised as follows:

- 45 Main Modifications - No implications for the SA, either due to the minor nature of the policy change or due to the change being to supporting text;
- 7 Main Modifications – Minor implications (either positive or negative) for SA objectives but no update to SA findings required findings required (see Section 3.2); and
- 4 Main Modifications - Modification requires an update to the original assessment (see Section 3.3 and Appendix B). NB: these all relate to Policy LA5: Icknield Way, West of Tring.

#### 3.1.2 Changes required to the Policies Map

The results of the screening process for the Policies Map changes are detailed in Schedule B in Appendix A to this report and can be summarised as follows:

- Neither of the two policies map modifications have implications for the SA or HRA as they simply illustrate the implications of the Main Modifications spatially. Any effects would be considered during the screening of the relevant Main Modifications.

### 3.2 Minor Implications

The screening process identified 7 proposed Main Modifications that are likely to have positive implications for some SA Objectives but which did not warrant any further assessment. The SA Objectives covered are as follows:

#### SA1: Biodiversity

- In relation to additional policy text for Policy LA3: West Hemel Hempstead that will help to reduce adverse effects on biodiversity (MM18).
- In relation to strengthened policy text for Policy LA4: Hanburys, Shootersway, Berkhamsted that will help to reduce adverse effects on biodiversity (MM25).
- In relation to additional planning requirements for Proposal L/4 Dunsley Farm, London Road, Tring (MM54).

#### SA12: Health

- In relation to additional planning requirements for Proposal L/4 Dunsley Farm, London Road, Tring (MM54).

#### SA15: Housing

- In relation to increased housing provision (additional 190 units) at site allocation H/2 (MM42).
- In relation to increased housing provision (additional 21 units) at site allocation H/5 (MM43).
- In relation to increased housing provision (additional 16 units) at site allocation H/12 (MM45).
- In relation to increased housing provision (additional 200 units) at site allocation MU/2 (MM47).

NB: only those Main Modifications where the estimated dwelling capacity has been changed by 10 or more units have been considered to have implications for the previous assessments.

None of these changes require an update to the original findings of the SA, as in all cases the effects identified did not alter the previous scorings identified for the policy against the relevant SA objective.

### 3.3 Detailed Assessment

Four of the Main Modifications relating to Policy LA5: Icknield Way, West of Tring (MM28, MM29, MM33 and MM34) were identified as having implications for the previous assessment of this policy and therefore an updated assessment has been prepared to take account of these Main Modifications (see Appendix B).

#### Assessment significance criteria

The results of the assessment utilise the following criteria to categorise the nature of the effect.

Symbol	Description
✓✓	Very sustainable - Option is likely to contribute significantly to the SA/SEA objective
✓	Sustainable - Option is likely to contribute in some way to the SA/SEA objective
-	Neutral – Option is unlikely to impact on the SA/SEA objective
?	Uncertain – It is uncertain how or if the Option impacts on the SA/SEA objective
x	Unsustainable – Option is likely to have minor adverse impacts on the SA/SEA objective
x.x	Very unsustainable – Option is likely to have significant adverse impacts on the SA/SEA objective

#### Policy LA5: Icknield Way, West of Tring

##### Assessment

The detailed assessment is included in Appendix B. A summary of the scoring against each of the SA objectives is shown in the table below. It should be noted that none of the overall scores have been changed as a result of the Main Modifications.

The amended assessment findings for the ‘Landscape & Townscape’ (SA11) and ‘Housing’ objectives (from Appendix B) are also copied below. The text uses strikethrough and bold text to show deletions and additions to the original assessment (SA Report, September 2014).

SA Objectives (Abridged)																			
1. Biodiversity	2. Water quality/quantity	3. Flood risk	4. Soils	5. GHG Emissions	6. Climate Change Proof	7. Air Quality	8. Use of brownfield sites	9. Resource Efficiency	10. Historic & Cultural Assets	11. Landscape& Townscape	12. Health	13. Sustainable Locations	14. Equality/ Social Inclusion	15. Good Quality Housing	16. Community Identity and Participation	17. Crime and Fear of Crime	18. Sustainable Prosperity and Growth	19. Fairer Access to Services	20. Revitalise Town Centres
x	-	-	x	?	-	x	x	-	-	x	✓ x	x	x	✓	-	-	✓	✓	✓

11	Landscape & Townscape	The site is in the Green Belt. <del>and</del> <b>The area proposed for built development (eastern fields)</b> is located adjacent to the Chilterns AONB, <b>with the associated open space (Policy L/3) and cemetery extension (Policy C/1) in the western fields both being within the AONB.</b> Development of this site would be visible from Icknield Way and the Chilterns AONB, which could have adverse visual impacts. Limiting the effect of the new development on views from the AONB and creating a soft edge and transition with the AONB could help to mitigate these effects. Buildings will be limited to two storeys, except where a higher element would create interest and focal points in the street scene, and this supports this objective.	x
15	Good quality housing	This site would provide 180-200 dwellings, including 40% affordable housing. A mix of homes will be provided, accommodating both smaller households and family homes. <del>The site will provide a traveller site of 5 pitches.</del>	✓

### 3.4 Implications for Habitats Regulations Assessment

A Habitats Regulations Assessment (HRA) was undertaken for the Dacorum Core Strategy and this concluded that there would be no significant effects, as a result of either air pollution or recreation disturbance, on Chiltern Beechwoods SAC from either individual developments or cumulative effects from the implementation of the Core Strategy. Natural England agreed with the conclusions of the HRA and the avoidance and mitigation proposed.

The SA report for the Site Allocations Pre-Submission (September 2014) identified that whilst the Site Allocations DPD provides a greater level of detail to the location of development to that which was included in the Core Strategy, it does not put forward any sites that are of a scale and/or location that would alter the findings of the HRA of the Core Strategy. Based on their review of the Pre-Submission Site Allocations DPD Natural England were satisfied with this conclusion.

The changes proposed in the Focused Changes to the Site Allocations (July 2015) were screened to determine whether there were any that were of a nature that could alter the findings of the Core Strategy HRA. This additional screening process concluded that none of the Focused Changes were of a scale and/or location that would alter the findings of the previous HRA.

The additional minor changes proposed to the Site Allocations (see SA Submission Statement (January 2016)) were screened to determine whether there were any that are of a nature that could alter the findings of the Core Strategy HRA. As for the Focused Changes, the result of this additional screening process was that it was considered that none of the minor changes were of a nature (in terms of scale and/or location) that would alter the findings of the previous HRA.

None of the proposed Major Modifications or associated Policy Map changes have been found as having any implications for the existing findings of the Habitats Regulations Assessment. See Appendix A for the screening of the Main Modifications and Policy Map changes. Therefore the conclusions of the Core Strategy HRA Report continue to remain unchanged.

## **4 Conclusion and Next Steps**

### **4.1 Conclusion**

Of the Main Modifications to the Site Allocations DPD and associated changes to the Policies Map that are being proposed, only four, all related to Policy LA5, have warranted an update to the previous assessment through the SA/SEA process. The updated assessment for that policy did not identify any new significant effects.

For the changes which were identified as likely to have some effects, but not at a level significant to warrant additional assessment, the changes supported SA objectives covering biodiversity, health and housing.

Overall the changes do not affect the outcomes of the SA which found that generally the Site Allocations DPD is likely to have positive Borough-wide effects across the range of sustainability topics.

In addition the changes have been found to not have any implications for the previous findings of the Habitats Regulation Assessment.

### **4.2 Next Steps**

The Main Modifications, Policies Map changes and the accompanying SA Report Addendum (this document) will be subject to consultation for a seven-week period. Following the close of the consultation, all responses will be passed to the Planning Inspector for her consideration. Provided the Inspector does not wish the Council to consult on any further Modifications to the plan she will issue her final Report into the Site Allocations examination. Provided the plan (incorporating the Main Modifications) is found 'sound,' Cabinet and full Council will be requested to adopt the plan, and if this recommendation is agreed, the Site Allocations DPD will then come into full statutory effect.

When the Site Allocations DPD is adopted it will be accompanied by an SA Adoption Statement. In line with the SEA Regulations, the SA Adoption Statement will provide the following information:

- How environmental/sustainability considerations have been integrated into the Site Allocations;
- How the SA Report has been taken into account;
- How opinions expressed in relation to the consultations on the Site Allocations and SA Report have been taken into account;
- The reasons for choosing the Site Allocations as adopted, in the light of the other reasonable alternatives dealt with; and
- The measures that are to be taken to monitor the significant environmental/sustainability effects of the implementation of the Site Allocations.

## Appendix A: Screening of Proposed Main Modifications

Schedule A below sets out the 'Main Modifications' (denoted by an 'MM' prefix) that have been identified as necessary to make Dacorum Borough Council's 'Site Allocations DPD, incorporating Focused Changes' (January 2016) 'sound'.

Schedule (A), listing the Main Modifications includes:

- The section and page number of the plan that the modification relates to, in order to help the reader identify what areas of the plan are proposed for modification.
- Where relevant, the Policy Number, Paragraph Number and Page Number has been referenced (the Page Number refers to the page number within the January 2016 version of the plan).
- Deleted text is shown via ~~strikethrough~~, whilst new text is underlined.

For completeness the Council has also included a schedule of the changes that are required to the Policies Map to illustrate the implications of the Main Modifications spatially. These are set out in Schedule (B) below. These are denoted by a 'PM' prefix.

For purposes of the Sustainability Appraisal (SA) and Habitats Regulations Assessment (HRA), in both these schedules an additional column has been added to consider whether the Main Modifications and/or Policy Map changes have any implications for the previous findings of the SA and/or HRA. Updates to the assessments deemed to be necessary are documented in Appendix B.

MM5	Page 45	Proposal S/1	<p>Amend Focused Change SC6 as follows:</p> <p><del>'Acceptable uses are retail and leisure uses. Approximately 7,000 sqm (gross) of retail floorspace is acceptable, except for the sale and display of clothing and footwear, unless ancillary to the main use of an individual unit. The nature and scale of development should aim to maximise the use of the site and ensure no significant adverse impact on Hemel Hempstead town centre. The sale and display of clothing and footwear is not acceptable, unless ancillary to the main use of an individual unit.'</del></p>	<p>No update to SA findings required as this amendment to the previous significant change (SC) will not result in any new or amended effects from those previously reported for Proposal S/1.</p> <p>No implications for HRA.</p>
<b>PROVIDING HOMES AND COMMUNITY SERVICES</b>				
MM6	Page 49	Introduction	<p>Amend paragraph 6.3 to take into account consequential changes to the phasing of the Local Allocations:</p> <p><del>'Core Strategy Policies CS2: Selection of Development Sites and CS35: Infrastructure and Developer Contributions require all development to provide, or make adequate contribution towards, infrastructure and services. The Core Strategy does not set out any absolute requirements regarding the timing of new homes except in the case of the release of the Local Allocations, which are were seen as being delivered from 2021 onwards (Policy CS3: Managing Selected Development Sites). They may be released earlier in order to secure a five year housing land supply. However, a decision has now been taken to bring forward the three largest Local Allocations (LA1, LA3 and LA5) earlier (see paragraph 6.27). These Local Allocations will help further boost the 5 year housing supply position. They should be made available for delivery, as and when required. New homes are generally directed to the towns and larger villages in accordance with the settlement hierarchy (Policy CS1: Distribution of Development), although the largest share of this will be taken by Hemel Hempstead as a Main Centre for Development and Change.'</del></p>	<p>Update to supporting text. 			<p>has been set in <u>each case</u>, this will follow the formal release of <del>the</del> <u>these sites</u> from the Green Belt i.e. after adoption of the Site Allocations DPD.</p> <p>6.28 The remaining Local Allocations (i.e. <del>LA1, LA2, LA3,</del> LA4 and LA6) are included in Part 2 of the Schedule of Housing Proposals and Sites and will bring forward completed homes from 2021 onwards. No detailed phasing of <del>these three individual</del> sites is warranted as they vary significantly in size, character, and location, and these factors will naturally regulate their release over time. However, there will need to be a lead in period in order to allow practical delivery from 2021. In practice, this will mean that applications will be received and determined in advance of 2021 and that site construction and works may actually take place ahead of the specified release date to enable occupation of new homes <del>by</del> <u>from</u> 2021.</p> <p>6.29 Earlier release of these Local Allocations may be justified so as to maintain a five year housing land supply, in accordance with Core Strategy Policy CS3: Managing Selected Development Sites, <u>although this is seen as unlikely given the early release of LA1, LA3 and LA5.</u> Decisions on such action will be informed by the Annual Monitoring Report process.</p> <p>6.30 <u>In the interim,</u> <del>a</del>All Local Allocations will be safeguarded and managed as open land or other appropriate temporary <u>open</u> uses until developed for their allocated use(s).</p>	
MM11	Page 56	Policy LA1	<p><i>Revised site layout to recognise existing pedestrian link between Link Road and Margaret Lloyd Park within indicative block layout; and to remove reference to a specified landscaped buffer on the western boundary of the site to enable a natural delineation along the planted settlement edge.</i></p>	<p>As reported in the SA Submission Statement (January 2016) this modification has no implications for the findings of the SA Report and its Addendum.</p> <p>No implications for HRA.</p>

No implications for HRA.</p>
PM2	Page 90	L/3	<p>Revert to the boundary of L/3 contained in the Site Allocations Pre-Submission document (September 2014), as shown below, to reflect the deletion of the proposed traveller site.</p>  <p>The map shows a residential area with a blue outline indicating the boundary of L/3. The map includes a north arrow and a scale of 1:10,000. The text 'Leisure space at LA5' is visible at the top of the map.</p>	<p>Update to map to reflect changes to Policy LA5 which have been assessed in Appendix B. No update to SA findings required. No implications for HRA.</p>

## Appendix B: Updated Assessments

This appendix includes the updated assessments for Policy LA5 which reflect the Main Modifications that are being proposed for that Local Allocation (see Appendix A).

The assessment table uses strikethrough and bold text to indicate the changes to the assessment for Policy LA5 that was included in the Publication SA Report.

As for all previous stages of SA, the assessment uses the scoring criteria and SA Objectives outlined below.

### Key to Assessment Scores

The following table outlines the symbols and abbreviations used to document the results of the assessment process.

Significance Assessment	Description
✓✓	Very sustainable - Option is likely to contribute significantly to the SA/SEA objective
✓	Sustainable - Option is likely to contribute in some way to the SA/SEA objective
?	Uncertain – It is uncertain how or if the Option impacts on the SA/SEA objective
–	Neutral – Option is unlikely to impact on the SA/SEA objective
✘	Unsustainable – Option is likely to have minor adverse impacts on the SA/SEA objective
✘✘	Very unsustainable – Option is likely to have significant adverse impacts on the SA/SEA objective

### SA Objectives

The table below outlines the Sustainability Objectives that have been used to focus the assessment process and details the reference term which is used in the assessment tables for the sake of brevity.

SA Objective	Reference Term
1	To protect, maintain and enhance biodiversity and geodiversity at all levels, including the maintenance and enhancement of Biodiversity Action Plan habitats and species in line with local targets
	Biodiversity

2	To protect, maintain and enhance water resources (including water quality and quantity) while taking into account the impacts of climate change	Water quality/ quantity
3	Ensure that new developments avoid areas which are at risk from flooding and natural flood storage areas	Flood risk
4	Minimise development of land with high quality soils and minimise the degradation/loss of soils due to new developments	Soils
5	Reduce the impacts of climate change, with a particular focus on reducing the consumption of fossil fuels and levels of CO <sub>2</sub>	Greenhouse gas emissions
6	Ensure that developments are capable of withstanding the effects of climate change (adaptation to climate change)	Climate change proof
7	Achieve good air quality, especially in urban areas	Air Quality
8	Maximise the use of previously developed land and buildings, and the efficient use of land	Use of brownfield sites
9	To use natural resources, both finite and renewable, as efficiently as possible, and re-use finite resources or recycled alternatives wherever possible	Resource efficiency
10	To identify, maintain and enhance the historic environment and cultural assets	Historic & cultural assets
11	To conserve and enhance landscape and townscape character and encourage local distinctiveness	Landscape & Townscape
12	To encourage healthier lifestyles and reduce adverse health impacts of new developments	Health
13	To deliver more sustainable patterns of location of development.	Sustainable locations
14	Promote equity & address social exclusion by closing the gap between the poorest communities and the rest	Equality & social exclusion
15	Ensure that everyone has access to good quality housing that meets their needs	Good quality housing
16	Enhance community identity and participation	Community Identity & participation
17	Reduce both crime and fear of crime	Crime and fear of crime
18	Achieve sustainable levels of prosperity and economic growth	Sustainable prosperity and growth
19	Achieve a more equitable sharing of the benefits of prosperity across all sectors of society and fairer access to services, focusing on deprived areas in the region	Fairer access to services
20	Revitalise town centres to promote a return to sustainable urban living	Revitalise town centres

## Policy LA5: Icknield Way, West of Tring

NB. This table does not include assessment for the parts of the LA5 which are covered by E/1 (extension to the industrial estate), C/1 (extension to the cemetery) and L/3 (provision of new open space), as these were assessed separately in the Publication SA Report (September 2014).

SA Objective		Icknield Way, West of Tring	
1	Biodiversity	The site is greenfield and there would therefore be loss of some habitats.	x
2	Water quality/ quantity	No predicted effects. Ensuring sufficient sewerage and sewage treatment capacity supports this objective.	-
3	Flood risk	The site is in a low flood risk zone.	-
4	Soils	This site is greenfield land, and development would result in soil sealing.	x
5	Greenhouse gas emissions	The site is located near a local centre and is adjacent to the town's main employment area. However it is located 2km from the town centre. This could increase the use of the car to access town centre facilities and services, thereby increasing the growth of ghg emissions. Pedestrian and cycle routes will permeate the site which should help to encourage walking and cycling on the site. There is also uncertainty around the level of out-commuting that may result from building the large number of houses on this site. If this is by car on the A41, there is the potential for growth in ghg emissions.	?
6	Climate change proof	No predicted effects.	-
7	Air Quality	The site is located near a local centre and is adjacent to main employment area. However it is located 2km from the town centre. This could increase the use of the car, increasing the possibility of adverse effects on local air quality. Pedestrian and cycle routes will permeate the site which should help to encourage walking and cycling on the site.	x
8	Use of brownfield sites	This site is located in greenfield.	x
9	Resource efficiency	No predicted effects.	-
10	Historic & cultural assets	This site is located in an area classified as "20 <sup>th</sup> century agriculture" (HLC). The site is adjacent to Tring cemetery, which is a locally listed historic park and garden, protecting the green and open setting of this designation should mitigate any potential adverse effects.	-
11	Landscape & Townscape	The site is in the Green Belt. <del>and</del> <b>The area proposed for built development (eastern fields)</b> is located adjacent to the Chilterns AONB, <b>with the associated open space (Policy L/3) and cemetery extension (Policy C/1) in the western fields both being within the AONB.</b> Development of this site would be visible from Icknield Way and the Chilterns AONB, which could have adverse visual impacts. Limiting the effect of the new development on views from the AONB and creating a soft edge and transition with the AONB could help to mitigate these effects. Buildings will be limited to two storeys, except where a higher element would create interest and focal points in the street scene, and this supports this objective.	x
12	Health	Developing this site would allow for open space, but it would not be big enough for all the leisure space aspirations for Tring.	✓
		This site is close to the A41, which means there would be noise disturbance which could affect the health and well-being of the new residents.	x

SA Objective		Icknield Way, West of Tring	
13	Sustainable Locations	The site is located near the local centre and is adjacent to main employment area. However it is located 2km from the town centre.	×
14	Equality & social exclusion	The site is located near the local centre and is adjacent to main employment area. However it is located 2km from the town centre. A new toddler's play area will be developed.	×
15	Good quality housing	This site would provide 180-200 dwellings, including 40% affordable housing. A mix of homes will be provided, accommodating both smaller households and family homes. <del>The site will provide a traveller site of 5 pitches.</del>	✓
16	Community Identity & participation	No predicted effects.	-
17	Crime and fear of crime	No predicted effects. The site will be designed to be safe and secure.	-
18	Sustainable prosperity and growth	The new housing should help to support the local services in the town, maintaining their viability and boosting the local economy.	✓
19	Fairer access to services	This option provides new housing which could result in improved services and jobs for the town and should help to support the local services, thereby maintaining their viability.	✓
20	Revitalise town centres	The new housing should help to support the local services in the town, maintaining their viability and boosting the local economy, thereby helping to support sustainable urban living.	✓
Summary of Assessment		<p>As development of site would lead to <b>built</b> development on greenfield land, within the Green Belt and <del>close</del> <b>adjacent</b> to the Chilterns AONB, adverse effects have been forecast for the biodiversity, soils, use of brownfield sites and landscape &amp; townscape SA objectives. The development requirements seek to mitigate these impacts through careful layout, design, density and landscaping. For example, limiting the effect of the new development on views from the AONB and creating a soft edge and transition with the AONB could help to mitigate these effects. The site is adjacent to Tring cemetery, which is a locally listed historic park and garden, protecting the green and open setting of this designation should mitigate any potential adverse effects.</p> <p>This site is located near to a local centre and is adjacent to the town's main employment area. However it is located 2km from the town centre. This could increase the use of the car to access town centre facilities and services, thereby increasing the growth of greenhouse gas emissions and other emission to air. Pedestrian and cycle routes will permeate the site which should help to encourage walking and cycling on the site. There is also uncertainty around the level of out-commuting that may result from building the large number of houses on this site. If this is by car on the A41 there is the potential for increased levels of emissions.</p> <p>Development of this site would provide for around 180-200 dwellings, including 40% affordable housing. However, the site is close to the A41, which means noise disturbance could affect the health and well-being of the new residents. The new housing on the site should help to support the local services in the town, maintaining their viability and boosting the local economy.</p>
